Interdigital Sensors Subhas Chandra Mukhopadhyay,Boby George,Joyanta Kumar Roy,Tarikul Islam,2021-02-15 The book highlights the research contributions of the interdigitated (IDT) sensors over a period of two decades in the field of sensing technology. It presents theory, design, and practical realization of the IDT sensors working over wide frequency range for scientific, industrial, and consumer applications. The IDT sensors have been widely investigated for wide range of sensing applications including agriculture, environmental monitoring, structural health monitoring, health care, food and beverage testing, testing of dielectric material, proximity sensing, microfluidic application, automatic dispensing system etc. Hence, importance of IDT sensors is growing continuously for future applications. As such, it offers a key reference guide on IDT sensors for students, applied physicists, material scientists, engineers, sensors designers and technicians.

Institutions, Governance and the Control of Corruption Kaushik Basu,Tito Cordella,2018-04-04 This book considers how emerging economies around the world face the challenge of building good institutions and effective governance, since so much of economic development depends on having these in place. The promotion of shared prosperity and the battle against poverty require interventions to reach out to the poor and the disadvantaged. Yet time and again we have seen such effort foiled or diminished by corruption and leakage. The creation of good governance and institutions and structures to combat corruption require determination and passion but also intricate design rooted in data, analysis, and research. In this book, leading researchers from around the world bring to the table some of the best available ideas to help create better governance structures, design laws for corruption control, and nurture good institutions.

The Concise Dictionary of Dress Judith Clark,Adam Phillips,2010 In this deeply idiosyncratic collaboration between a psychoanalyst and a costume curator, Adam Phillips re-describes dress in terms of anxiety, wish and desire, while Judith Clark's installations raise issues of equivalence with Phillips' definitions and bring garments and other items from the Victoria and Albert Museum's archive to life in unexpected ways. Published in parallel with an Artangel commission at Blythe House, location of the V&A's vast reserve collections, and designed by Studio Frith, The Concise Dictionary of Dress examines the nature of dictionaries, archives and dress curation and adds a stunning visual essay recording two overnight tours through Blythe House by renowned photographer Norbert Schoerner. Phillips' definitions for words commonly associated with fashion and appearance - such as armoured, conformist, essential, provocative - were paired with eleven stations created by Clark on a walk through this vast building, from its rooftop to an underground coal bunker. Here in print, extending beyond the works at Blythe House, Phillips adds more words, more definitions and an overarching essay asking broader questions about what dictionaries are, how we use them and why they matter. Judith Clark herself also presents a written analysis of the Dictionary in response to questions posed anonymously by authorities in fields as varied as cultural theory, fashion history, arts curation and architecture, as well as a comprehensive illustrated catalogue of references used in creating the installations.

Budd Family. Anonymous,2023-07-18 This book is a brief history of the Budd family. It provides some information about the family history and notable members of the family, but is not a comprehensive genealogy. While it may be of interest to those with a connection to the Budd family, it is not an essential resource for genealogical research. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Polymer Processing Donald G. Baird, Dimitris I. Collias, 2014-03-24 Fundamental concepts coupled with practical, step-by-step guidance With its emphasis on core principles, this text equips readers with the skills and knowledge to design the many processes needed to safely and successfully manufacture thermoplastic parts. The first half of the text sets forth the general theory and concepts underlying polymer processing, such as the viscoelastic response of polymeric fluids and diffusion and mass transfer. Next, the text explores specific practical aspects of polymer processing, including mixing, extrusion dies, and post-die processing. By addressing a broad range of design issues and methods, the authors demonstrate how to solve most common processing problems. This Second Edition of the highly acclaimed Polymer Processing has been thoroughly updated to reflect current polymer processing issues and practices. New areas of coverage include: Micro-injection molding to produce objects weighing a fraction of a gram, such as miniature gears and biomedical devices New chapter dedicated to the recycling of thermoplastics and the processing of renewable polymers Life-cycle assessment, a systematic method for determining whether recycling is appropriate and which form of recycling is optimal Rheology of polymers containing fibers Chapters feature problem sets, enabling readers to assess and reinforce their knowledge as they progress through the text. There are also special design problems throughout the text that reflect real-world polymer processing issues. A companion website features numerical subroutines as well as guidance for using MATLAB®, IMSL®, and Excel to solve the sample problems from the text. By providing both underlying theory and practical step-by-step guidance, Polymer Processing is recommended for students in chemical, mechanical, materials, and polymer engineering.

Terminology on Statistical Metadata United Nations. Statistical Commission, United Nations. Economic Commission for Europe, Conference of European Statisticians, 2000 This publication was prepared at the request of countries participating in the activities on statistical metadata organised by the United Nations/ Economic Commission for Europe Statistical Division. The aim of the publication is to assist national and international statistical offices on problems dealing with the development and implementation of statistical metainformation systems. The development of standard terminology will also help to facilitate access, sharing, comparing and understanding of statistics across national boundaries. Over 230 terms are defined relating to: metadata collection; storing, organising and searching metadata; metadata and metainformation system's functions (identification, location, retrieval, processing, analysis and interpretation); metadata models and holdings; metadata administration and dissemination. Concepts are defined in natural language and are organised in the thesaurus structure.

The Moche Garth Bawden, 1999-11-23 This vivid evocation of an ancient civilization is both enlivened and deepened by the author's sympathetic understanding of customs, rituals and myths which to modern eyes may seem both strange and terrible. It will be widely welcomed by scholars and students of South American archaeology and history, by all those curious to know more about a civilization that for thirteen centuries was largely forgotten.

Chic Thrills Juliet Ash, Elizabeth Wilson, 1992-01-01 Designed to be as internationally relevant as the fashion it discusses, Chic Thrills extends fashion theory beyond the interpretation of style, and shows how it relates to the economic realities and motivations of those who create the clothing we buy and wear. Among the issues the contributors address are: Feminism and the politics of fashion * The relationship of non-European cultures to Western fashion * Fashion and the negotiation of identity * Recent trends in fashion photography and the media representation of fashion * Industrial conditions, production constraints and the relationship of garment workers to the clothes they make * Playing with a different sex: fashion and the lesbian couple *

Fascism and fashion: Paris haute couture under Nazi occupation * Fashion and the postmodern body.

Unmasking Ideology in Imperial and Colonial Archaeology Bonnie Effros, Guolong Lai, 2018-12-31 This volume addresses the entanglement between archaeology, imperialism, colonialism, capitalism, and war. Popular sentiment in the West has tended to embrace the adventure rather than ponder the legacy of archaeological explorers; allegations by imperial powers of discovering archaeological sites or saving world heritage from neglect or destruction have often provided the pretext for expanding political influence. Consequently, citizens have often fallen victim to the imperial war machine, seeing their lands confiscated, their artifacts looted, and the ancient remains in their midst commercialized. Spanning the globe with case studies from East Asia, Siberia, Australia, North and South America, Europe, and Africa, sixteen contributions written by archaeologists, art historians, and historians from four continents offer unusual breadth and depth in the assessment of various claims to patrimonial heritage, contextualized by the imperial and colonial ventures of the last two centuries and their postcolonial legacy.

Pottery in Archaeology Clive Orton, Michael Hughes, 2013-05-13 This revised edition provides an up-to-date account of the many different kinds of information that can be obtained through the archaeological study of pottery. It describes the scientific and quantitative techniques that are now available to the archaeologist, and assesses their value for answering a range of archaeological questions. It provides a manual for the basic handling and archiving of excavated pottery so that it can be used as a basis for further studies. The whole is set in the historical context of the ways in which archaeologists have sought to gain evidence from pottery and continue to do so. There are case studies of several approaches and techniques, backed up by an extensive bibliography.

The Burial Theme in Moche Iconography Christopher B. Donnan, Donna McClelland, 1979

Life History of a Fossil Pat Shipman, 1993 Pat Shipman sets forth the taphonomic methods of analyzing how animal remains are acted upon and altered, both by biological and by geographic phenomena, in their passage from the biosphere of bones and carcass into the lithosphere of fossils. She explains the role of disease, predation, accidents, postmortem destruction, and transport in the life history of a fossil, and provides an introduction to the relevant geological concepts and to faunal analysis.

Inca Religion and Customs Father Bernabe Cobo, 2010-06-28 Completed in 1653, Father Bernabe Cobo's *Historia del Nuevo Mundo* is an important source of information on pre-conquest and colonial Spanish America. Though parts of the work are now lost, the remaining sections which have been translated offer valuable insights into Inca culture and Peruvian history. *Inca Religion and Customs* is the second translation by Roland Hamilton from Cobo's massive work. Beginning where *History of the Inca Empire* left off, it provides a vast amount of data on the religion and lifeways of the Incas and their subject peoples. Despite his obvious Christian bias as a Jesuit priest, Cobo objectively and thoroughly describes many of the religious practices of the Incas. He catalogs their origin myths, beliefs about the afterlife, shrines and objects of worship, sacrifices, sins, festivals, and the roles of priests, sorcerers, and doctors. The section on Inca customs is equally inclusive. Cobo covers such topics as language, food and shelter, marriage and childrearing, agriculture, warfare, medicine, practical crafts, games, and burial rituals. Because the Incas apparently had no written language, such postconquest documents are an important source of information about Inca life and culture. Cobo's work, written by one who wanted to preserve something of the indigenous culture that his fellow Spaniards were fast destroying, is one of the most accurate and highly respected.

Geological Methods in Mineral Exploration and Mining Roger Marjoribanks, 2012-12-06 This book is written as a practical field manual to effective. Each geologist has to develop his/her own to be used by geologists engaged in mineral exploration. The book outlines techniques and will ultimately be judged on their effectiveness. It is also hoped that it will serve as a text, not the process by which these results and reference for students in Applied Geology were reached. In mineral exploration, the only courses of universities and colleges. The book 'right' way of doing anything is the way that aims to outline

some of the practical skills that locates ore in the quickest and most cost-effective turn the graduate geologist into an explorer. It is preferable, however, for an individualist. It is intended as a practical 'how to' manual to develop his/her own method of operation book, rather than as a text on geological or ore after having tried, and become aware of, those deposit theory. procedures which experience has shown to work. An explorationist is a professional who search well and which are generally accepted in industry as good exploration practice. As for ore bodies in a scientific and structured way. Although an awkward and artificial term, The chapters of the book approximately follow this is the only available word to describe the low the steps which a typical exploration project totality of the skills which are needed to locate a mineralization would go through. In Chapter 1, the author defines economic mineralization.

Bathing in the Roman World Fikret Yegül, 2009-09-14 In *Bathing in the Roman World*, Fikret Yegül examines the social and cultural aspects of one of the key Roman institutions. Guiding the reader through the customs, rituals, and activities associated with public bathing, Yegül traces the origins and development of baths and bathing customs and analyzes the sophisticated technology and architecture of bath complexes, which were among the most imposing of all Roman building types. He also examines the reception of bathing throughout the classical world and the transformation of bathing culture across three continents in Byzantine and Christian societies. The volume concludes with an epilogue on bathing and cleanliness in post-classical Europe, revealing the changes and continuities in culture that have made public bathing a viable phenomenon even in the modern era. Richly illustrated and written in an accessible manner, this book is geared to undergraduates for use in courses on Roman architecture, archaeology, civilization, and social and cultural history.

Energy Efficiency and Sustainable Development George Thomson, 2017-05-16 Energy efficiency is the process whereby the per unit consumption of electricity is greatly reduced. This book on energy efficiency and sustainable development discusses a variety of topics related to energy efficiency such as sustainable or green energy technology production, energy efficient building design and manufacture of efficient electric devices. The various studies that are constantly contributing towards advancing technologies and evolution of this field are examined in detail. This book includes some of the vital pieces of work being conducted across the world, on various topics related to energy efficiency. It will prove to be immensely beneficial to students and researchers in this field.

Byzantine Monuments of Istanbul John Freely, Ahmet S. Çakmak, 2009-11-16 This book is about the Byzantine monuments of Istanbul, most notably, Hagia Sophia. The remains of the land and sea walls, the Hippodrome, imperial palaces, commemorative columns, reservoirs and cisterns, an aqueduct, a triumphal archway, a fortified port, and twenty churches are also described in chronological order in the context of their times. These monuments are viewed in relationship to the political, religious, social, economic, intellectual and artistic developments of the Byzantine dynasties.
