This first detailed archaeological study of a railway illuminates parallels located elsewhere in Britain. Developments that were to be of world importance. Did iron railway bridges exist before George Stephenson? This book shows that such bridges were built in south Wales thirty years before the construction of Stephenson's Gaunless Viaduct on the Stockton and Darlington Railway and explains where to see these bridges today. Numerous stone viaducts, bridges and causeways were built over gorges. Monumental building detail existed years before the Euston Arch. Even the foundations of American Industrial might were laid here. I Drum, Therefore I Am Gareth Dylan Smith,2016-05-13 Despite their central role in many forms of music-making, drummers have been largely neglected in the scholarly literature on music and education. But kit drummers are increasingly difficult to ignore. While exponents of the drum kit are frequently mocked in popular culture, they are also widely acknowledged to be central to the musical success and aesthetic appeal of any musical ensemble in which they are found. Drummers are also making their presence felt in music education, with increasing opportunities to learn their craft in formal contexts. Drawing on data collected from in-depth interviews and questionnaires, Gareth Dylan Smith explores the identities, practices and learning of teenage and adult kit drummers in and around London. As a London-based drummer and teacher of drummers, Smith uses his own identity as participant-researcher to inform and interpret other drummers' accounts of their experiences. Drummers learn in multi-modal ways, usually with a keen awareness of exemplars of their art and craft. The world of kit drumming is highly masculine, which presents opportunities and challenges to drummers of both sexes. Smith proposes a new model of the 'Snowball Self', which incorporates the constructs of identity realization, learning realization, meta-identities and contextual identities. Kit drummers' identities, practices and learning are found to be intertwined, as drummers exist in a web of interdependence. Drummers drum; therefore they are, they do, and they learn - in a rich tapestry of means and contexts.
