**Viruses in Foods** Sagar Goyal, 2007-01-15 This is the first book to focus entirely on viruses in foods. It collates information on the occurrence, detection, transmission, and epidemiology of viruses in various foods. Although methods for bacterial detection in food are available, methods for detection of viruses in food, with the exception of shellfish, are not available. It is important, therefore, to develop methods for direct examination of food for viruses and to explore alternate indicators that can accurately reflect the virological quality of food. This book addresses these issues along with strategies for the prevention and control of viral contamination of food.

**Building from Waste** Dirk E. Hebel,Marta H. Wisniewska,Felix Heisel,2014-09-25 "Reduce, Reuse, Recycle, and Recover" is the sustainable guideline that has replaced the "Take, Make, Waste" attitude of the industrial age. Based on their background at the ETH Zurich and the Future Cities Laboratory in Singapore, the authors provide both a conceptual and practical look into materials and products which use waste as a renewable resource. This book introduces an inventory of current projects and building elements, ranging from marketed products, among them façade panels made of straw and self-healing concrete, to advanced research and development like newspaper, wood or jeans denim used as isolating fibres. Going beyond the mere recycling aspect of reused materials, it looks into innovative concepts of how materials usually regarded as waste can be processed into new construction elements. The products are organized along the manufacturing processes: densified, reconfigured, transformed, designed and cultivated materials. A product directory presents all materials and projects in this book according to their functional uses in construction: load-bearing, self-supporting, insulating, waterproofing and finishing products.

Arabic Typography Huda Smitshuijzen AbiFarès,2001 In the twenty-first century, the widespread integration of computer technologies has brought text-based information into many facets of everyday life. This has caused an ever-growing interest in typography across many fields of visual communication, where text and letterform play a central role in disseminating social trends and reflecting the spirit of the times. Arabic Typography takes the reader through a comprehensive study of Arabic letterforms, starting with a concise historical overview of their development and styles, and proceeding to the latest design and technological advances. It attempts to establish the foundations for Arabic type-design by drawing lessons from past practices and aesthetic conventions, in order to retain the enduring traits that are of relevance for improvement and innovation in future type-design creations. Going beyond the historical facts to discuss current design issues pertaining to the creation and production of letterforms, it presents Arabic typographic design as an essential communication tool that should marry functionality and legibility to aesthetic delight. This book will serve as a valuable reference on Arabic typography, and as an educational guide for design students, professionals and anyone who uses Arabic type and enjoys the visual appearance of this language and its letterforms.
