Children of the Turtle Jacques Condor, 2003-10-26 From Aztec to Zuni, here are portraits of the daily lives of the First Nations people who lived and still live on the continent of North America; the great floating island the Northeastern woodland tribes called Turtle Island. Songs, chants and legends from the tip of southern Mexico to Alaska and Arctic Canada are included. Covering a time span of a thousand years, the book includes tribes now decimated or who are a nearly forgotten and rarely mentioned part of history. This book of word-sketches paints a picture of their world: at times harsh and cruel, at other times spiritual and filled with beauty. These word-sketches convey the humanness of the original inhabitants of Turtle Island, the Native American Indians; paints them as neither noble nor savage, but simply as people who learned to live with nature's challenges and hardships and to endure. To read these portraits of tribes and individuals, their land and customs, their needs, both physical and spiritual, is to understand the magnificent heritage that is the gift to the world from Native American Indian people.

Man in Adaptation William Petersen, Yehudi A. Cohen, 2022-04-13 Underlying the anthropological study of man is the principle that there is a reality to which man must adapt if he is to survive. Reproduce, and to perpetuate himself. Populations must adapt to the realities of the physical world and maintain a proper fit between their biological makeup and the pressures of the various niches of the world in which they seek to live. Social groups-where culture is found-must develop adaptive mechanisms in the organization of their social relations if there is to be order, regularity, and predictability in patterns of cooperation and competition and if they are to survive as viable units. This three-volume set of readings presents an introduction to anthropology that is unified and made systematic by focus on adaptations that have accompanied the evolution of man, from non-human primate to inhabitant of vast urban areas in modern industrial societies. Man in Adaptation: The Cultural Present introduces Cultural Anthropology also from the point of view of adaptation and provides coherence for the study of human societies from man's social beginnings to the present. The book deals sequentially with the more and more complex technologies and political and social structures that have enabled different societies to make effective use of the energy potentials in their habitats. This and the two companion volumes are the first attempt to unify the disparate subject matter of anthropology within a single and powerful explanatory framework. They incorporate the work of the most renowned anthropological experts on man, and they illuminate clearly one of the most important concepts around which one can build an investigation of the nature and scope of anthropology itself. For these reasons, they are recognized as indispensable reading for every professional anthropologist and as perhaps the best

available means of introducing new students to the field.
