But now, thanks to the Internet, businesses of all sizes have a huge new opportunity to sell both goods and services globally. Yet only 1% of all U.S. businesses export. Why? Typically, exporting begins with unsolicited inquiries from foreign customers on the web via email, website, blog, or posting on a Facebook page. People outside your country want your product, and they want it now. The problem is that most small business owners do not know how to service these inquiries. What's the best way to ship goods? Do I need a license? Should I sell through wholesalers in specific countries or directly to consumers? How will I get paid? Help is here—*Exporting* equips you with the knowledge you need to market, sell, and fulfill orders internationally, taking full advantage of the Internet and the opportunities it creates. It also imparts a can-do spirit on exporting, leading to greater revenues, stability, and profitability for your business. *Exporting: The Definitive Guide to Selling Abroad Profitably*: Lays out simple steps to conduct market research, find customers, open new markets, get paid, and ship goods and services. Melvin Greer, the founder and managing director of the Greer Institute for Leadership and Innovation in Washington, D.C., takes a fresh look at how to fill the leadership gap in this guidebook to leadership. He demonstrates ways to • rethink assumptions and myths about innovation; • develop leadership habits that lead to high performance; • develop a successful workforce and talent management strategy; and • create a modern innovation pipeline via STEM. We can no longer confine knowledge about information technology to just one department. Just as leaders need to know how to read a profit and loss statement or interpret a balance sheet, they must also understand how technology can impact business strategy. A twenty-first-century leader must understand behavioral, economic, and social shifts in order to capitalize on opportunities and achieve success. Whether you're an executive, senior manager, a new hire, a teacher, or a student, you must use twenty-first-century leadership if you want to succeed.

**The Science of Growth** Sean Ammirati, 2016-04-26 The lean entrepreneurship movement has captivated Silicon Valley and entrepreneurs across the country. It provided an agile framework to develop the right product solution for a given target market, and is now used by almost every fledgling company to do just that. The next challenge is growth - to achieve the financial returns and, more importantly, the impact they dreamed of when starting off on their adventure. Why do some companies realize the VC's goal of a 10x return on investment, while others flounder? What differentiates the companies that become part of the fabric of our lives and remain responsive, no matter how big they get from those that quickly fade? To find out, Ammirati looks at 20 different companies in pairs, who have achieved product-market fit at about the same point in history with the same general target customer—one of which has gone on to achieve real scale, while the other languished. As his research reveals, just a handful of choices—among them, who to partner with, how to finance growth, and how to use data—make all the difference in the world. With such intriguing examples as LinkedIn vs. Spoke, Facebook vs. Friendster, and McDonald's vs. White Castle, Ammirati shows the secret of the science of growth and how to cultivate it in any organization.
