Tunnel Vision Sara Paretsky, 1994 Stubbornness has landed private eye V.I. Warshawski in big trouble at her Chicago office. With her grand old Loop building set to be razed, she's become a hold-out tenant amid frayed wiring and scary, empty corridors. Then she finds a homeless woman with three kids in the basement, and before she can rescue them, they disappear. Worst of all, she's been implicated in a murder--after the body of Deirdre Messenger, a prominent lawyer's wife, turns up sprawled across her desk. V.I., who had volunteered with Deirdre at a women's shelter, suspects her death is linked to a case of upper-class domestic abuse so slickly concealed that the police refuse to believe it. Increasingly at odds with the cops, V.I. is blindly plunging ahead after the truth. And her path may lead to corruption at the highest levels or deep into the abandoned tunnels beneath Chicago's streets, where secrets are hiding in the dark like a child's--or V.I.'s--worst nightmare.

Music in Youth Culture j. jagodzinski, 2005-08-19 Music in Youth Culture examines the fantasies of post-Oedipal youth cultures as displayed on the landscape of popular music from a post-Lacanian perspective. Jan Jagodzinski, an expert on Lacan, psychoanalysis, and education's relationship to media, maintains that a new set of signifiers is required to grasp the sliding signification of contemporary 'youth'. He discusses topics such as the figurality of noise, the perversions of the music scene by boyz/bois/boys and the hysterization of it by gurlz/girls/grrrls. Music in Youth Culture also examines the postmodern 'fan (addict)', techno music, and pop music icons. Jagodzinski raises the Lacanian question of 'an ethics of the Real' and asks educators to re-examine 'youth' culture.

**Playing Politics** Scientific American Editors,2012-10-15 Playing Politics: The Science of Elections by the Editors of Scientific American Politics makes strange bedfellows, and that becomes even more apparent when trying to analyze the science of politics. Pulling from an array of disciplines including social science, behavioral science and mathematics, Scientific American does just that in this timely eBook, Playing Politics: The Science of Elections. This anthology offers analyses of key factors in the process of electing a leader: from dissecting those qualities considered to be ideal, to how potential leaders are portrayed, to voter behavior, to the voting process - casting, collecting and counting the votes. In recent years especially, science has increasingly been at the center of controversies over voting methods, a voter's motivation, the geography of presidential elections -- including the introduction by the media of the terms red states and blue states -- even questions about the veracity and abilities of candidates. Of particular importance is the analysis of how the electoral process really works and whether it truly represents the majority's intentions of how the country should run. In addition to providing the tools to analyze the process, this ebook also addresses the top science issues of Election 2012. Scientific American partnered with ScienceDebate.org, an independent citizen's initiative, to engage the current presidential candidates - Barack Obama and Mitt Romney - to answer where they stand on 14 key science and technology policy questions facing the United

States today. This thoughtful debate, which includes questions on climate change, sustainable energy, the economy and education, caps off an essential read for concerned voters.
