Reconfigurable Computing Joao Cardoso,Michael Hübner,2011-08-17 As the complexity of modern embedded systems increases, it becomes less practical to design monolithic processing platforms. As a result, reconfigurable computing is being adopted widely for more flexible design. Reconfigurable Computers offer the spatial parallelism and fine-grained customizability of application-specific circuits with the postfabrication programmability of software. To make the most of this unique combination of performance and flexibility, designers need to be aware of both hardware and software issues. FPGA users must think not only about the gates needed to perform a computation but also about the software flow that supports the design process. The goal of this book is to help designers become comfortable with these issues, and thus be able to exploit the vast opportunities possible with reconfigurable logic.

Digital inclusion in Wales Great Britain: Parliament: House of Commons: Welsh Affairs Committee,2009-08-04 The Wales Office and the Welsh Assembly Government must ensure UK digital inclusion initiatives meet Welsh needs and build on existing good work to deliver on Welsh digital ambitions, says the Welsh Affairs Committee in a report published today. This report Digital Inclusion in Wales, examines the use of digital technologies in Wales,

highlights the urgent need for the eradication of broadband 'notspots' – areas with limited or no access to high speed internet connections – and says this issue must continue to receive priority attention. There should be more support to help a wider range of people use technology effectively. Employers told the Committee they need staff with better IT skills and more training opportunities. The Committee recommends the Welsh Assembly Government explicitly includes this issue in its digital inclusion strategy. The digital inclusion agenda is a complex mix of reserved and devolved matters. This brings a risk that key issues can be overlooked, for example no account has been taken of Welsh language speakers' needs in the Government's Digital Inclusion Action Plan. The Secretary of State for Wales must ensure that bodies in Wales across all sectors are fully engaged with initiatives and that the next stage of Digital Britain adequately reflects Welsh needs. Higher education institutions also have a vital role to play and should be involved in any new research opportunities. The Welsh Assembly already has successful digital inclusion projects in Wales and it should find a way to become fully involved with the UK digital inclusion and Digital Britain work so it does not miss out on policy developments and funding opportunities. The Committee also recommends the creation of a one-stop shop providing advice on the risks for young people using technology, and commends the Assembly's work tackling internet related crimes which it says should be promoted as part of the economic development strategy in Wales.
