Programs and Manifestoes on 20th-Century Architecture Ulrich Conrads,1975-11-15 The present volume offers eloquent testimony that many of the master builders of this century have held passionate convictions regarding the philosophic and social basis of their art. Nearly every important development in the modern architectural movement began with the proclamation of these convictions in the form of a program or manifesto. The most influential of these are collected here in chronological order from 1903 to 1963. Taken together, they constitute a subjective history of modern architecture; compared with one another, their great diversity of style reveals in many cases the basic differences of attitude and temperament that produced a corresponding divergence in architectural style. In point of view, the book covers the aesthetic spectrum from right to left; from programs that rigidly generate designs down to the smallest detail to revolutionary manifestoes that call for anarchy in building form and town plan. The documents, placed in context by the editor, are also international in their range: among them are the seminal and prophetic statements of Henry van de Velde, Adolf Loos, and Bruno Taut from the early years of the century; Frank Lloyd Wright's 1910 annunciation of Organic Architecture; Gropius's original program for the Bauhaus, founded in Weimar in 1919; Towards a New Architecture, Guiding Principles by Le Corbusier; the formulation by Naum Gabo and Antoine Pevsner of the basic principles of Constructivism; and articles by R. Buckminster Fuller on universal architecture and the architect as world planner. Other pronouncements, some in flamboyant style, including those of Erich Mendelsohn, Hannes Meyer, Theo van Doesburg, Oskar Schlemmer, Ludwig Mies van der Rohe, El Lissitzky, and Louis I. Kahn. There are also a number of collective or group statements, issued in the name of movements such as CIAM, De Stijl, ABC, the Situationists, and GEAM. Since the dramatic effectiveness of the manifesto form is usually heightened by brevity and conciseness, it has been possible to reproduce most of the documents in their entirety; only a few have been excerpted.

Connections Jay Kappraff,2001 The first edition of Connections was chosen by the National Association of Publishers (USA) as the best book in OC Mathematics, Chemistry, and Astronomy OCo Professional and ReferenceOCO in 1991. It has been a comprehensive reference in design science, bringing together in a single volume material from the areas of proportion in architecture and design, tilings and patterns, polyhedra, and symmetry. The book presents both theory and practice and has more than 750 illustrations. It is suitable for research in a variety of fields and as an aid to teaching a course in the mathematics of design. It has been influential in stimulating the burgeoning interest in the relationship between mathematics and design. In the second edition there are five new sections, supplementary, as well as a new preface describing the advances in design science since the publication of the first edition. Contents: Proportion in Architecture; Similarity; The Golden Mean; Graphs; Tilings with Polygons; Two-Dimensional Networks and Lattices; Polyhedra: Platonic Solids; Transformation of the Platonic Solids I; Transformation of the Platonic Solids II; Polyhedra: Space Filling; Isometries and Mirrors; Symmetry of the Plane. Readership: Polytechnic students, architects, designers, mathematicians and general readers.

Recent Advances in the Diagnosis and Management of Plant Diseases L.P. Awasthi,2015-11-19 This book is a compilation of the most challenging and significant chapters on the diagnosis and management of important bacterial, fungal, viral, viroid, phytoplasma, non parasitic diseases and various physiological disorders, in various crops. The chapters have been contributed by eminent plant pathologists, having wide experience of teaching and research on various crops with different types of diseases, which cause great economic losses. The book would be very useful for students, teachers and researchers of plant pathology. This book highlights recent advances made in the development of new types of resistance in host plants and alternative strategies for managing plant diseases to improve food quality and reduce the negative public health impact associated with plant diseases. Having entered into 21st century advancements in the Diagnosis of Plant Pathogens and Plant Disease Management need to be closely examined and adequately applied, so that newer challenges facing plant pathology could be adequately addressed in attaining food security for the growing population. Substantial advancements have been made in terms of expanding knowledge base of the biology of plant-microbial interactions, disease management strategies and application and practice of Plant Pathology. Application of molecular biology in Plant Pathology has greatly improved our ability to detect plant pathogens and in increasing our understanding, their ecology and epidemiology. Similarly, new technologies and resources have been evolved for the development of sustainable crop protection systems by different control strategies against various pests and pathogens that are important components of the integrated pest management programme. Natural products and chemical compounds discovered as a result of basic research and molecular mechanisms of pathogenesis have led to the development of “biorational” pesticides. Biological control has been found to be the most significant approach to plant health management during the twentieth century and promises using modern biotechnology, to be even more significant in the twenty-first century.

The Munda Languages Gregory D.S. Anderson,2015-04-08 The Munda group of languages of the Austroasiatic family are spoken within central and eastern India by almost ten million people. To date, they are the least well-known and least documented languages of the Indian subcontinent. This unprecedented and original work draws together a distinguished group of international experts in the field of Munda language research and presents current assessments of a wide range of typological and comparative-historical issues, providing agendas for future research. Representing the current state of Munda Linguistics, this volume provides detailed descriptions of almost all of the languages in the family, in addition to a brief chapter discussing the enigmatic Nihali language.

Believe in People Charles Koch,Brian Hooks,2020-11-17 A surprising take on how you can help tackle the really big problems in society—from one of America’s most successful entrepreneurs. People are looking for a better way. Towering barriers are holding millions of people back, and the institutions that should help everyone rise are not doing the job. Crumbling communities. One-size fits all education. Businesses that rig the economy. Public policy that stifles opportunity and emboldens the extremes. As a result, this country is quickly heading toward a two-tiered society. Today’s challenges call for nothing short of a paradigm shift – away from a top-down approach that sees people as problems to be managed, toward bottom-up solutions that empower everyone to realize their potential and foster a more inclusive society. Such a shift starts by asking: What would it mean to truly believe in people? Businessman and philanthropist Charles Koch has devoted his life to answering that question. Learn what he’s discovered during his 60-year career to help you apply the principles

of empowerment in your life, in your business, and in society. By learning from the social movements and applying the principles that have enabled social progress throughout history, Koch has achieved more than he dreamed possible – building one of the world’s most successful companies and founding Stand Together, one of America’s most innovative philanthropic communities. Stand Together CEO Brian Hooks and Koch show how the only way to solve the really big problems – from poverty and addiction to harmful business practices and destructive public policy – is for each and every one of us to find and take action in our unique role as part of the solution. Full of compelling examples of what works – including several first-person accounts from individuals whose lives have been transformed – Koch and Hooks’ refreshing approach promotes partnership instead of partisanship and speaks to people from different perspectives and all walks of life. They show that no injustice is too tough to overcome if you share a deep belief in people, are willing to unite with anyone to do right, and work to empower others from the bottom up.

The Nvivo Qualitative Project Book Patricia Bazeley,Lyn Richards,2000-10-13 `A great basic book, which can be used by the novice qualitative researcher. The advice is friendly, almost folksy with clear conceptual explanation of how the program works. A very welcome contribution to this field' - Martha Ann Carey, Albert Einstein College of Medicine, New York `Qualitative researchers continue to be criticized because they rely too much on their own interpretations and avoid analytical and theoretical issues. This book provides ways to integrate the thinking about a project and the data you have with practical ways that the software can facilitate the process. I recommend it for both the new user as well as the experienced one' - Marilyn Lichtman, Forum for Qualitative Social Research - follow the link below to read the complete review This book invites readers to learn how to use qualitative data analysis software in the context of doing their research project. The reader follows basic steps for creating and conducting a real project with real data, using the new-generation software package, QSR NVivo. The software tools are introduced only as needed and explained in the framework of what is being asked. The reader is the craftsperson, trialling those tools in the processes of getting started, tentative interpretation, drawing links, shaping data, and seeking and establishing explanations and theories. The NVivo Qualitative Project Book allows the researcher to work through their own project, or work with data provided from a real project. The authors draw on decades of experience of research and training researchers around the world, and take the reader through each step in a style combining informality and authority, with frequent tips and reflections on what is being done. Demonstration software is provided on the enclosed CD-ROM, with data to help create (a researcher's project) a project about researchers and researching, and with multiple stages arranged sequentially in the development of a real project. As a practical tool to help researchers understand qualitative data analysis software using NVivo, and a guide through the sometimes complex processes of doing a research project, this book will be invaluable reading for researchers and students undertaking qualitative research. Pat Bazeley provides training and consulting services in research design and data analysis through her company, Research Support. Lyn Richards is Director of Research Services at Qualitative Solutions and Research, the developers of NUD·IST and NVivo software. NVivo is distributed by Scolari, SAGE Publications Software.
