Simon du Beaumarche

The Stig Simon du Beaumarche,2012-10-25 Who is The Stig? Where did he come from? Why does he never speak? To answer these questions, award-winning biographer Simon du Beaumarche spent a year chasing The Stig and talking to those closest to him, including Jeremy Clarkson, Richard Hammond, James May and leading figures from Formula 1, music, movies and the military. What he discovered is an explosive story of intrigue, influence and a sensational conspiracy that seeks to hide the truth about one of the 21st century's greatest icons. Get behind the visor of the man, the myth, the driver, the legend, THE STIG. This book contains adult humour and some themes that may be unsuitable for children.

Driverthink Frank Miller,2009-06 Driverthink is not just another Go Slow Safe Driving guidebook. Within its pages are reality based driving tips, ideas and suggestions that can literally save your life For too long, the focus on safe driving has been to expound Politically Correct driving concepts that simply don't take into account the Reality of driving a vehicle at high speed on modern roads and highways. Otherwise responsible people don't suddenly shed their responsibility when they slip behind the wheel. But they don't often really think about their driving either. Thus the title Driverthink. In order to be responsible, safe drivers, we need to think about our driving. We need to know our machines, know our limitations, maximize our driving skills and gain driving experience as quickly as possible. Driverthink breaks new ground by exploring each of these areas in lively, entertaining detail. Drive Fast or Drive Slow - but Driverthink when you drive Driverthink is a collection of articles from the popular blog of the same name. Written in a lively and entertaining style, each of the articles explore specific driving situations or issues in detail, offering driving tips, ideas and suggestions on how to deal with the different situations. Driverthink is an excellent review for the seasoned driver and a must read for the newer, less experienced driver. Driverthink would suggest that Speed may kill, but unskilled driving can definitely kill. Does the average driver even know what over steer or under steer are? Do they know what kind of rear suspension they're driving on? Do they really understand how these most basic driving concepts will affect the handling of their vehicles - especially in an emergency situation? Driving on our roads and highways must be about reality. It is dealing with that reality that will keep us alive. Following standard issue, politically correct advice offered by those with limited skills and no appreciation for the realities of driving, simply doesn't create safer driving. Just Slow Down, might not be the best advice on a highway where even the slow lanes are doing limit plus ten. High speed rear end accidents can really ruin the day and excessively slow driving will most surely restrict traffic flow. Perhaps it's not the best advice after all Driverthink is a most serious effort by the author, to start really saving lives on our Highways and Byways. It will help you to become a much safer Driverthink driver It may even save your life.

Traffic Tom Vanderbilt,2009-08-11 Driving is a fact of life. We are all spending more and more time on the road, and traffic is an issue we face everyday. This book will make you think about it in a whole new light. We have always had a passion for cars and driving. Now Traffic offers us an exceptionally rich understanding of that passion. Vanderbilt explains why traffic jams form, outlines the unintended consequences of our attempts to engineer safety and even identifies the most common mistakes drivers make in parking lots. Based on exhaustive research and interviews with driving experts and traffic officials around the globe, Traffic gets under the hood of the quotidian activity of driving to uncover the surprisingly complex web of physical, psychological and technical factors that explain how traffic works.

Sensor-Actuator Supported Implicit Interaction in Driver Assistance Systems Andreas Riener,2011-06-07 Andreas Riener studies the influence of implicit interaction using vibro-tactile actuators as additional sensory channels for car-driver feedback and pressure sensor arrays for implicit information transmission from the driver toward the vehicle. The results of his experiments suggest the use of both vibro-tactile notifications and pressure sensor images to improve vehicle handling performance and to decrease the driver's cognitive workload.

Strange and Gaudy Fruit Jeff Nicoll,2023-05-09 The history of Christianity includes many doctrines adopted (and actions taken) to meet immediate problems but which had unintended consequences; they are bad fruit (Matt 7:15–20). The oldest is antisemitism, which arose from the competition of the early church with early Judaism. It was built into the New Testament and was developed by the church fathers. Having learned to dehumanize, it was easy to apply the same techniques to other groups; the church became complicit with enslavement, misogyny, and other forms of oppression. One response to the bad fruit is to reject religion, in the manner of Christopher Hitchens. However, the dogmas are part of our culture even if in secular form. If the roots of marginalization are not understood, they cannot be eliminated. This work uses a range of critics and defenders of traditional Western Christianity to identify poisonous fruits and detoxify them. The critical voices do not create a consensus. Nevertheless, a core can be perceived, what Erasmus called the “few truths.” Grounded in the religious tradition, they can be shared with secular people as a basis for an ethical, merciful, and respectful society. Although the history of Christianity is bloody, there are ways to go forward.

People Drive Too Slowly (Classic Reprint) Julio J. Rotemberg,2018-02-07 Excerpt from People Drive Too Slowly This paper studies the behavior of a typical driver on a freeway. This driver derives disutility both from long commutes and from unsafe ones. The paper then studies the equilibrium at which specified flows of traffic move. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
