**Sharing Success - Owning Failure: Preparing to Command in the Twenty-First Century Air Force** Colonel Usaf David L Goldfein, USAF, David L., David Goldfein, , USAF, 2012-08-17 Command is the ultimate service. It is a time when we have the singular responsibility to create and lead strong Air Force units. A time when our passion for our Air Force and our vision for its future must be overwhelmingly clear. Early in the Developing Aerospace Leaders initiative, we began to focus on the way in which the institution teaches leadership and prepares airmen for command. What we found was a wide range of practices and a wide range of expectations - a complicating factor in today's Expeditionary Aerospace Force. We realize that preparing our officers to command effective, mission-oriented units must be a deliberate process. It must develop our unique airman perspective, creating commanders who are able to communicate the vision, have credibility in the mission area, and can lead our people with inspiration and heart. The foundation of our institution's effectiveness has always been its leaders. Colonel Goldfein's work provides valuable lessons learned and serves as a worthwhile tool to optimize your effectiveness as a squadron commander. This book is a must-read, not only for those selected to command a squadron but for all our young officers, helping them understand what the requirements of squadron command will be. Remember, command is a unique privilege - a demanding and crucial position in our Air Force. Sharing Success - Owning Failure takes you a step closer to successfully meeting that challenge.

American Military Life in the 21st Century [2 volumes] Eugenia L. Weiss, Carl Andrew Castro, 2018-11-16 A comprehensive guide to the lives and experiences of military service members, veterans, and their families in the United States today, with special emphasis given to those of the post-9/11 era. This reference work provides detailed information on the issues U.S. service members face both stateside and during deployments overseas. Issues covered include relations with family; substance use; housing; educational and job training opportunities; post-traumatic stress disorder and other health issues; and experiences of women, sexual minorities, and ethnic/racial minorities in the armed services. This set also examines major issues related to military service for people close to the men and women who serve our country, such as spouses or partners, children, and parents grappling with such issues as single parenthood during deployment and bereavement at the loss of a loved one. Finally, this set is a valuable resource for people seeking a greater understanding of the issues that confront some military service members and veterans, from chronic health problems to economic vulnerability to suicide to incarceration. The two volumes are written in a comprehensive yet succinct and accessible style by experts familiar with the latest trends and findings.

**Joint Operational Warfare** Milan N. Vego, 2009 Smallholder farmers and pastoralists fulfil an invaluable yet undervalued role in conserving biodiversity. They act as guardians of locally adapted livestock breeds that can make use of even marginal environments under tough climatic conditions and therefore are a crucial resource for food security. But in addition, by sustaining animals on natural vegetation and as part of local ecosystems, these communities also make a significant contribution to the conservation of wild biodiversity and of cultural landscapes. This publication provides a glimpse into the often intricate knowledge systems that pastoralists and smallholder farmers have developed for the management of their breeds in specific production systems and it also describes the multitude of threats and challenges these often marginalized communities have to cope with.

Mac OS X Panther for Unix Geeks Brian Jepson, Ernest Eric Rothman, 2004 With its rep for being the sort of machine that won't intimidate even the most inexperienced users, what's the appeal of the Mac® for hard-core geeks? The Mac has always been an efficient tool, pleasant to use and customize, and eminently hackable. But now with Mac OS® X's BSD core, many a Unix® developer has found it irresistible. The latest version of Mac OS X, called Panther, makes it even easier for users to delve into the underlying Unix operating system. In fact, you can port Linux® and Unix applications and run them side-by-side with your native Aqua® apps right on the Mac desktop. Still, even experienced Unix users may find themselves in surprisingly unfamiliar territory as they set out to explore Mac OS X. Even if you know Macs through and through, Mac OS X Panther is unlike earlier Macs, and it's radically different from the Unix you've used before. Enter Mac OS X Panther for Unix Geeks by Brian Jepson and Ernest E. Rothman, two Unix geeks who found themselves in the same place you are. The new edition of this book is your guide to figuring out the BSD Unix system and Panther-specific components that you may find challenging. This concise book will ease you into the Unix innards of Mac OS X Panther, covering such topics as: A quick overview of the

Terminal application, including Terminal alternatives like iTerm and GLterm Understanding Open Directory (LDAP) and NetInfo Issues related to using the GNU C Compiler (GCC) Library linking and porting Unix software An overview of Mac OS X Panther's filesystem and startup processes Creating and installing packages using Fink and Darwin Ports Building the Darwin kernel Using the Apple® X11 distribution for running X Windows® applications on top of Mac OS X The book wraps up with a quick manpage-style reference to the Missing Manual Pages --commands that come with Mac OS X Panther, although there are no manpages. If you find yourself disoriented by the new Mac environment, Mac OS X Panther for Unix Geeks will get you acclimated quickly to the foreign new areas of a familiar Unix landscape.
