American Playwrights Since 1945 Philip Kolin,1989-01-23 This is a study of the state of research on and history of performances of 40 American playwrights, including major mainstream, ethnic, and regional playwrights. The essays list their published and unpublished plays, as well as their other works; document the performances; identify bibliographies, biographies, critical studies, and analyses of the plays; and discuss the critical reception. The volume deals with production histories, covering critics, actors, directors, and theater companies that have contributed as much to theater as the playwrights themselves. It also discusses original screenplays and identifies writing on younger playwrights on whom research has just begun. ISBN 0-313-25543-1: \$66.00 (For

use only in the library).

Floor Plan Manual Housing Oliver Heckmann, Friederike Schneider, 2017-10-10 The Floor Plan Manual Housing has for decades been a seminal work in the field of architecture. In its 5th, revised and expanded edition, approximately 160 international housing projects built after 1945 are documented and analyzed. The focus is on exemplary and transferrable projects, and on innovative and trendsetting concepts. The systematic representation of all projects allows the reader to compare and evaluate various floor plans – and to be inspired by the wealth of ideas and strategies for one's own design work. The introductory theoretical and historical essays have been newly written or updated, and offer a structured overview of the residential housing typology and its development.

Combinatorics, Graph Theory and Computing Frederick Hoffman, 2022-09-13 This proceedings volume gathers selected, revised papers presented at the 51st Southeastern International Conference on Combinatorics, Graph Theory and Computing (SEICCGTC 2020), held at Florida Atlantic University in Boca Raton, USA, on March 9-13, 2020. The SEICCGTC is broadly considered to be a trendsetter for other conferences around the world – many of the ideas and themes first discussed at it have subsequently been explored at other conferences and symposia. The conference has been held annually since 1970, in Baton Rouge, Louisiana and Boca Raton, Florida. Over the years, it has grown to become the major annual conference in its fields, and plays a major role in disseminating results and in fostering collaborative work. This volume is intended for the community of pure and applied mathematicians, in academia, industry and government, working in combinatorics and graph theory, as well as related areas of computer science and the interactions among these fields.

Sources of Irish Traditional Music c. 1600-1855 Aloys Fleischman, 2016-12-05 First Published in 1998. Irish traditional music is one of the richest treasuries of folk music in the world. Being an oral tradition, much of it has already been lost, and what has been recorded is only partially available in isolated collections. Until now, no composite picture has yet been presented, showing its remarkable range and diversity over four centuries. This volume covers Irish materials in general collections up to 1800 and in Irish collections up to and including Petrie's *Ancient Music of Ireland* (1855). The purposes of the project are to identify Irish dance tunes and songs; to present the scholar with a mass of material showing the evolution of the Irish vocal and instrumental folk style, period by period, from the earliest recorded tune up to the middle of the last century; to put into circulation many of the splendid airs which were lost but have now been located. Some 6,000 songs and dance tunes are presented, also including Scottish and English tunes. Included are Scottish tunes that were used by 18th-century Irish poets for their verses, and both English and Scottish tunes that are still current among Irish traditional musicians. Tunes of present-day currency which do not seem to be included may still be located by comparing their first 12 notes in the thematic index at the end of the volume. To make the vast array of material readily available, an index allows readers to locate a tune by its melodic incipit, by any of its titles, or by the first line of its text. Unfortunately, the vast majority of Irish songs noted up to the end of the last century lack texts, since the collectors were ignorant of the Irish language. But almost every other facet is covered-provenance, tonality structure, and variants.

Advances in Computer Games H. Jaap van den Herik, Hiroyuki Iida, Ernst A. Heinz, 2013-06-05 I feel privileged that the J(jh) Advances in Computer Games Conference (ACG 10) takes place in Graz, Styria, Austria. It is the first time that Austria acts as host country for this major event. The series of conferences started in

Edinburgh, Scotland in 1975 and was then held four times in England, three times in The Netherlands, and once in Germany. The ACG-10 conference in Graz is special in that it is organised together with the 11th World Computer Chess Championship (WCCC), the 5th Computer Olympiad (CO), and the European Union Youth Chess Championship. The 11th WCCC and ACG 10 take place in the Dom im Berg (Dome in the Mountain), a high-tech space with multimedia equipment, located in the Schlossberg, in the centre of the city. The help of many sponsors (large and small) is gratefully acknowledged. They will make the organisation of this conference a success. In particular, I would like to thank the European Union for designating Graz as the Cultural Capital of Europe 2003. There are 24 accepted contributions by participants from all over the world: Europe, Japan, USA, and Canada. The specific research results of the ACG 10 are expected to find their way to general applications. The results are described in the pages that follow. The international stature together with the technical importance of this conference reaffirms the mandate of the International Computer Games Association (ICGA) to represent the computer-games community.
