Our Nation's Highways ,1984

Beowulf Bryher,2020-10-14 The author of Roman Wall and other well received historical novels portrays here a more recent period of history, that of the Blitz in the London of World War II. Her portrayal of the living out of wartime days with their drabness and danger consists of cannily arranged sketches of over a dozen folk whose lives touch upon or center about the homely, comforting teashop run by two elderly ladies and fittingly named the Warming Pan. Selina Tippett is the motherly figure who presides and succors, Angelina is her militant partner who goes to battle for food rations and who brings home the plaster bulldog Beowulf as symbol of resolution. When the Warming Pan is blasted to nothingness, Beowulf remains unscathed -- and, while Angelina rejoices and thinks of hawking cakes, Selina laughs and weeps over the fact that she will never have to worry about overdue rent again and is embarrassed by the solicitude of her friends. There is an immediacy and a sharp etching in the presentation of people who seem to be caught candid and unaware by the author: the lonely widowed septuagenarian painter who hangs out at the teashop and who is mercifully spared complete poverty by the blast; young Eve, who has found freedom in the city and who worries that her friend Joe feels alive only in war; Ruby the waitress who discovers a friend she has come to mourn, alive beside her ruined dwelling; the retired colonel whom no one will put back in 'harness' ... A small, distinctively cut and polished piece.--Kirkus reviews

The Technology of Fly Rods Don Phillips,2000 At times we take it for granted, it's just an extension of our arm, but how much do you know about the development of your fly rod? Don Phillips gives the reader a perspective of how fly-rod technology has evolved since the earliest Chinese and

Egyptian fishermen fed their families more than 2000 years before the birth of Christ. In this book, Don shares: the history, including the very first rods; fly-rod design over the years; the use of cane, metal, fiberglass, and boron and graphite; the properties of these materials; manufacturing processes for these materials; component design; patent activities over the years; casting; taper and cross-sectional geometry; and much, much more. You'll find this very detailed book hard to put down.

    <u>Land of Lisp</u> Conrad Barski,2010-10-15 Lisp has been hailed as the world's most powerful programming language, but its cryptic syntax and academic reputation can be enough to scare off even experienced programmers. Those dark days are finally over—Land of Lisp brings the power of functional programming to the people! With his brilliantly quirky comics and out-of-this-world games, longtime Lisper Conrad Barski teaches you the mysteries of Common Lisp. You'll start with the basics, like list manipulation, I/O, and recursion, then move on to more complex topics like macros, higher order programming, and domain-specific languages. Then, when your brain overheats, you can kick back with an action-packed comic book interlude! Along the way you'll create (and play) games like Wizard Adventure, a text adventure with a whiskey-soaked twist, and Grand Theft Wumpus, the most violent version of Hunt the Wumpus the world has ever seen. You'll learn to: –Master the quirks of Lisp's syntax and semantics –Write concise and elegant functional programs –Use macros, create domain-specific languages, and learn other advanced Lisp techniques –Create your own web server, and use it to play browser-based games –Put your Lisp skills to the test by writing brain-melting games like Dice of Doom and Orc Battle With Land of Lisp, the power of functional programming is yours to wield.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang,2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Table of Contents Introduction Section One: Windows Configuration Chapter 1: AlwaysInstallElevated Section Two: Domain Controller Chapter 2: Zerologon Section Three: Windows Service Chapter 3: Service - Insecure File Permission Chapter 4: Service - Unquoted Path Chapter 5: Service - Bin Path Chapter 6: Service - Registry Chapter 7: Service - DLL Hijacking Section Four: Scheduled Tasks Chapter 8: Scheduled Tasks Section Five: Windows Registry Chapter 9: Autorun Chapter 10: Startup Applications Section Six: Windows Kernel Chapter 11: Kernel - EternalBlue Chapter 12: Kernel - MS15-051 Chapter 13: Kernel - MS14-058 Section Seven: Potato Exploits Chapter 14: Juicy Potato Chapter 15: Rogue Potato Section Eight: Password Mining Chapter 16: Password Mining - Memory Chapter 17: Password Mining - Registry Chapter 18: Password Mining - SiteList Chapter 19: Password Mining - Unattended Chapter 20: Password Mining - Web.config Section Nine: UAC Bypass Chapter 21: User Account Control Bypass For more

ANSI Common Lisp Paul Graham,1996 Teaching users new and more powerful ways of thinking about programs, this two-in-one text contains a tutorial--full of examples--that explains all the essential concepts of Lisp programming, plus an up-to-date summary of ANSI Common Lisp. Informative and fun, it gives users everything they need to start writing programs in Lisp and highlights innovative Lisp features.

Infrared Thermography Waldemar Minkina,Sebastian Dudzik,2009-09-28 In Infrared Thermography, the authors discuss the sources of uncertainty, including how to quantify these sources, associated with the use of thermal imagers. This book explains the common misunderstandings in the interpretation of temperature measurements, and provides a metrological evaluation of commercially available infrared cameras. It suggests how to best estimate the accuracy of thermal imaging instruments, whilst considering the level of accuracy attributed to measurements from these thermal imagers. Key features: Begins with an introduction to uncertainties and radiance terms before moving onto the issues surrounding thermal imaging. Deals with the basic issues of thermal imager measurements such as the law of heat exchange by radiation and emissivity. Describes a typical processing algorithm of the measurement path for an example infrared camera. Discusses measurement error analysis of a thermal imaging system. Considers the results of simulation research of thermography uncertainty. Includes an accompanying website which hosts MATLAB® code. Infrared Thermography is primarily aimed at quantitative thermographers, and manufacturers, vendors and users of thermal imagers. This book is also of interest to senior undergraduate and postgraduate students across a range of

disciplines such as electrical, mechanical and civil engineering, computer science, and biomedicine.

   Beck's Cognitive Therapy Frank Wills,2013-12-19 Beck's Cognitive Therapy: Distinctive Features explores the key contributions made by Aaron T. Beck to the development of cognitive behaviour therapy. This book provides a concise account of Beck's work against a background of his personal and professional history. The author, Frank Wills, considers the theory and practice of Beck's cognitive therapy by firstly examining his contribution to the understanding of psychopathology, and going on to explore Beck's suggestions about the best methods of treatment. Throughout the book a commentary of how Beck's thinking differs from other approaches to CBT is provided, as well as a summary of the similarities and differences between Beck's methods and other forms of treatment including psychoanalysis and humanistic therapy. Beck's Cognitive Therapy will be ideal reading for both newcomers to the field and experienced practitioners wanting a succinct guide.

   Rural Transitions to Higher Education in South Africa Sue Timmis,Thea de Wet,Kibashini Naidoo,Sheila Trahar,Lisa Lucas,Emmanuel Mfanafuthi Mgqwashu,Patricia Muhuro,Gina Wisker,2021-09-14 This unique and timely book focuses on research conducted into the experiences of students from rural backgrounds in South Africa: foregrounding decolonial perspectives on their negotiation of access and transitions to higher education. This book highlights not only the challenges of coming from a rural background against the historical backdrop of apartheid and

ongoing colonialism, but also shows the immense assets that students from rural areas bring into higher education. Through detailed narratives created by student co-researchers, the book charts early experiences in rural communities, negotiations of transitions to university and, in many cases, to urban life and students' subsequent journeys through higher education spaces and curricula. The book will be of significant interest and value to those engaged in rurality research across diverse settings, those interested in the South African higher education context and higher education more widely. Its innovative, participatory methodology will be invaluable to researchers seeking to conduct collaborative research that draws on decolonising approaches.
