Shelter Projects, 2008 Joseph Ashmore,Jon Fowler,James Kennedy,2008 In recent years, the humanitarian community has looked inward, learning from their past experiences in providing emergency shelter for the ever-increasing number of populations suffering from crises worldwide. The humanitarian reform process has helped widen the community of practitioners, reinforced global and country-based coordination systems, and required the agencies concerned to seek new and better means of ensuring integrated and robust humanitarian programming. This publication is an example of a series of learning tools being produced to support improved response to crises. It has been developed by the Emergency Shelter Cluster through a group of agencies within the cluster led by UN-HABITAT. It contains summaries of a range of experiences applied in crisis situations, and an honest appraisal of their successes and failures.

A Preface to Man Subhash Chandran,2019-01-25 Ann Marie reads fragments of her dead husband's unfinished book, and the many love letters he sent her, and in them the social and political events of the time. As she ponders over the writing and the years that the brilliant Jithendran squandered working for a toy company that makes drum-playing monkeys, the narrative gives way to the sweeping saga of a village by the river Periyar. Grappling with issues of equality, love, caste, religion and politics, Thachanakkara is a microcosm of twentieth-century Kerala. Told through the history of three generations of a feudal Nair family, this sprawling story is reminiscent of the craft of Gabriel Garcia Marquez's One Hundred Years of Solitude and has the scale of Sunil Gangopadhyay's Those Days. Manushyanu Oru Amukham is an artistic meditation on human existence and is a contemporary classic.

Building from Waste Dirk E. Hebel,Marta H. Wisniewska,Felix Heisel,2014-09-25 "Reduce, Reuse, Recycle, and Recover" is the sustainable guideline that has replaced the "Take, Make, Waste" attitude of the industrial age. Based on their background at the ETH Zurich and the Future Cities Laboratory in Singapore, the authors provide both a conceptual and practical look into materials and products which use waste as a renewable resource. This book introduces an inventory of current projects and building elements, ranging from marketed products, among them façade panels made of straw and self-healing concrete, to advanced research and development like newspaper, wood or jeans denim used as isolating fibres. Going beyond the mere recycling aspect of reused materials, it looks into innovative concepts of how materials usually regarded as waste can be processed into new construction elements. The products are organized along the manufacturing processes: densified, reconfigured, transformed, designed and cultivated materials. A product directory presents all materials and projects in this book according to their functional uses in construction: load-bearing, self-supporting, insulating, waterproofing and finishing products.
