Move to Greatness Ginny Whitelaw,2011-06-08 Your guide to the patterns of personality As a senior manager at NASA, Dr. Ginny Whitelaw had access to excellent leadership training. But like most leadership training, it taught leaders from the neck up, not deeply enough to develop the whole and balanced leaders so needed in today's complex organizations. She knew there had to be a deeper, more integrated way of developing effective leaders. There is! Move to Greatness reveals that to lead and live wholly, basic energy patterns must be brought into balance. Out of kilter, these four patterns create the ineffective butts in leadership style (great at making numbers, but hell on staff) and personal performance (successful at work, but has no life). Success and failure originate in our use (or misuse) of four fundamental patterns in the nervous system that have been studied over decades: * The Driver pushes into every barrier with speed, directness and intensity and puts a focus on priorities, actions and the bottom line. * The Organizer does the right thing with discipline and order and establishes processes, clarifies roles and assigns responsibility. * The Collaborator swings into playful engagement with life and the people in it, and as a leader, the Collaborator is oriented to customers, employees, loyalty and fun. * The Visionary goes with the flow, hangs out in the chaos, and leaps to new possibilities; the Visionary leader thinks outside the box and creates the future. Using these patterns as a map, you will understand people more easily and more deeply, and see how to lead them more effectively. Moreover, you'll learn how to move yourself to your highest potential. Discover your natural preferences and learn how to literally move yourself-and others-to greatness.

The Multisensory Driver Cristy Ho,Charles Spence,2017-05-15 Driver inattention has been identified as one of the leading causes for car accidents. The problem of distraction while driving is likely to worsen, partly due to increasingly complex in-car technologies. However, intelligent transport systems are being developed to assist drivers and to ensure a safe road environment. One approach to the design of ergonomic automobile systems is to integrate our understanding of the human information processing systems into the design process. This book aims to further the design of ergonomic multisensory interfaces using research from the fast-growing field of cognitive neuroscience. It focuses on two aspects of driver information-processing in particular: multisensory interactions and the spatial distribution of attention in driving. The *Multisensory Driver* provides interface design guidelines together with a detailed review of current cognitive neuroscience and behavioural research in multisensory human perception, which will help the development of ergonomic interfaces. The discussion on spatial attention is particularly relevant for car interface designers, but it will also appeal to cognitive psychologists interested in spatial attention and the applications of these theoretical research findings. Giving a detailed description of a cohesive series of psychophysical experiments on multisensory warning signals, conducted in both laboratory and simulator settings, this book provides an approach for those in the engineering discipline who wish to test their systems with human observers.

Caroline Cooney Pamela S. Carroll,2001 Cooney's large body of work for adolescents defies easy classification. She has written award-winning adventure, suspense, romance, family, mystery, and historical fiction, as well as action-driven horror stories and a time-travel trilogy. Her purpose in some books, most notably horror like *The Perfume*, is just to encourage reluctant readers to enjoy literature. However, in her most serious and artistic books, Cooney relies on a source that is likely to surprise her readers: biblical stories and parables. For example, readers can find the seed of the idea that eventually became *Whatever Happened to Janie* in the story of King Solomon's wisdom when he was asked to decide which of two women, both of whom claimed to be mother of an infant, should be recognized as the true mother. The parable of the Good Samaritan provides a backdrop in several of Cooney's most successful novels. Cooney's understated use of biblical stories, and the way her Christian faith subtly informs her fiction, are explored

in the book. The organization of the text reflects Cooney's major fiction categories: the Janie mysteries, romances, catastrophe novels, horror and suspense novels, the time travel trilogy, and her historical fiction. Representative books are discussed in detail within each chapter. Although most of the text is devoted to critical analysis of her literary work, and of the intersection of fiction and faith in her novels, Cooney's biography is also presented within the frame of her life as a single mother of grown children. The influences of her talents as an organist who played regularly for her church, the lessons she has learned from her children when they were teenagers, and life experiences that have led her to consider issues of race and gender, are examples of issues that are discussed. For children's and YA libraries and students of children's literature.
