Revolutionary Bodies Emily Wilcox,2018-10-23 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Revolutionary Bodies is the first English-language primary source-based history of concert dance in the People's Republic of China. Combining over a decade of ethnographic and archival research, Emily Wilcox analyzes major dance works by Chinese choreographers staged over an eighty-year period from 1935 to 2015. Using previously unexamined film footage, photographic documentation, performance programs, and other historical and contemporary sources, Wilcox challenges the commonly accepted view that Soviet-inspired revolutionary ballets are the primary legacy of the socialist era in China's dance field. The digital edition of this title includes nineteen embedded videos of selected dance works discussed by the author.

Laser Technology in Biomimetics Volker Schmidt,Maria Regina Belegatis,2016-08-23 Lasers are progressively more used as versatile tools for fabrication purposes. The wide range of available powers, wavelengths, operation modes, repetition rates etc. facilitate the processing of a large spectrum of materials at exceptional precision and quality. Hence, manifold methods were established in the past and novel methods are continuously under development. Biomimetics, the translation from nature-inspired principles to technical applications, is strongly multidisciplinary. This field offers intrinsically a wide scope of applications for laser based methods regarding structuring and modification of materials. This book is dedicated to laser fabrication methods in biomimetics. It introduces both, a laser technology as well as an application focused approach. The book covers the most important laser lithographic methods and various biomimetics application scenarios ranging from coatings and biotechnology to construction, medical applications and photonics.

Among Schoolchildren Tracy Kidder,1989-09-06 The Pulitzer Prize-winning author's classic, "brilliantly illuminated" account of education in America (TheNew York Times Book Review). Mrs. Zajac is feisty, funny, and tough. She likes to call herself an "old-lady teacher." (She is thirty-four.) Around Kelly School, she is infamous for her discipline: "She is mean, bro," says one of her students. But children love her, and so will the reader of this extraordinarily moving book by the Pulitzer Prize-winning author of House and The Soul of a New Machine. Tracy Kidder spent nine months in Mrs. Zajac's fifth-grade classroom in a depressed area of Holyoke, Massachusetts. Living among the twenty schoolchildren and their indomitable teacher, he shared their joys, catastrophes, and small but essential triumphs. His resulting New York Times bestseller is a revelatory and

remarkably poignant account of an inner-city school that “erupts with passionate life,” and a close-up examination of what is wrong—and right—with education in America (USA Today). “More than a book about needy children and a valiant teacher; it is full of the author’s genuine love, delight and celebration of the human condition. He has never used his talent so well.” —The New York Times

Cholangiocarcinoma Dario Ribero,Timothy M. Pawlik,2015 Cholangiocarcinoma is a heterogeneous group of neoplasms, which has a rising worldwide incidence. Therefore, it is now a major cause of cancer mortality. Diagnosis, staging, treatment approaches and outcomes differ significantly based on the location of the tumor. Given the challenges of remaining up-to-date in a rapidly expanding field, the aim of this monograph is to provide a comprehensive, fully referenced presentation of the state-of-the-art medical and surgical aspects relevant to the management of cholangiocarcinoma divided by the site of origin (i.e. intrahepatic, hilar and distal). The division of the book into these sections reflects the biological and clinical differences between these tumor types and will permit the authors to address the diagnostic, interventional or treatment issues specific to each tumor type. By presenting all medical and surgical aspects of cholangiocarcinoma in a systematic manner, this monograph will be a ready-to-use instrument for those interested in cholangiocarcinoma, including practicing physicians, residents, fellows and specialists. A list of 66 world-renowned experts contributed to the book, offering the readers the unique opportunity to have a broad perspective on these diseases, practical indications on patient selection and treatment that can be easily applied to both Eastern and Western clinical settings.
