Chersonesan Studies 1 Richard

Posamentir, 2012-02-02 Chersonesan Studies 1 presents the painted grave stelai of the Early Hellenistic necropolis of Chersonesos Taurike, a Greek city on the northern shore of the Black Sea. This unique collection of over one hundred objects is of major interest to students of ancient art and Greek culture. Their polychrome decoration has been extraordinarily well preserved, a rarity in the ancient world. They compose a remarkable, even unique, body of evidence of Greek funerary memorial sculpture: their shapes are gender-specific, their depicted objects are gender- and age-specific, and they can be ascribed to a handful of specific workshops. Their surprising uniformity requires an explanation, since comparable assemblages from other parts of the Greek world show substantial diversity in all these aspects. This book provides the first complete catalog and description of the stelai, together with full-color illustrations of all the significant stelai and many details. Through his painstaking recovery and reassembling of fragments, as well as the use of advanced photographic techniques, Richard Posamentir has been able to add a whole new dimension to the study of these artifacts. The volume covers the history of the stelai, analysis of the workshops, and reconstruction of the necropolis that the stelai originally graced. A comparison chapter discusses how the stelai fit into the context of Greek funerary art and provides insights into the culture and society of a city on the Black Sea.

Landscape Drawing and Painting John

O'Connor, 1978

A Corpus of Rembrandt Paintings J. Bruyn, B. Haak, S.H. Levie, P.J.J. van Thiel, E. van de Wetering, 2013-05-14 Since the second half of the last century art historians, realizing that the image of Rembrandt's work had become blurred with time, have attempted to redefine the artist's significance both as a source of inspiration to other artists and as a great artist in his own right. In order to carry on the work started by previous generations, a group of leading Dutch art historians from the university and museum world joined forces in the late 1960s in order to study afresh the paintings usually ascribed to the artist. The researchers came together in the Rembrandt Research Project which was established to provide the art world with a new standard reference work which would serve the community of art historians for the nearby and long future. They examined the originals of all works attributed to Rembrandt taking full advantage of today's sophisticated techniques including radiography, neutron activation autoradiography, dendrochronology and paint sample analysis – thereby gaining valuable insight into the genesis and condition of the paintings. The result of this meticulous research is laid down chronologically in the following Volumes: *A Corpus of Rembrandt Paintings, Volume I*, which deals with works from Rembrandt's early years in Leiden (1629-1631), published in 1982. *A Corpus of Rembrandt Paintings, Volume II*, covering his first years in Amsterdam (1631-1634), published in 1986. **THIS VOLUME: *A Corpus of Rembrandt Paintings, Volume III***, goes into his later years of reputation (1635-1642), published in 1990. Each Volume consists of a number of Introductory Chapters as well as the full Catalogue of all paintings from the given time period attributed to Rembrandt. In this catalogue each painting is discussed and examined in a detailed way, comprising a

descriptive, an interpretative and a documentary section. For the authenticity evaluation of the paintings three different categories are used to divide the works in: A. Paintings by Rembrandt, B. Paintings of which Rembrandt's authorship cannot be positively either accepted or rejected, and C. Paintings of which Rembrandt's authorship cannot be accepted. This volume (Volume III) contains 820 pages, starting of with three introductory chapters and discussing 86 paintings. In clear and accessible explanatory text all different paintings are discussed, larded with immaculate images of each painting. Details are shown where possible, as well as the results of modern day technical imaging. In this volume important paintings including the Night Watch are discussed.
