Multidisciplinary Teleconsultation in Developing Countries Michelangelo Bartolo, Fabio

Ferrari, 2018-03-26 This book presents a replicable model of multidisciplinary teleconsultation, designed and set up by Global Health Telemedicine, that offers very significant health benefits in remote and rural areas of developing countries. The model is based on experiences gained in sub-Saharan Africa while training and cooperating with local health professionals within the DREAM program, managed by the Community of Sant'Egidio. This program has to date treated almost 300,000 patients across many countries and has provided health education and disease prevention training to tens of millions. It originated in the context of the fight against AIDS but has been extended to encompass other pathologies and to exploit the capabilities of new telemedicine technologies that allow multispecialist teleconsultation (hence the acronym now represents "Disease Relief through Excellent and Advanced Means"). In addition to thorough description of the program, readers will find reflections and analysis on logistical, technical, sociological, and epidemiological issues. The book is divided into thematic chapters with easy-to-understand graphics. It will be a readily accessible source of information for professionals in international cooperation and global health students and professionals.

Description

Liberating Voices Douglas Schuler,2008 Inspired by the vision and framework outlined in Christopher Alexander's classic 1977 book, A Pattern Language, Schuler presents a pattern language containing 136 patterns designed to meet these challenges. Using this approach, Schuler proposes a new model of social change that integrates theory and practice by showing how information and communication (whether face-to-face, broadcast, or Internet-based) can be used to address urgent social and environmental problems collaboratively. Each of the patterns that form the pattern language (which was developed collaboratively with nearly 100 contributors) is presented consistently; each describes a problem and its context, a discussion, and a solution. The

pattern language begins with the most general patterns (Theory) and proceeds to the most specific (Tactics). Each pattern is a template for research as well as action and is linked to other patterns, thus forming a single coherent whole.

Medical Image Databases Stephen T.C.

Wong,2012-12-06 Medical Image Databases covers the new technologies of biomedical imaging databases and their applications in clinical services, education, and research. Authors were selected because they are doing cutting-edge basic or technology work in relevant areas. This was done to infuse each chapter with ideas from people actively investigating and developing medical image databases rather than simply review the existing literature. The authors have analyzed the literature and have expanded on their own research. They have also addressed several common threads within their generic topics. These include system architecture, standards, information retrieval, data modeling, image visualizations, query languages, telematics, data mining, and decision supports. The new ideas and results reported in this volume suggest new and better ways to develop imaging databases and possibly lead us to the next information infrastructure in biomedicine. Medical Image Databases is suitable as a textbook for a graduate-level course on biomedical imaging or medical image databases, and as a reference for researchers and practitioners in industry.

The Poetry of Religious Sorrow in Early Modern England Gary Kuchar,2011-03-03 In early modern England, religious sorrow was seen as a form of

spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the most intimate and enigmatic aspects of faith as lived experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.

Learning, Culture, and Community in Online Education Michelle M. Kazmer, 2004 In 1996 the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign began an Internet-based teaching program, allowing students across the United States - and the world - to earn a Master's degree from a distance. The program, known as LEEP (Library Education Experimental Project), has been an outstanding success, and as an early innovation in Internet use, provides important lessons on how to flourish in an online environment. Learning, Culture and Community in Online Education brings together significant new research on online education, using the LEEP program as a model to reveal a

wealth of information about innovative online practices. Contributions by administrators, philosophers, faculty, librarians, technical staff, and researchers in the traditions of education, computer science, folklore, information science, and sociology, reveal the many perspectives to be taken into account when creating and maintaining distance learning programs. More than an analysis of the LEEP program, this book is an essential introduction to the variety of social and educational phenomena that occur within the socio-technical environments that support online learners.

Last House on the Hill Ruth Tringham, Mirjana Stevanović, 2012 Recipient of the Jo Anne Stolaroff Cotsen Prize Occupied from around 7500 BC to 5700 BC, the large Neolithic and Chalcolithic settlement of Catalhoyuk in Anatolia is composed entirely of domestic buildings; no public buildings have been identified. First excavated in the early 1960s, the site was left untouched until 1993. During the summers of 1997-2003 a team from the University of California at Berkeley (the BACH team) excavated an area at the northern end of the East Mound of Catalhoyuk. The houses there date predominantly to the late Aceramic and early Ceramic Neolithic, around 7000 BC. *Last House on the Hill* is the final report of the BACH excavations. This volume comprises both interpretive chapters and empirical data from the excavations and their materials. The research of the BACH team focuses on the lives and life histories of houses and people, the use of digital technologies in documenting and sharing the

archaeological process, the senses of place, and the nature of cultural heritage and our public responsibilities.

Web-Based Learning and Teaching Technologies: Opportunities and Challenges Aggarwal, Anil K.,1999-07-01 During the past two decades, telecommunication technologies combined with Web-enabled technologies have created a new technology-based focus, Web-based learning and teaching. This new area has changed the concept of education around the world, creating new challenges and opportunities offered by this new technology-based concept. *Web-Based Learning and Teaching Technologies: Opportunities and Challenges* addresses many issues, trends, opportunities and problems facing colleges and universities in the effective utilization and management of Web-based learning and teaching technologies.

Medieval Archaeology Roberta Gilchrist,Gemma L. Watson,2017 Medieval Archaeology has developed as a distinctive academic domain in the last fifty years or so. It is now taught widely at undergraduate and postgraduate level, and learned societies for Medieval Archaeology flourish across Europe. The subject is more interdisciplinary than most types of archaeology, engaging critically with fields such as History and Art History to

provide fresh and independent insights to the medieval world. It draws on sources of evidence that are unique to Medieval Archaeology, such as extant medieval churches. Medieval Archaeology is literally history from below; it offers unique access to people and practices that were never documented by medieval elites. (Medieval Archaeology also has relevance beyond academia. Indeed, much of the commercial archaeology that now takes place in Europe seeks to record and conserve medieval towns in advance of new developments.) Focusing on the archaeology of medieval Europe (c. 1000 1550AD), this new four-volume collection from Routledge enables researchers and advanced students to make better sense of a vast and rapidly growing corpus of scholarship. The gathered materials have been carefully selected to highlight the key issues and debates in the development and contemporary practice of Medieval Archaeology, and each volume includes a comprehensive introduction newly written by the editor. Medieval Archaeology is an essential work of reference. It is destined to be valued by specialists as well as those working in allied areas such as Medieval Studies, History, and Art History as a vital one-stop research tool.

Theories of Group Behavior Brian Mullen,George R. Goethals,2012-12-06 In the fall of 1983, we began to organize a symposium entitled General Social Psychological Theories of Group Behavior. Our goal was to encourage the extension and

application of basic current social psychology to group behavior. The symposium was presented in the spring of 1984 at the Eastern Psychological Association convention in Baltimore and the interest that it generated led to discussions with colleagues and friends about similar efforts by social psychologists, eventually resulting in the present book. Some clarification about the contents is in order. First, the theories presented here are clearly social psychological in scope and level of analysis, as discussed in the Introduction (Chapter 1). However, we are not trying to encompass sociological, anthropological, political, or historical theoretical approaches to group behavior. Second, while the theories comprise a wide-ranging and representative, if not quite exhaustive, selection of social psychological theories of group behavior, there are some interesting and general perspectives that are not represented. For example, one perspective that is conspicuous by its absence is some variant of learning theory. Aside from the rare, notable exception (e.g., Buss, 1979), little work currently is being done on group behavior from a learning theoretic perspective. Our inclusion or exclusion of a theory reflects our judgment regarding its currency and accessibility to social psychological researchers.
