*Securing and Sustaining the Olympic City* Dr Gary Armstrong, Dr Pete Fussey, Professor Dick

Hobbs, Professor Jon Coaffee, 2012-12-28 Often seen as the host nation's largest ever logistical undertaking, accommodating the Olympics and its attendant security infrastructure brings seismic changes to both the physical and social geography of its destination. Since 1976, the defence of the spectacle has become the central feature of its planning, one that has assumed even greater prominence following the bombing of the 1996 Atlanta Games and, most importantly, 9/11. Indeed, the quintupled cost of securing the first post-9/11 summer Games in Athens demonstrates the considerable scale and complexity currently implicated in these operations. Such costs are not only fiscal. The Games stimulate a tidal wave of redevelopment ushering in new gentrified urban settings and an associated investment that may or may not soak through to the incumbent community. Given the unusual step of developing London's Olympic Park in the heart of an existing urban milieu and the stated commitments to 'community development' and 'legacy', these constitute particularly acute issues for the 2012 Games. In addition to sealing the Olympic Park from perceived threats, 2012 security operations have also harnessed the administrative criminological staples of community safety and crime reduction to generate an ordered space in the surrounding areas. Of central importance here are the issues of citizenship, engagement and access in urban spaces redeveloped upon the themes of security and commerce. Through analyzing the social and community impact of the 2012 Games and its security operation on East London, this book concludes by considering the key debates as to whether

utopian visions of legacy can be sustained given the demands of providing a global securitized event of the magnitude of the modern Olympics.

**GIS Tutorial for Homeland Security** Susan Lindell Radke,Eddie Hanebuth,2008 GIS Tutorial for Homeland Security presents a key ingredient to the recovery and improvement of national security with exercises that integrate the best practices of GIS and public safety to safeguard the nation in times of deliberate attacks and natural disasters. This tutorial is the perfect start to building and examining different strategies of defense, presenting tutorials on preparing a Minimum Essential Datasets (MEDs) database, information sharing and collaboration, a critical infrastructure protection program, citizen protection, search and rescue, and more. The tutorial includes a data CD and a 180-day trial DVD of ArcView GIS 9.3.

Confronting Catastrophe R. W. Greene,2002 This handbook explains the importance and practice of using a geographic information system (GIS) in designing and implementing an effective response to large-scale disasters, including wildfires, hurricanes, earthquakes, and terrorist attacks. The handbook is organized according to the accepted methodology of disaster management, which involves planning and identification, mitigation, preparedness, response, and recovery. The first three stages involve tasks that an organization or community can perform before a disaster occurs. The latter two tasks focus on postdisaster efforts. The spatial display and analysis tools of GIS are ideal for assessing disaster risks, consequences, and responses. GIS can display the location, size, value, and significance of assets that may be impacted by disasters. It can show the kinds of environmental, atmospheric, and other conditions that contribute to

particular kinds of natural disasters. GIS can also juxtapose a particular kind of asset with specific hazardous conditions over a wide geographic area, thus allowing a precise calculation of potential loss in the immediate area. With this kind of graphic depiction, the choices about what to do and where to do it are clarified for those charged with making fast, cost-effective decisions. This handbook details how GIS software features can be used at each stage of planning and response. The use of GIS in a disaster is illustrated by its application in New York City in the days after September 11, where it was used to provide assistance to rescue and recovery teams. The manual also profiles GIS-based disaster modeling software packages now available at no cost to local communities.

**Design and Conduct of Indoor Radon Surveys** IAEA,2019-09-12 This Safety Report draws on the requirements of international standards and the recommendations of international organizations as well as on the scientific literature, together with direct experience from a number of IAEA Member States in relation to carrying out representative indoor radon surveys. The need for and the purpose of representative indoor radon surveys are discussed, as are the factors that must be considered in designing and carrying out such surveys. How the measurement data obtained from indoor radon surveys can be used to develop radon risk maps is also considered. While the Safety Report is focused specifically on national and regional surveys to evaluate average concentrations of radon in dwellings, many of the same considerations also apply to radon surveys for other types of buildings.

**Exterior Building Enclosures** Keith Boswell,2013-06-11 A comprehensive guide to the design and

execution of sophisticated exterior building enclosures Focused on the design process for architects and related professionals, this book addresses the design and execution of sophisticated exterior building enclosures for a number of commercial building types and in a variety of building materials. It focuses on the design process by delineating enclosure basics, the participants (owners, architects, engineers, consultants) and their roles and responsibilities through collaboration, and tracking the design process through construction. This comprehensive handbook covers all of the factors that affect the design of a building enclosure, including function, visual aesthetics, performance requirements, and many other criteria. In-depth case studies of projects of various scales, types, and climate conditions illustrate the successful implementation of exterior wall enclosure solutions in brick masonry, stone, architectural concrete, glass, and metals. This unique and indispensable guide: Defines the functions, physical requirements, design principles, and types of exterior building enclosures Identifies the participants in the design and construction process and specifies their roles and responsibilities Presents a step-by-step process for the design of exterior enclosures, from defining goals and developing concepts through creating construction documents Reviews the construction process from bidding and negotiation through the paper phase to the brick and mortar stage Provides details on the properties of exterior enclosure materials, including structural considerations, weather protection, fire safety, and more Covers a variety of materials, including brick masonry, natural stone masonry, architectural concrete, metal framing and glass, and all-glass enclosures Written by the technical director of the San Francisco office of Skidmore, Owings & Merrill, Exterior Building Enclosures is an indispensable resource for architects, engineers, facade consultants, and green

design consultants working on commercial building projects.

Fassaden Dirk U. Hindrichs, 2006 Following the highly successful first edition, this second edition has been expanded to incorporate some 70 new contributions. Innovative ideas, concepts and solutions for facade design, all exceptional in terms of urban development, architecture, technology and function, are presented using around 250 international buildings and projects from well-known architects. These examples are arranged according to building types and provide an instant overview of the technical possibilities of modern building envelopes. Amongst the architects included are WS Atkins & Partners, Murphy /Jahn, Richard Meier & Partners, Daniel Libeskind, Ingenhoven Overdiek, Gehry Partners, BRT Architekten, Foster and Partners.

**Sustainable Facades** Ajla Aksamija, 2013-03-27 Practical information on designing sustainable, energy-efficient building facades As energy and other natural resources are being depleted, it has become clear that technologies and strategies that allow us to maintain our satisfaction with interior environments while consuming less of these resources are major objectives of contemporary facade design. Sustainable Facades focuses on the strategies and approaches for designing sustainable, high-performance building facades, and provides technical guidance for architects and designers. This timely and useful guide presents strategies and technical guidelines for designing environmentally sensitive, energy-efficient facades based on scientific principles. It provides climate-specific approaches for minimizing energy consumption, analyzes the thermal behavior of different facade systems and materials, and illustrates with case studies how these approaches have been implemented on architectural projects. It also discusses emerging facade

technologies, materials, and systems. Topics covered in this unique and indispensable guide include: Climate-based design approaches for high-performance facades Characteristics of sustainable facades: energy efficiency, thermal behavior, and moisture resistance Designing for thermal comfort, lighting and glare control, and acoustic quality Emerging technologies in facade design, including smart materials, double-skin facades, and facades as energy generators Case studies on building orientation and facade design, tectonic sun exposure control, external shading elements, and more

*The Poetry of Religious Sorrow in Early Modern England* Gary Kuchar, 2011-03-03 In early modern England, religious sorrow was seen as a form of spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the most intimate and enigmatic aspects of faith as lived experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.

Security Games Colin J. Bennett, Kevin Haggerty, 2012 This book addresses the impact of mega-events - such as the Olympic Games and the World Cup - on wider practices of security and surveillance.

Taronga Victor Kelleher, 2013 The great dome of the sky, black, star-sprinkled, arched above him,

appearing at that moment so limitless, so vast and free, that the fences and cages of Taronga were dwarfed, reduced to the point where they barely seemed to exist . . . Every so often, there comes a story so brilliant and lively and moving that it cannot be left in the past. Rediscover the magic of our country's most memorable children's books in the Penguin Australia Children's Classics series of stories too precious to leave behind.

**GIS for Homeland Security** Mike Kataoka, 2007 GIS for Homeland Security also spotlights the visionaries who have applied spatial technology in the field-including the national stage-to develop model solutions to real threats. This book is for decision makers and first responders, for GIS users who see its unlimited potential, and for those new to spatial technology.--BOOK JACKET.

Last House on the Hill Ruth Tringham, Mirjana Stevanović, 2012 Recipient of the Jo Anne Stolaroff Cotsen Prize Occupied from around 7500 BC to 5700 BC, the large Neolithic and Chalcolithic settlement of Catalhoyuk in Anatolia is composed entirely of domestic buildings; no public buildings have been identified. First excavated in the early 1960s, the site was left untouched until 1993. During the summers of 1997-2003 a team from the University of California at Berkeley (the BACH team) excavated an area at the northern end of the East Mound of Catalhoyuk. The houses there date predominantly to the late Aceramic and early Ceramic Neolithic, around 7000 BC. Last House on the Hill is the final report of the BACH excavations. This volume comprises both interpretive chapters and empirical data from the excavations and their materials. The research of the BACH team focuses on the lives and life histories of houses and people, the use of digital technologies in documenting and sharing the archaeological process, the senses of place, and the

nature of cultural heritage and our public responsibilities.

***Strategy for African Mining*** John Strongman,1992-01-01 This report examines the reasons for the demise of Africa's mining performance, and proposes a strategy for accelerating mining sector growth so that the sector can make a greater contribution to economic activity in the region. The report draws heavily on the experience of World Bank mining work in Africa as well as other regions. The report includes an analysis of mining legislation and taxation arrangements in five countries which have been relatively successful in attracting new private sector mining investment. It also makes use of the results of a survey of the decision making processes and criteria of over forty mining companies regarding exploration and investment in developing countries. At various stages, key insights and findings from the report have been reviewed and discussed on a selective basis with industry experts, potential investors, interested government officials and the academic community.

***CAD Tools and Algorithms for Product Design*** P. Brunet,C. Hoffmann,D. Roller,2013-03-09 A look at important new tools and algorithms for future product modeling systems, based on a seminar at the International Conference and Research Center for Computer Science, Schloß Dagstuhl, Germany, presented by internationally recognised experts in CAD technology.

***Turkish Foreign Policy*** H. Kösebalaban,2011-04-11 This book explores how Turkey's contested national identity has affected its foreign policy since the late Ottoman era. The book takes a constructivist approach, asserting that identity matters for foreign policy decisions, but it separates itself from statist approaches by bringing identity question into domestic politics.
