Double Bubble Trouble Dennis Goldberg, 2007-04 There's trouble afoot in Dennis Goldberg's latest adventure caper, *Double Bubble Trouble* and it's up to siblings Allison and Todd to bring order back to the magical land of Chicle before it's too late. Allison and Todd get more than they bargained for when they accept a piece of rainbow-colored gum from a mysterious clown at a local fair. After popping it in their mouths, the two find themselves transported to a whole new world - a world full of creepy gnomes, well-meaning trolls, scary dragons, beautiful tri-corns and many other strange and unusual creatures. Following in the footsteps of such children's classics as C.S. Lewis' *The Chronicles Of Narnia* and L. Frank Baum's *The Wizard Of Oz*, with its colorful characters, strong moral lessons and rich imaginary, *Double Bubble Trouble* is the perfect book for young readers ages 8-12. With its easy to read prose and fun plays on words, readers are drawn in trying to figure out how Allison and Todd get out of trouble - double bubble trouble.

Double Bubble Universe: The Layout Katya Walter Phd, 2014-06-02 Is this science fiction? Some say so. Science and mysticism merge in this stunning new paradigm! *Double Bubble Universe* is Volume 1, 2nd edition, in the sensational DOUBLE BUBBLE TOE series. Western science explores cosmology. Ancient China's I Ching follows the Tao. They merge in a master code that spans DNA, superstrings, gravitons, fractals, and chaos theory. Dr. Katya Walter takes you into the fractal double bubble universe! This book heals the 2,500-year split between body and mind. Called in Germany a philosopher queen of the global village, Dr. Walter embraces East and West to unite our planet. She merges left-brain accuracy with right-brain vision in a clear voice of wisdom. Volume 1 overviews the Double

Bubble universe, its layout and functions. It has 17 chapters in 102 sections, a Series Summary, Bibliography, and Reviews. It has over 75 images, graphics, and charts. The ebook version uses color graphics with greater distinctions, its text is completely searchable with an interactive of table contents, and there are 45 e-links amplify the materials. What if our universe is really a giant double bubble? The laws of physics allow it...and it solves many puzzles in current science. The two huge bubbles are reciprocal mirror twins existing above and below the Planck level scale of reality. Our familiar bubble above the Planck level has 3D space and the arrow of time - what we call spacetime. It holds matter, energy, and the known pole of gravity. Many mini-minds (like ours, for instance) inhabit the gracious 3D space and constricted time of the upper bubble. But that other bubble hidden below the Planck level has 3D time and the arrow of space - call it timespace. It holds antimatter, tachyonic energy, and the lost pole of gravity unknown to current physics. Its shape is due to by a Lorenz attractor-like dynamic that creates the two bubbles. A membrane interface of many tiny cells joins the two bubbles. At this tiny scale where space and time are made arises its ongoing solution of continually emergent reality. This holographically projects two bubbles - one with 3D space and an arrow of time in the upper bubble; the other with 3D time and an arrow of space in the lower bubble. Together the two arrows stretch a polarized 1D axis across both bubbles. Many tiny walkabout minds exist in the upper bubble. They are powered by electrical energy. A single unified mind dwells in the lower bubble...powered by zippy tachyonic energy in a vast cloud throughout 3D time. That great mind down there and our tiny minds up here influence the continual chaotic flow of events...subject to abrupt, seemingly random changes, but they emerge in a

nonlinear progression of chaos patterning. Along with scientific concepts, Dr. Walter also describes metaphysical parallels and tells a dream that inspired this series. Praise for Double Bubble Universe Katya Walter's Double Bubble Universe integrates immense questions and insightful answers about the cosmos. She uses data, analogies, images, and stories that resolve together into one bubbling statement. A must read.... Rowena Pattee Kryder, author of Dynamics & Foundations of Co-Creation I can't decide if this is sci-fi, fact, or psi-phy. Whatever, it is truly fascinating. A brain gym of possibilities! Frank Patterson, former aero-space engineer I find this series the most promising of all the TOEs being proposed currently. It involves a new topological model spanning all levels of reality and deep see diving into fractal pattern recognition. It answers far-reaching questions. This model deserves careful reading by the best minds of our time. Oliver Markley, Ph.D., Prof. Emeritus of Human Sciences & Future Studies

Rainbow Michael Genhart, 2019 A must-have primer for young readers and a great gift for pride events and throughout the year, beautiful colors all together make a rainbow in Rainbow: A First Book of Pride. With bright colors and joyful families, this book celebrates LGBTQ+ pride and reveals the colorful meaning behind each rainbow stripe. Readers will celebrate the life, healing, light, nature, harmony, and spirit that the rainbows in this book will bring.

Double Bubble Trouble! Judy Bradbury, 1997 Christopher has a series of misadventures as he tries to use his new skill of counting by two's to get enough bubble gum to share with his classmates.

Double Bubble Universe Katya Walter, Katya Walter, Ph. D., 2013-10-30 Science and mysticism merge in this stunning new paradigm! It is Volume 1 in the sensational TOUCHING GOD'S TOE series. Western science explores cosmology. China's I Ching follows the Tao. They merge in modern DNA, superstrings, gravitons, fractals, and chaos theory. Some would call this book sci-fi... but the author calls it more like psi-phy. Why? Because you can traverse what it describes with psi ability, and you can also test it with the laws of physics. Thus...psi-phy. Dr. Katya Walter guides you through the patterns of chaos theory into mystic beauty! This book heals the 2,500-year split between body and mind. Called in Germany a philosopher queen of the global village...Dr. Katya Walter embraces East and West to unite our planet. She merges left-brain accuracy with right-brain vision! Scientific truth speaks in a clear voice of wisdom. What if our universe is really a giant double bubble? The laws of physics allow it...and it solves many puzzles in current science. Regard

the two huge bubbles of our double bubble universe. They are reciprocal mirror twins. Our familiar bubble above the Planck level has 3D space and the arrow of time - or what we call spacetime. It also has matter, energy, and the known pole of gravity. Many diverse mini-minds (like ours, for instance) roam this gracious 3D space in this upper bubble. But that other bubble hidden below the Planck level? That reversing-mirror twin? It has 3D time and the arrow of space - call it timespace - plus tachyonic energy and the opposite pole of gravitation that is unknown to current physics. A single giant mind dwells down in the lower bubble. It is powered by tachyons zipping in a vast energetic cloud throughout 3D time. That great unified mind and our tiny minds up here together assemble the continual chaotic flow of events that we experience. These events are subject to abrupt, seemingly random changes, but they emerge in a nonlinear progression that is created by mind as much as matter. The double bubble shape is caused by a Lorenz attractor effect that is oscillating between the two bubbles. The arrow of time in the upper bubble and the arrow of space in the lower bubble bond at the Planck level interface to make a polarized 1D axis that stretches across both bubbles. Due to scaling, the two bubbles can even fit inside each other! It is as if the white glove for your right hand turns inside out to become suddenly the black glove for your left hand. This turns our universe into a Lorenz oscillator caught in a Klein bottle. Thus in this TOE (or Theory of Everything), we live in a giant Klein bottle universe that is built by nonlinear chaos and influenced by mind itself, including yours. ____

Double Bubble Universe is Volume 1 in the TOUCHING GOD'S TOE series. It has 17 chapters and 106 sections. It includes a Series Summary, Bibliography, and Reviews. It has over 40 images, graphics, and charts. The black & white PRINT version is portable, electronic-free,

easy on the eye, lendable, impact-proof, scribble-able and dog-earable. The color EBOOK version also has text that is completely searchable and an interactive table of contents. It is hand-edited to provide 35 active e-links that amplify the data, plus over 40 color images, graphics, and charts that allow greater distinctions in data and symbolic imagery, as well as offering more aesthetic appeal. Get both!

Double Bubble Universe Katya Walter Ph. D., 2010-06 What if our universe is really a giant double bubble? The laws of physics allow it...and it also solves many puzzles in our current science. Regard the two huge bubbles of our universe. The familiar bubble above the Planck level has 3D space/1D time - or what we call spacetime. It also has matter, energy, and the known pole of gravity. Many diverse mini-minds (like ours, for instance) roam the gracious 3D space of this upper bubble. But that domain hidden below the Planck level? It has 3D time/1D space - call it timespace - plus the lost gravity pole of gravity, plus tachyonic energy. The vast energetic cloud of a single giant mind dwells down here, powered by tachyons. Its great unified mind and our tiny minds together assemble the continual chaotic flow of events that we experience - events subject to abrupt, seemingly random changes, but emerging in a nonlinear progression created by mind as much as matter. The double bubble shape is caused by a Lorenz attractor dynamic oscillating between its two basins of attraction. And that loner dimension of each domain? - 1D time in the upper bubble and 1D space in the lower? They bond at the Planck level interface to make a polarized 1D axis stretching across both domains. Due to their mirror-dimensionality, the two domains can even fit inside each other! It's as if your white glove for your right hand suddenly turns inside out to become the black glove for your left hand.

This bonds our universe into a Lorenz oscillator caught in a Klein bottle. Thus in this TOE or Theory of Everything, we live in a giant Klein bottle universe built by nonlinear chaos and influenced by mind itself, including yours.
