The Linguistic Atlas of England Harold Orton, Stewart Sanderson, John Widdowson, 2013-11-05 This fascinating record of how English is spoken in England is now being reprinted. Over 400 maps detail differences in phonology, lexicon, morphology and syntax. The Atlas provides a unique survey of the linguistic geography of England. This volume was inspired by the English Dialect Survey which set out to elicit information about the current dialectal usages of the older members of the farming communities throughout rural England. The Survey secondly mapped this information to illustrate the regional distributions of those features of their speech which persisted from ancient times. Published after Orton's death, the publication of this volume testified to the sustained interest in the linguistic geography of England.

Exordia Seth Dickinson, 2024-01-23 Michael Crichton meets Marvel's Venom in award-winning author Seth Dickinson's science fiction debut "Viciously funny, vivid to the point of horror, and entirely profound."—Arkady Martine "Magnificent. . . . A science fiction action juggernaut."—Tamsyn Muir "Anna, I came to Earth tracking a very old story, a story that goes back to the dawn of time. It's very unlikely that you'll die right now. It wouldn't be narratively complete." Anna Sinjari—refugee, survivor of genocide, disaffected office worker—has a close encounter that reveals universe-threatening stakes. Enter Ssrin, a many-headed serpent alien who is on the run from her own past. Ssrin and Anna are inexorably, dangerously drawn to each other, and their contact reveals universe-threatening stakes. While humanity reels from disaster, Anna must join a small team of civilians, soldiers, and scientists to investigate a mysterious broadcast and unknowable horror. If they can manage to face their own demons, they just might save the world. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Highhays, Kilkenny Emma Devine, C  il  n    Drisceoil, 2022-08-09 This richly illustrated book presents the first comprehensive study of the making and marketing of pottery in medieval Ireland. Focusing on a well-preserved 14th-century pottery production center which was excavated in 2006 at Highhays, outside the walls of the renowned Anglo-Norman town of Kilkenny in south-east Ireland, the authors describe its kiln, workshops and working areas, as well as its 'Highhays Ware' products: jugs, jars, cooking-pots, money-boxes and ridge tiles. Foremost amongst the outputs from the kiln site were high-quality, wheel-thrown, green-glazed jugs that were closely modeled on French Saintonge and Bristol Redcliffe archetypes and the volume describes the distinctive processes, kiln-firing technology and raw materials that were employed to produce these, and the other wares, represented on the site. The book also presents the results of an innovative plasma spectrometry and petrological analysis of Highhays Ware, which facilitated identification of the source for the raw potting clays areas - located at a considerable distance from Highhays in north county Kilkenny - used in its production, in addition to allowing for a study of the uncharacteristically broad distribution of the ware throughout the south-east of Ireland. The authors also place the production of pottery at Highhays in its broader context by presenting an overall review of the archaeological and historical evidence for pottery making and consumption in medieval Ireland, as well as by exploring the cultural background and social status of potters in the Anglo-Norman colony. Supporting the analysis and interpretation of the Highhays site and its assemblage are specialist and scientific contributions on the pottery, tiles, ceramic production material, metal finds, coins and archaeobotanical and animal bone remains from the site, archaeomagnetic and radiocarbon dating and plasma spectrometry and petrological analysis.
