The Shoestring Library Sheryl Kindle Fullner,2010-03-23 An organized collection of budget saving methods, materials, and strategies, these tips are all tried-and-true examples of ways to stretch the media specialist's budget and time, and change even the drabest library into an inviting oasis of learning. The Shoestring Library offers hope, incentive, and direction to librarians who lack everything but passion. The book is organized around 300 hints—more than 114 of which are green alternatives—for administering a library in tough times. The book is divided into two parts, Support Functions and Physical Plant. The support section investigates such topics as how to best use volunteers and how to get free materials for your library. The physical plant section, amply supplemented with dozens of photos, helps a librarian identify and fix problems with dismal walls, ceilings, windows, shelving, desks, seating, and lighting, proposing low-cost or no-cost solutions to all these woes. Instructions are practical and thorough, concentrating on reuse, re-purposing, and recycling, and each idea is reversible. For quick access, chapters sport distinctive icons; time-management tips, for example, are distinguished by an alarm clock. Designed for institutions from preschools through college, The Shoestring Library proves that there is no expiration date on learning.

Colour Films in Britain Sarah Street,2019-07-25 How did the coming of colour change the British film industry? Unlike sound, the arrival of colour did not revolutionise the industry overnight. For British film-makers and enthusiasts, colour was a controversial topic. While it was greeted by some as an exciting development – with scope for developing a uniquely British aesthetic – others were deeply concerned. How would audiences accustomed to seeing black-and-white films – which were commonly regarded as being superior to their garish colour counterparts – react? Yet despite this initial trepidation, colour captivated many British inventors and film-makers. Using different colour processes, these innovators produced films that demonstrated remarkable experimentation and quality. Sarah Street's illuminating study is the first to trace the history of colour in British cinema, and analyses the use of colour in a range of films, both fiction and non-fiction, including *The Open Road*, *The Glorious Adventure*, *This is Colour*, *Blithe Spirit*, *This Happy Breed*, *Black Narcissus*, *The Red Shoes*, *The Tales of Hoffmann* and *Moulin Rouge*. Beautifully illustrated with full colour film stills, this important study provides fascinating insights into the complex process whereby the challenges and opportunities of new technologies are negotiated within creative practice. The book also includes a Technical Appendix by Simon Brown (Kingston University, UK), which provides further details of the range of colour processes used by British film-makers.

Details include music formats and publishing, music identification and discoverability, the context of music collections and the tasks involved in building and scoping them, diversity and inclusion in music collections, budgets and acquisitions workflows, pre- and post-order tasks, collection management and assessment, and future directions for collection development in music. With its focus on issues related to music scores and media in physical and electronic forms, *Music Collection Development and Management in the Digital Age* directly addresses subject librarians who select music materials in academic libraries. The volume also serves music librarians in other settings, such as public and conservatory libraries. All in all, *Music Collection Development and Management in the Digital Age* is an essential reference for all who work with music collections, whether in music libraries specifically, general library collections with music holdings, or centralized library acquisitions departments.

SCHOOL LIBRARIES OF 21st CENTURY (A study of Kendriya Vidyalayas) Dr. K. Ramasamy,2021-01-02 1.1 Preamble Schools are the production centres endowed with the noble responsibility of producing learned, civilized and worthy citizens of a country Every school has its own plan of action with a set of well-designed curriculum objectives. The aim of the school is not just academic achievement of the students, rather the development of overall personality of them. And so, emphasis is being given on scholastic, co-scholastic and non-scholastic skills of the students. Libraries in the schools are the strong supporting centres which supplement and complement the accomplishment of the objectives set forth by their parental bodies. They are the knowledge facilitation points in every school. According to the U.S. Commission on Libraries and Information Science (2005), “Students in schools with good school libraries learn more, get better grades, and score higher on standardized test scores”(p.4). As Ranganthan(1962) quoted ‘ The result of modern re-thinking on education is to make the library the heart of the school, from which every activity in the school radiates and by which it all gets irradiated’. International Association of School Librarianship (IASL) Policy statement on school libraries remarks that the school library is essential to the development of the human personality as well as the spiritual, moral, social, cultural and economic progress of the community(p.1).

From Boardbook to Facebook Adele M. Fasick,2011-07-13 Discover new approaches for extending children's library services beyond the library building and learn how to utilize technology to bring learning to children wherever they may be. The ways in which we communicate, learn, and interact have changed drastically in the last decade, and this worldwide revolution applies to the youngest members of society as well. Today's books and learning materials are being presented and used in new and different ways. From the toddler's first boardbooks to the young teen's conversations on Facebook, children are interacting with print and media rather than passively listening or viewing. Libraries can contribute to this interactive world by inviting children to take an active role in their library collection and library service experiences. This book examines the impact of new technologies on children's experiences of books and libraries, and demonstrates how librarians can adapt to new technologies and integrate library services into the lives of today's children. From Boardbook to Facebook: Children's Services in an Interactive Age draws on current research to illuminate how children's use of media has changed in recent years and suggests ways in which new technologies can be integrated into library services now and in the future.
