*Conservation of Modern Oil Paintings* Klaas Jan van den Berg,Ilaria Bonaduce,Aviva Burnstock,Bronwyn Ormsby,Mikkel Scharff,Leslie Carlyle,Gunnar Heydenreich,Katrien Keune,2020-02-17 Artists' oil paints have become increasingly complex and diverse in the 20th Century, applied by artists in a variety of ways. This has led to a number of issues that pose increasing difficulties to conservators and collection keepers. A deeper knowledge of the artists' intent as well as processes associated with material changes in paintings is important to conservation, which is almost always a compromise between material preservation and aesthetics. This volume represents 46 peer-reviewed papers presented at the Conference of Modern Oil Paints held in Amsterdam in 2018. The book contains a compilation of articles on oil paints and paintings in the 20th Century, partly presenting the outcome of the European JPI project 'Cleaning of Modern Oil Paints'. It is also a follow-up on 'Issues in Contemporary Oil Paint' (Springer, 2014). The chapters cover a range of themes and topics such as: patents and paint manufacturing in the 20th Century; characterization of modern-contemporary oil paints and paint surfaces; artists' materials and techniques; the artists'

voice and influence on perception of curators, conservators and scientists; model studies on paint degradation and long term stability; approaches to conservation of oil paintings; practical surface treatment and display. The book will help conservators and curators recognise problems and interpret visual changes on paintings, which in turn give a more solid basis for decisions on the treatment of these paintings.

Neger,2021-10-04 This book provides a collection of 44 simple computer and physical laboratory experiments, including some for an artist's studio and some for a kitchen, that illustrate the concepts of fractal geometry. The \$12 Million Stuffed Shark Don Thompson,2010-09-25 Why would a smart New York investment banker pay twelve million dollars for the decaying, stuffed carcass of a shark? By what alchemy does Jackson Pollock's drip painting No.5 1948 sell for \$140 million? 'The \$12 Million Dollar Stuffed Shar'k is the first book to look at the economics of the modern art world, and the marketing strategies that power the market to produce such astronomical prices. Don Thompson talks to auction houses, dealers, and collectors to find out the source of Charles Saatchi's Midas touch, and how far a gallery like White Cube has contributed to Damien Hirst becoming one of the highest-earning artists in the world.

Frank O'Hara Now Robert Hampson,Will Montgomery,2022-04-02 Frank O'Hara's writing is central to any consideration of 20th century American poetry. This collection of essays, the first to be dedicated to O'Hara in nearly two decades, asks why O'Hara remains so important to 21st century readers and writers of poetry. The book is transatlantic in tone, combining American scholarship with a wide sampling of British writers. For many, O'Hara's distinctive appeal depends on his witty depictions of urban experience, his relationship to the painters of Abstract Expressionism and the exhilarating immediacy of his poetic voice. Yet these chatty and approachable qualities coexist with a

testing engagement with currents in European and American modernism. Frank O'Hara Now offers a comprehensive picture of the poet, presenting the conversational insouciance of the writing alongside its more intransigent features.

**Basic Principles of Colloid Science** Douglas H Everett, 2007-10-31 This book provides an introduction to colloid science, based on the application of the principles of physical chemistry. Early chapters assume only an elementary knowledge of physical chemistry and provide the basis for more thorough discussion in later chapters covering specific aspects of colloid science. The widespread occurrence of colloids is stressed and the more important industrial applications of colloid technology are outlined. The final chapter deals with the future of colloid science and indicates the directions in which further developments are likely to take place. The book is ideal for undergraduate courses and, supplemented by further reading, for postgraduates too. It will also be useful to industrial research workers who wish to become familiar with the basic ideas and their many important applications to industry.

*Teaching Art* Rhian Brynjolson, 2010 This resource is written for classroom teachers, art education specialists, childcare workers, artists working in schools, parents who home-school their children, and school administrators. It can also be used as a university textbook for Education students. The book provides a framework for teaching art in a way that is integrated with regular classroom practice and mindful of current art curriculum outcomes. Although the book focuses on art for primary and middle-school students from pre-school to grade eight, *Teaching Art* is also useful to art specialists at the

high-school level who are looking for new strategies or project ideas to add to their established secondary programs. Revised and expanded from the author's previous resource, *Art & Illustration*. This resource integrates new developments in art education.

**Art and Life** Ute Ben Yosef, 2023-10-14 *Art & Life: The Story of Samuel Bak* traces the development of a child prodigy deeply shaped by the catastrophic events of the Shoah, from his early artistic influences to his years in the Vilna Ghetto and Landsberg DP Camp, his formal training in Israel and Paris, and his fruitful art career in Rome, New York, Switzerland, and Boston. Augmenting the rich existing literature on Bak, *Art & Life* explores—in thoughtful prose and through reproductions of both iconic and rarely seen work created between 1942 and 2022—how he navigated the prevailing art trends of the mid-twentieth century in search of his own pictorial language. It considers the personal, historical, and artistic currents that led Bak, now aged 90, to create an astonishing body of work that bears witness to cataclysmic events, embodies our common humanity of suffering and hope, and poses questions about the repair of the world.
