End to End Performance Management on IBM i Hernando Bedoya, Mark Roy, Nandoo Neerukonda, Petri Nuutinen, IBM Redbooks, 2009-11-23 Monitoring and managing your system's performance is critical to ensure that you are keeping pace with the changing demands of your business. To respond to business changes effectively, your system must change too. Managing your system, at first glance, might seem like just another time-consuming job. But the investment soon pays off because the system runs more efficiently, and this is reflected in your business. It is efficient because changes are planned and managed. Managing performance of any system can be a complex task that requires a thorough understanding of that system's hardware and software. IBM® i is an industry leader in the area of performance management and has many qualities that are not found in other systems, such as: - Unparalleled performance metrics - Always-on collection of metrics - Graphical investigation of performance data While understanding all the different processes that affect system performance can be challenging and resolving performance problems requires the effective use of a large suite of tools, the functions offered by IBM i are intended to make this job easier for users. This IBM Redbooks® publication explains the tasks and rich tools associated with performance management on IBM i.

Surface-Enhanced Vibrational Spectroscopy Ricardo Aroca, 2006-05-01 Surface Enhanced Vibrational Spectroscopy (SEVS) has reached maturity as an analytical technique, but until now there has been no single work that describes the theory and experiments of SEVS. This book combines the two important techniques of surface-enhanced Raman scattering (SERS) and surface-enhanced infrared (SEIR) into one text that serves as the definitive resource on SEVS. Discusses both the theory and the applications of SEVS and provides an up-to-date study of the state of the art

Offers interpretations of SEVS spectra for practicing analysts Discusses interpretation of SEVS spectra, which can often be very different to the non-enhanced spectrum - aids the practicing analyst

Microsupercapacitors Kazufumi Kobashi, Karolina Laszczyk, 2021-10-01 Microsupercapacitors systematically guides the reader through the key materials, characterization techniques, performance factors and potential applications and benefits to society of this emerging electrical energy storage solution. The book reviews the technical challenges in scaling down supercapacitors, covering materials, performance, design and applications perspectives. Sections provide a fundamental understanding of microsupercapacitors and compare them to existing energy storage technologies. Final discussions consider the factors that impact performance, potential tactics to improve performance, barriers to implementation, emerging solutions to those barriers, and a future outlook. This book will be of particular interest to materials scientists and engineers working in academia, research and development. Provides a concise introduction of the fundamental science, related technological challenges, and solutions that microsupercapacitors can offer Compares microsupercapacitors with current technologies Reviews the applications of new strategies and the challenge of scaling down supercapacitors Covers the most relevant applications, including energy storage, energy harvesting, sensors and biomedical devices

UX Storytellers - Connecting the Dots ,

Made to Serve Timothy Baines, Howard Lightfoot, 2013-04-09 A comprehensive, practical introduction to one of the most important new trends in manufacturing, globally The delivery of a service component as an added value when providing products, servitization is all the rage in the manufacturing sector around the world. Yet, despite the clear competitive advantage of servitization, most manufacturers remain reluctant to venture into, what for them, is a strange new world. Written

by a team of internationally respected servitization experts and innovators, this book provides you with a detailed road map for successfully navigating the servitization terrain. Unlike most authors on the subject who merely sing the praises of servitization, Baines and Lightfoot provide you with a framework for assessing the feasibility of adopting a services-led competitive strategy in your company, along with strategies for designing and implementing the kinds of service offerings customers increasingly are coming to expect. Grounded in real-world practice and supported by a wealth of up-to-the minute research, this book helps ease the way for manufacturers considering adopting a servitization model Shows how to exploit your company's manufacturing competencies to build a strong servitization element without becoming just another services company Provides numerous illustrations and examples of services-led competitive strategies, with an emphasis on the advanced services most widely associated with servitization worldwide Packed with fascinating and instructive case studies from leading manufacturing firms across industry sectors, including Caterpillar, Rolls-Royce, Alstom, MAN, Xerox and others

American Machinists' Handbook and Dictionary of Shop Terms Fred H. Colvin, Frank A. Stanley, 2020-03-25 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

Metal Nanoparticles and Clusters Francis Leonard Deepak, 2017-11-17 This book covers the continually expanding field of metal nanoparticles and clusters, in particular their size-dependent properties and quantum phenomena. The approaches to the organization of atoms that form clusters

and nanoparticles have been advancing rapidly in recent times. These advancements are described through a combination of experimental and computational approaches and are covered in detail by the authors. Recent highlights of the various emerging properties and applications ranging from plasmonics to catalysis are showcased.

Mobilizing the Russian Nation Melissa Kirschke Stockdale, 2016-12-13 This study of Russian mobilization in the Great War explores how the war shaped national identity and conceptions of citizenship.

Mapping between X.400 (1988)/ISO 10021 and RFC 822 Steve Hardcastle-Kille, 1992 Describes a set of mappings which will enable interworking between systems operating the CCITT X.400 (1988) Recommendations on Message Handling Systems / ISO IEC 10021 Message Oriented Text Interchange Systems (MOTIS) [CCITT/ISO88a], and systems using the RFC 822 mail protocol [Crocker82a] or protocols derived from RFC 822. Aims to maximize the services offered across the boundary, whilst not requiring unduly complex mappings. Specifies a mapping between two protocols.

Cholangiocarcinoma Dario Ribero, Timothy M. Pawlik, 2015 Cholangiocarcinoma is a heterogeneous group of neoplasms, which has a rising worldwide incidence. Therefore, it is now a major cause of cancer mortality. Diagnosis, staging, treatment approaches and outcomes differ significantly based on the location of the tumor. Given the challenges of remaining up-to-date in a rapidly expanding field, the aim of this monograph is to provide a comprehensive, fully referenced presentation of the state-of-the-art medical and surgical aspects relevant to the management of cholangiocarcinoma divided by the site of origin (i.e. intrahepatic, hilar and distal). The division of

the book into these sections reflects the biological and clinical differences between these tumor types and will permit the authors to address the diagnostic, interventional or treatment issues specific to each tumor type. By presenting all medical and surgical aspects of cholangiocarcinoma in a systematic manner, this monograph will be a ready-to-use instrument for those interested in cholangiocarcinoma, including practicing physicians, residents, fellows and specialists. A list of 66 world-renowned experts contributed to the book, offering the readers the unique opportunity to have a broad perspective on these diseases, practical indications on patient selection and treatment that can be easily applied to both Eastern and Western clinical settings.
