The Comparative International Politics of Democracy Promotion Jonas Wolff, Hans-Joachim Spanger, Hans-Jürgen Puhle, 2013-09-11 Though scholarly attention to democracy promotion is increasing, there is still little comparative and theoretically-based work on the protagonists of democracy promotion. This book investigates the motives that drive democracy promotion in a comparative and theoretically oriented manner, exploring how democracy promoters deal with conflicting objectives and the factors that shape their behaviour. It also addresses the more policy-oriented debate on the contemporary challenges to democracy promotion, focusing on US and German policies towards three kinds of challenges: the emergence of 'radical' leftist governments in Bolivia and Ecuador, the political rise of Islamist movements in Turkey and Pakistan, and the consolidation of (semi-)authoritarian rule in Belarus and Russia. In each case, North-Western democracy promoters have been confronted with serious conflicts of objectives between security, economic interests and democracy promotion. The analysis and comparison of such situations in which democracy promoters have to deal with competing objectives and make tough decisions provides powerful evidence as to the factors that shape democracy promotion. *The Comparative International Politics of Democracy Promotion* will be of interest to students and scholars of international relations, comparative politics, democratization studies and foreign policy.

Department of Homeland Security Appropriations for 2011 United States. Congress. House. Committee on Appropriations. Subcommittee on Homeland Security, 2010

The Domain Name Registration System Jenny Ng, 2012-12-12 This book offers a comparative analysis of the domain name registration systems utilised in Australia and the United Kingdom. Taking an international perspective, the author analyses the global trends and dynamics of the domain name registration systems and explores the advantages and disadvantages of restrictive and less restrictive systems by addressing issues of consumer protection. The book examines the regulatory frameworks in the restrictive and unrestrictive registration systems and considers recent developments in this area. Jenny Ng also examines the legal and economic implications of these regulatory frameworks, drawing upon economic theory, regulatory and systems theory as well as applying rigorous legal analysis. In doing so, this work proposes ways in which such systems could be better designed to reflect the needs of the specific circumstances in individual jurisdictions. *The Domain Name Registration System* will be of particular interest to academics and students of IT law and e-commerce.

General Principles of European Private International Law Stefan

Leible, 2016-02-22 European private international law, as it stands in the Rome I, II, and III Regulations and the recent Succession Regulation, presents manifold risks of diverging judgments despite seemingly harmonised conflict of law rules. There is now a real danger, in light of the rapid increase in the number of legal instruments of the European Union on conflict of laws, that European private international law will become incoherent. This collection of essays by twenty noted scholars in the field sheds clear light on the pivotal issues of whether a set of overarching rules (a 'general part') is required, whether an EU regulation is the adequate legal instrument for such a purpose, which general questions such an instrument should address, and what solutions such an instrument should provide. In analysing the possible emergence of general principles in European private international law over the past years, the contributors discuss such issues and factors as the following: - the relationship between conflict of laws and recognition; - the room for party autonomy; - the concept of habitual residence; - adaptation when interplay between different laws leads to deadlock; - public policy exceptions; - the desirability of a general escape clause; - the

classic topics of characterisation, incidental question, and renvoi; and - right to appeal in case of errors in the application of foreign law. Practitioners dealing with these notoriously difficult cases will welcome this in-depth treatment of the issues, as will interested policymakers throughout the EU Member States and at the EU level itself. Scholars will discover an incomparable comparative analysis leading to expert recommendations in European private international law, opening the way to an effective European framework in this area.

Federalism and Decentralization in European Health and Social Care J. Costa-Font, S. Greer, 2016-01-12 This is the first book to examine the processes of territorial federalization and decentralization of health systems in Europe drawing from an interdisciplinary economics, public policy and political science approach. It contains key theoretical and empirical features that allow an understanding of when health care decentralization is successful.

Mediation Klaus J. Hopt, Felix Steffek, 2018-12-13 Mediation provides an attractive alternative to resolving disputes through court proceedings. Mediation promises just results in the interest of all parties concerned, a reduction of the court caseload, and cost savings for the parties involved as well as for the treasury. The European Directive on Mediation has given mediation in Europe new momentum by establishing a common framework for cross-border mediation. Beyond Europe, many states have tried in recent years to answer the question whether, and if so, how mediation should be regulated at a national and international level. The aim of this book is to promote the understanding and discussion of regulatory issues by presenting comparative research on mediation. It describes and analyses the law and practice of mediation in twenty-two countries. Europe is represented by chapters on mediation in Austria, Bulgaria, England, France, Germany, Greece, Hungary, Ireland, Italy, the Netherlands, Norway, Poland, Portugal and Spain. The world beyond Europe is analysed in chapters on mediation in Australia, Canada, China, Japan, New Zealand, Russia, Switzerland and the USA. Against this background, further chapters on fundamental issues identify possible regulatory models and discuss central principles of mediation law and practice. In particular, the work considers harmonisation and diversity in the law of mediation as well as the economic and constitutional problems associated with privatising civil justice. To the extent available, empirical research is used as a point of reference in the critical analysis.

Design Pedagogy Mr Mike Tovey, 2015-02-28 Design Pedagogy explains why it is vital that design students education helps them construct a 'passport' to enter the professional sphere. This collection explores how design education is, in itself, a passport to practice and showcase how some of the key developments in education use techniques related to collaboration, case studies and experience to motivate students, enable them to express their identity, reflect and learn.

Nerve-Driven Immunity Mia Levite, 2012-02-16 "Nerve-Driven Immunity: Neurotransmitters and Neuropeptides in the Immune System" summarizes, analyzes and sheds new light on an unrecognized, yet very important role of key neurotransmitters and neuropeptides in the immune system. Each chapter of the book deals with a different neurotransmitter/neuropeptide from the following list: Dopamine, Adrenaline, Noradrenaline, Acetylcholine, Glutamate, GABA, Somatostatin, Neuropeptide Y (NPY), Vasoactive intestinal polypeptide (VIP), Calcitonin gene related peptide (CGRP), Opioids and Cannabinoids. For each of these neurotransmitters/neuropeptides, the following four topics are discussed: The specific receptors for the neurotransmitter/neuropeptide expressed in various types of immune cells The direct effects induced by the neurotransmitter/neuropeptide in various types of immune cells (either resting or activated), and the specific immune functions and features it activates/elevates or rather inhibits in specific concentrations The production of the neurotransmitter/neuropeptide in,

and its release by, various types of immune cells The involvement of the neurotransmitter/neuropeptide in various diseases of the immune system (among them autoimmune diseases, immunodeficiency diseases and hematological cancers) The book includes many original figures, overview tables, and proposed models of events which are instrumental, enriching and stimulating for the reader. In light of the above-mentioned aspects, “Nerve-Driven Immunity: Neurotransmitters and Neuropeptides in the Immune System” is ideally suited as a textbook for new courses in Immunology, Neurology, Neuroimmunology or Pharmacology. The book chapters were written by highly skilled authors from 10 countries: the USA, the United Kingdom, Italy, Israel, Sweden, France, Germany, Spain, Serbia and Romania. “Nerve-Driven Immunity” is a term first coined by Dr. Mia Levite (the editor of the book).

Emerging Research and Treatments in Renal Cell Carcinoma Robert

Amato,2012-02-03 The field of renal cell cancer has undergone a significant resurgence. This book summarizes up-to-date research and innovative ideas for the future in this rapidly changing field, which encompasses medicine, surgery, radiation oncology, basic science, pathology, radiology, and supportive care. This book is aimed at the clinician or scientist who has an interest in renal cell cancer, whether they are academic or nonacademic. The book covers tumor biology, molecular biology, surgery techniques, radiation therapy, personal testimonies, and present and future treatments of the disease that are on the horizon. The goal was to produce a textbook that would act as an authoritative source for scientists and clinicians and interpret the field for trainees in surgery, medicine, radiation oncology, and pathology.

Freshwater Pollution and Aquatic Ecosystems Gowhar Hamid Dar,Khalid Rehman

Hakeem,Mohammad Aneesul Mehmood,Humaira Qadri,2021-12-23 This new volume addresses the environmental impacts of pollution on freshwater aquatic ecosystems and presents sustainable management and remediation practices and advanced technology help to address the different types of pollutants. Freshwater Pollution and Aquatic Ecosystems: Environmental Impact and Sustainable Management considers the need for sustainable, efficient, and cost-effective tools and technologies to assess, monitor, and properly manage the increasing issues of aquatic pollution. It provides detailed accounts of the phenomena and mechanisms related to aquatic pollution and highlights the problems and threats associated with pollution contamination in freshwater. It provides useful insight into the sustainable and advanced pollution remediation technology adopted by different countries for the monitoring, assessment, and sustainable management of pollution. The chapters in the volume evaluate the sources of harmful pollutants, which include industrial effluents, sewage, and runoff from agricultural industries, which result in toxic microbes, organic waste, oils, and high load of nutrients. Unsustainable management practices of domestic sewage and indiscriminate use of chemical pesticides lead to the technological disturbance of aquatic biota. In addition to harming aquatic biota, these pollutants find their way into the human body through inhalation, ingestion, or absorption and finally tend to bio-accumulate in trophic levels of the food chain, which poses a major risk to human beings. This book will be a valuable resource for ecologists, environmentalists, scientists, and many others for their work in understanding and management of aquatic pollutants in freshwater biospheres.

Innovation in Financial Services Anne-Laure Mention,Marko Torkkeli,2014-10-21

This book gathers together some of the most up-to-date thinking in the growing field of innovation in services and more particularly, in financial services. It explores the peculiarities of innovation in financial services firms and surrounding market players, discusses the open nature of the innovation process, and analyses its success factors and

its interplay with strategy and performance. This book provides topical insights on the challenges facing the financial industry, such as the convergence with other sectors, and the increasing regulatory burden. By combining multidisciplinary approaches and by selecting a number of cutting-edge research models, theories, empirical findings and practitioners' insights, it offers unique, contemporary and multidimensional perspectives on innovation for a sector of paramount importance for the running of economies around the world. This book comes at a time of turbulence, uncertainty and within an industry in need of vision and strategic foresight. By synthesizing multiple views from academia and practice, it opens the agenda and contributes to the on-going debate of redefining the multi-polar role of innovation in the financial industry.

Citizenship Beyond Nationality Luicy Pedroza, 2019-07-26 In *Citizenship Beyond Nationality*, Luicy Pedroza considers immigrants who have settled in democracies and who live indistinguishably from citizens—working, paying taxes, making social contributions, and attending schools—yet lack the status, gained either through birthright or naturalization, that would give them full electoral rights. Referring to this population as denizens, Pedroza asks what happens to the idea of democracy when a substantial part of the resident population is unable to vote? Her aim is to understand how societies justify giving or denying electoral rights to denizens. Pedroza undertakes a comparative examination of the processes by which denizen enfranchisement reforms occur in democracies around the world in order to understand why and in what ways they differ. The first part of the book surveys a wide variety of reforms, demonstrating that they occur across polities that have diverse naturalization rules and proportions of denizens. The second part explores denizen enfranchisement reforms as a matter of politics, focusing on the ways in which proposals for reform were introduced, debated, decided, and reintroduced in two important cases: Germany and Portugal. Further comparing Germany and Portugal to long familiar cases, she reveals how denizen enfranchisement processes come to have a limited scope, or to even fail, and yet reignite. In the final part, Pedroza connects her theoretical and empirical arguments to larger debates on citizenship and migration. *Citizenship Beyond Nationality* argues that the success and type of denizen enfranchisement reforms rely on how the matter is debated by key political actors and demonstrates that, when framed ambitiously and in inclusive terms, these deliberations have the potential to redefine democratic citizenship not only as a status but as a matter of politics and policy.

Proceedings of the Danish Institute at Athens Rune Frederiksen, Søren Handberg, Kristina Winther Jacobsen, 2017-05-04

Executive Secrecy and Democratic Politics Dorothee Riese, 2023-05-26 This book investigates the parliamentary negotiation of executive secrecy. Parliaments depend on information to fulfil their roles as the people's representatives, legislators and overseers of the executive. However, there are examples of executive secrecy across all policy fields. How, then, do parliamentary actors try to reconcile secrecy and the normative demands of an open, democratic society? This volume analyses parliamentary arguments, conflicts and patterns of agreement around this topic in the case of Germany. Based on two case studies – intelligence agencies secrecy and Public Private Partnership secrecy – it argues that substantive justifications of secrecy focusing on necessity are highly contested. By contrast, procedural legitimization of secrecy, namely deciding about it democratically, is crucial. Still, there are inherent limits to the legitimization of executive secrecy. The book therefore underlines the fragility of secrecy's legitimization, and its need for constant actualisation.

Intellectual Property Rights Sakthivel Lakshmana Prabu, Suriyaprakash TNK, Eduardo Jacob-Lopes, Leila Queiroz Zepka, 2020-09-30 This edited volume, *Intellectual Property Rights – Patent*, is a collection of reviewed and relevant research chapters, offering a comprehensive overview of recent developments in the field of patents and its issues. The book comprises chapters authored by various researchers and edited by experts active in

the pharmaceutical research area. All chapters are complete in itself but united under a common research study topic. This publication aims to provide a thorough overview of the latest research efforts on patenting and the related issues for legal experts and the scientific community and open new possible research paths for further novel developments.

The European Private Company - Societas Privata Europaea (SPE) Heribert Hirte, Christoph Teichmann, 2013-01-01 The planned European legal form Societas Privata Europaea (SPE) is a limited liability company of a closed group of shareholders, and thus is comparable to the German GmbH. At the European-level, the SPE serves as a supplement to the European Limited Liability Company (SE), which proved to be too difficult for small and medium-sized companies for various reasons. The SPE will be introduced on the basis of a European regulation, the content of which has been largely agreed to by the member states.

Effective Interventions for Unemployed Young People in Europe Tomáš Sirovátka, Henk Spies, 2017-07-28 Young people in Europe have been disproportionately affected by unemployment as a result of the economic crisis and a large number of the most disadvantaged are migrant youth, or those of a different ethnic origin, living in deprived city neighbourhoods. This book examines the need for more appropriate interventions aimed at improving the inclusion of young people in the labour market, bringing together theoretical reflections and empirical evidence on emerging innovative policies and practices. Using case studies from across Europe, it asks how effectively innovative interventions respond to the specific needs, motivations, aspirations and strategies of unemployed and vulnerable youth within the contextual conditions of the welfare state and locality. It also provides a new theory of the effectiveness of interventions. As social exclusion remains high among young people in Europe, Effective Interventions for Unemployed Young People in Europe is essential reading for policymakers and practitioners. This book demonstrates where we can look for effective innovative interventions and how these can potentially add up to large-scale social innovation. It is also a crucial resource for academics and students interested in social and labour inclusion measures.
