Drop Mat Johnson,2010-12-15 Chris Jones has a gift for creating desire-a result of his own passionate desire to be anywhere but where he is, to be anyone but himself. Sick of the constraints of his black working-class town, he uses his knack for creating effective ad campaigns to land a dream job in London. But life soon takes a turn for the worse, and Chris finds himself back in Philly where his only job prospect is answering the phones at the electric company. Surounded by the down-and-out, Chris hits rock bottom. Only a stroke of inspiration and faith can get him back on his feet. The funny and heartfelt tale of a young black man who, in the process of trying to break free from the city he dispises, comes to terms with himself. 'Nuanced, elegant and witty' -Publishers Weekly 'A very humorous debut novel... Johnson's poetic reflections recall the work of James Baldwin....Wonderfully written.' -Library Journal

   The Half-Orphan's Handbook Joan F. Smith,2021-04-20 For fans of John Green and Emily X.R. Pan, The Half-Orphan's Handbook by Joan F. Smith is a coming-of-age story and an empathetic, authentic exploration of grief with a sharp sense of humor and a big heart. It's been three months since Lila lost her father to suicide. Since then, she's learned to protect herself from pain by following two unbreakable rules: 1. The only people who can truly hurt you are the ones you love. Therefore, love no one. 2. Stay away from liars. Liars are the worst. But when Lila's mother sends her to a summer-long grief camp, it's suddenly harder for

Lila to follow these rules. Potential new friends and an unexpected crush threaten to drag her back into life for the first time since her dad's death. On top of everything, there's more about what happened that Lila doesn't know, and facing the truth about her family will be the hardest part of learning how a broken heart can love again. Multiple-point Geostatistics Professor Gregoire Mariethoz,Jef Caers,2014-10-16 This book provides a comprehensive introduction to multiple-point geostatistics, where spatial continuity is described using training images. Multiple-point geostatistics aims at bridging the gap between physical modelling/realism and spatio-temporal stochastic modelling. The book provides an overview of this new field in three parts. Part I presents a conceptual comparison between traditional random function theory and stochastic modelling based on training images, where random function theory is not always used. Part II covers in detail various algorithms and methodologies starting from basic building blocks in statistical science and computer science. Concepts such as non-stationary and multi-variate modeling, consistency between data and model, the construction of training images and inverse modelling are treated. Part III covers three example application areas, namely, reservoir modelling, mineral resources modelling and climate model downscaling. This book will be an invaluable reference for students, researchers and practitioners of all areas of the Earth Sciences where forecasting based on spatio-temporal data is performed.
