The Wagon and Other Stories from the City Martin Preib,2010-04-15 Martin Preib is an officer in the Chicago Police Department—a beat cop whose first assignment as a rookie policeman was working on the wagon that picks up the dead. Inspired by Preib’s daily life on the job, *The Wagon and Other Stories from the City* chronicles the outer and inner lives of both a Chicago cop and the city itself. The book follows Preib as he transports body bags, forges an unlikely connection with his female partner, trains a younger officer, and finds himself among people long forgotten—or rendered invisible—by the rest of society. Preib recounts how he navigates the tenuous labyrinths of race and class in the urban metropolis, such as a domestic disturbance call involving a gang member and his abused girlfriend or a run-in with a group of drunk yuppies. As he encounters the real and imagined geographies of Chicago, the city reveals itself to be not just a backdrop, but a central force in his narrative of life and death. Preib’s accounts, all told in his breathtaking prose, come alive in ways that readers will long remember.

Proceedings of the 1st Vietnam Symposium on Advances in Offshore Engineering M.F. Randolph,Dinh Hong Doan,Anh Minh Tang,Man Bui, Van Nguyen Dinh,2018-09-24 These proceedings gather a selection of refereed papers presented at the 1st Vietnam Symposium on Advances in Offshore Engineering (VS0E 2018), held on 1–3 November 2018 in Hanoi, Vietnam. The contributions from researchers, practitioners, policymakers, and entrepreneurs address technological and policy changes intended to promote renewable energies, and to generate business opportunities in oil and gas and offshore renewable energy. With a special focus on energy and geotechnics, the book brings together the latest

lessons learned in offshore engineering, technological innovations, cost-effective and safer foundations and structural solutions, environmental protection, hazards, vulnerability, and risk management. The book offers a valuable resource for all graduate students, researchers and industrial practitioners working in the fields of offshore engineering and renewable energies.

Accountable Care Organizations Robert James Cimasi, 2013-06-05 An accountable care organization (ACO) is a healthcare organization characterized by a payment and care delivery model that seeks to tie provider reimbursements to quality metrics and reductions in the total cost of care for an assigned group of patients. Accountable Care Organizations: Value Metrics and Capital Formation explores the historical background and evolution of the ACO model as the basis for the development of the value metrics and capital formation analyses that are foundational to assessing the current efficacy and capacity for change. The book examines the four pillars of value in the healthcare industry: regulatory, reimbursement, competition, and technology in addressing the value metrics of ACOs, including requirements for capital formation, financial feasibility, and economic returns. It focuses the discussion of non-monetary value on a review of aspects of population health within the context of such objectives as improved quality outcomes and access to care. Explains why ACOs might be the cost-containment and quality improvement answer the industry has been looking for Describes the circumstances and capital structures where ACOs represent a sound investment Includes a foreword by Peter A. Pavarini, Esq. The book examines the positive externalities of the ACO model, including results for third parties outside the basic construct of the ACO contracts shared savings payments. It also discusses the potential role and opportunities for consultants in assisting their provider clients in the consideration, development, implementation, and operation of an ACO.
