Web Application Obfuscation Mario Heiderich, Eduardo Alberto Vela Nava, Gareth Heyes, David Lindsay, 2011-01-13 Web applications are used every day by millions of users, which is why they are one of the most popular vectors for attackers. Obfuscation of code has allowed hackers to take one attack and create hundreds-if not millions-of variants that can evade your security measures. Web Application Obfuscation takes a look at common Web infrastructure and security controls from an attacker's perspective, allowing the reader to understand the shortcomings of their security systems. Find out how an attacker would bypass different types of security controls, how these very security controls introduce new types of vulnerabilities, and how to avoid common pitfalls in order to strengthen your defenses. Named a 2011 Best Hacking and Pen Testing Book by InfoSec Reviews Looks at security tools like IDS/IPS that are often the only defense in protecting sensitive data and assets Evaluates Web application vulnerabilities from the attacker's perspective and explains how these very systems introduce new types of vulnerabilities Teaches how to secure your data, including info on browser quirks, new attacks and syntax tricks to add to your defenses against XSS, SQL injection, and more

**Hardware Protection through Obfuscation** Domenic Forte, Swarup Bhunia, Mark M. Tehranipoor, 2017-01-02 This book introduces readers to various threats faced

during design and fabrication by today's integrated circuits (ICs) and systems. The authors discuss key issues, including illegal manufacturing of ICs or "IC Overproduction," insertion of malicious circuits, referred as "Hardware Trojans", which cause in-field chip/system malfunction, and reverse engineering and piracy of hardware intellectual property (IP). The authors provide a timely discussion of these threats, along with techniques for IC protection based on hardware obfuscation, which makes reverse-engineering an IC design infeasible for adversaries and untrusted parties with any reasonable amount of resources. This exhaustive study includes a review of the hardware obfuscation methods developed at each level of abstraction (RTL, gate, and layout) for conventional IC manufacturing, new forms of obfuscation for emerging integration strategies (split manufacturing, 2.5D ICs, and 3D ICs), and on-chip infrastructure needed for secure exchange of obfuscation keys- arguably the most critical element of hardware obfuscation.

**Surreptitious Software: Obfuscation, Watermarking, and Tamperproofing for Software Protection** Jasvir Nagra,2009

**Surreptitious Software** Christian Collberg,Jasvir Nagra,2010 This text gives a thorough scholarly coverage of an area of growing importance in computer security. Collberg and Nagra bring together techniques drawn from all areas of computer science, including cryptography, steganography, watermarking, software metrics, reverse engineering, and compiler optimization.

Crime Dot Com Geoff White,2020-08-20 Brilliantly researched and written.--

Jon Snow, Channel 4 News A comprehensive and intelligible account of the elusive world of hacking and cybercrime over the last two decades. . . . Lively, insightful, and, often, alarming.--Ewen MacAskill, Guardian On May 4, 2000, an email that read kindly check the attached LOVELETTER was sent from a computer in the Philippines. Attached was a virus, the Love Bug, and within days it had been circulated across the globe, paralyzing banks, broadcasters, and businesses in its wake, and extending as far as the UK Parliament and, reportedly, the Pentagon. The outbreak presaged a new era of online mayhem: the age of Crime Dot Com. In this book, investigative journalist Geoff White charts the astonishing development of hacking, from its conception in the United States' hippy tech community in the 1970s, through its childhood among the ruins of the Eastern Bloc, to its coming of age as one of the most dangerous and pervasive threats to our connected world. He takes us inside the workings of real-life cybercrimes, drawing on interviews with those behind the most devastating hacks and revealing how the tactics employed by high-tech crooks to make millions are being harnessed by nation states to target voters, cripple power networks, and even prepare for cyber-war. From Anonymous to the Dark Web, Ashley Madison to election rigging, Crime Dot Com is a thrilling, dizzying, and terrifying account of hacking, past and present, what the future has in store, and how we might protect ourselves from it.

**Manufacturing the Bespoke** Bob Sheil, 2012-10-18 The essential reader on fabrication in architecture for practitioners and producers alike An original and informative reader on the subject of translating architectural ideas from conceptual propositions to physical manifestations, *Manufacturing the Bespoke* is an essential resource for students and practitioners of architecture, as well as producers and suppliers of architectural products. At a time where roles, methods and capabilities within the disciplines of building production are in unprecedented flux, this book: Provides a unique and highly current treatment on the subject of fabrication in architecture with its emphasis on contemporary technology, cultural history and theory A key source book for students and professionals engaged in manufacturing/fabrication projects Includes extended articles by internationally renowned critics, theorists, educators and designers, such as Mathias Kohler, Nevi Oxman, and Michael Stacey Articles will examine and refer to key portfolios of the 20th and 21st Century including works by Pierre Charreau, Peter Salter and Rural Studio Featuring essays from pioneering architects, engineers, academics and designers from around the world on both existing and yet-to-be-built projects, the book covers architecture across the ages.

*Fabricate 2011* Ruairi Glynn, Bob Sheil, 2017-08-24 FABRICATE is an international peer reviewed conference that takes place every three years with a supporting publication on the theme of Digital Fabrication. Discussing the progressive integration of digital design with manufacturing processes,

and its impact on design and making in the 21st century, FABRICATE brings together pioneers in design and making within architecture, construction, engineering, manufacturing, materials technology and computation. Discussion on key themes includes: how digital fabrication technologies are enabling new creative and construction opportunities from component to building scales, the difficult gap that exists between digital modelling and its realisation, material performance and manipulation, off-site and on-site construction, interdisciplinary education, economic and sustainable contexts. FABRICATE features cutting-edge built work from both academia and practice, making it a unique event that attracts delegates from all over the world. FABRICATE 2011, 2014 and 2017 are now all available to download free from UCL Press.

Protoarchitecture Bob Sheil, 2008-08-04 The illusive and uncertain world of translating ideas into matter is a negotiation between the ideal and the real and a central preoccupation of architectural production. By invading the toolbox of digital fabrication, design has transgressed into protocols of manufacturing previously the domain of other disciplines and skills sets. Craft, assembly and installation, once the realm of trades, are qualities that are now dependent upon design information and its status as an instruction to make. The ensuing loop between the physical and tactile, the imaginary and speculative, has defined a new expectation in making architecture as a construct that is part real, part ideal. With contributions from Lebbeus Woods, Evan Douglass, Theo Jansen, Shin Egashira and many more,

Protoarchitecture presents an explicitly diverse collection of works from leading and emerging practitioners, educators, researchers and visionaries from all corners of this innovative field.

*Roni Horn - Remembered Words* ,2018-11-30 Remembered Words is the title of a series of watercolor paintings that Roni Horn (born 1955) created in 2013 and 2014. An important part of Horn's work revolves around language. In this new series she pairs remembered words with dots, adding the words to the dots like footnotes or captions, creating a kind of personal, even autobiographical dictionary. The combination of the dots--which are sometimes properly arranged in color-coordinated rows, or in other drawings distributed in a random and overlapping manner, wild and out of control--with the words creates unexpected relations and meanings, long strings of associations, absurd and beautiful simultaneously.

*Manual of Panic Focused Psychodynamic Psychotherapy - eXtended Range*  
Fredric N. Busch,Barbara L. Milrod,Meriamne B. Singer,Andrew C. Aronson,2012-04-23 This manual presents a carefully researched, detailed psychodynamic treatment program for the alleviation of a transdiagnostic range of primary Axis I anxiety disorders, including panic disorder, generalized anxiety disorder, social anxiety disorder, post-traumatic stress

disorder, and related psychological problems. First exploring the principles of psychodynamic theory and formulation, the authors then present a three-phased process of Panic Focused Psychodynamic Psychotherapy-Extended Range (PFPP-XR): initial evaluation, interpretation of central conflicts and defense mechanisms, and termination. Each phase is discussed in depth and relies on central case illustrations to demonstrate techniques and results. A subsequent chapter explores how to address complex issues that may arise during the course of treatment. Altogether, this manual not only provides a demonstrated, adaptable approach for anxiety disorders, but also clearly embodies a spirit of research and empiricism heretofore rare in psychodynamic psychotherapies, with an eye toward future development.

The Plantation Mistress Catherine Clinton, 1984-02-12 This pioneering study of the much-mythologized Southern belle offers the first serious look at the lives of white women and their harsh and restricted place in the slave society before the Civil War. Drawing on the diaries, letters, and memoirs of hundreds of planter wives and daughters, Clinton sets before us in vivid detail the daily life of the plantation mistress and her ambiguous intermediary position in the hierarchy between slave and master. The Plantation Mistress challenges and reinterprets a host of issues related to the Old South. The result is a book that forces us to rethink some of our basic assumptions about two peculiar institutions -- the slave plantation and the nineteenth-century family. It approaches a familiar subject from a new

angle, and as a result, permanently alters our understanding of the Old South and women's place in it.

Spaces of Uncertainty Kenny Cupers, Markus Miessen, 2002-01-01 Archivists of the discontinuous: Architecture at the edge The city as machine. The city as collage. Urban agglomeration as the interim city, as the ersatz or even the abandoned city? Even designations such as the murdered city have been used. Slogans with different meanings and orientations as well as theoretical concepts adopted by very different ideologies and schools of urban planning have entered the intellectual, conceptual discourse on urbanism and urban life, on plannability and entropy, on civil society, ecological urban culture and informal urban economy. The architects Kenny Cupers, a Belgian living in London, and Markus Miessen, a German educated in Scotland, have created an architectural study project that reflects habitats in photos - 'Spaces of Uncertainty'. The work presented here in the form of an exhibition that will be touring Europe until 2004 takes a critical look at the intersecting point of inside, outside and aside architecture. The project is located at the meeting point between a micro and a macro view of the 'city as contextual myth. Using the example of Berlin - both architects/artists/theoreticians worked in the Libeskind studio for some time - the issue is demonstrated in paradigmatic terms, positioned at the interface between the dissonance, contingency and discontinuity of contemporary life as lived by modern city dwellers.

*Photography Degree Zero* Geoffrey Batchen, 2011-09-30 An essential guide to an essential book, this first anthology on Camera Lucida offers critical perspectives on Barthes's influential text. Roland Barthes's 1980 book Camera Lucida is perhaps the most influential book ever published on photography. The terms studium and punctum, coined by Barthes for two different ways of responding to photographs, are part of the standard lexicon for discussions of photography; Barthes's understanding of photographic time and the relationship he forges between photography and death have been invoked countless times in photographic discourse; and the current interest in vernacular photographs and the ubiquity of subjective, even novelistic, ways of writing about photography both owe something to Barthes. Photography Degree Zero, the first anthology of writings on Camera Lucida, goes beyond the usual critical orthodoxies to offer a range of perspectives on Barthes's important book. Photography Degree Zero (the title links Barthes's first book, Writing Degree Zero, to his last, Camera Lucida) includes essays written soon after Barthes's book appeared as well as more recent rereadings of it, some previously unpublished. The contributors' approaches range from psychoanalytical (in an essay drawing on the work of Lacan) to Buddhist (in an essay that compares the photographic flash to the mystic's light of revelation); they include a history of Barthes's writings on photography and an account of Camera Lucida and its reception; two views of the book through the lens of race; and a provocative essay by Michael Fried and two responses

to it. The variety of perspectives included in *Photography Degree Zero*, and the focus on *Camera Lucida* in the context of photography rather than literature or philosophy, serve to reopen a vital conversation on Barthes's influential work.

Species of Spaces and Other Pieces Georges Perec, 1997 This selection of non-fictional work from the author of *Life, a User's Manual*, demonstrates Georges Perec's characteristic lightness of touch, wry humour and accessibility.

**Brief Cognitive Behavior Therapy for Cancer Patients** Scott Temple, 2017-02-03 *Brief Cognitive Behavior Therapy for Cancer Patients* is a practical, clinical guide that allows for the integration of techniques from multiple newer CBT models, organized around a clear conceptual foundation and case conceptualization. The book targets those cognitive, emotional, and behavioral processes that research suggests are instrumental in the maintenance of human psychological suffering. Author Scott Temple also draws on newer models that build on strengths and resilience and brings clinical work to life through vivid case examples, worksheets, and case conceptualization forms. Detailed vignettes show clinicians how to create a case conceptualization as a guide to treatment, as well as how to integrate Beckian and newer CBT techniques.

*Hack Wit* Roni Horn, 2015 *Hack Wit* is a playful and complex body of work developed between 2013 and 2015, using clichés or proverbs and watercolor.

For each work, the artist made two watercolors of a different proverb, cut them apart and then combined them into one. The Canadian poet Anne Carson wrote the text *Hack Gloss* in response to the “Hack Wit” drawings.

*Art Today* Brandon Taylor, 2005 In *Art Today* Brandon Taylor charts the ideas and practices of contemporary art across a wide international spectrum. From Minimalism and Conceptualism to video and film, from painting and sculpture to performance and installation, he shows how advanced art has continued to provoke and perplex a fascinated public. *Art Today* shows how the new art of the last three decades has been energized not merely by changing technologies of art-making, but by the spread of new museum architecture, by the voice of the critic, and in recent times by the activity of the powerful international curator. It also shows how the dominant narrative of advanced art in the USA and Western Europe has been invigorated by an expanding international network, from the West Coast of America, from Eastern and Central Europe, and more recently from Asia and Africa. Reviewing the major controversies of the later twentieth century and the early years of the twenty-first, it also includes a discussion of the impact of the internet and digital art. Generously illustrated in colour, *Art Today* is a guiding narrative to the most adventurous art of our time.
