Urban Informality Ahmed M. Soliman,2021-04-26 This professional book introduces an analytical framework of urban informality perspectives in the Middle East that is aligned with the Global South. The context of Egypt, Lebanon, and Jordan—in the Middle East— is the transregional focus of this book. In these contexts, the book opens a new arena of academic discussion on the theory and practice of urban informality. *Urban Informality: Experiences and Urban Sustainability Transitions in Middle East Cities* questions urban informality, as a site of transitions, interrelated and interlinked with urban sustainability transitions in speedy changes in a given environment. The book presents 'urban informality sustainability transitions' regarding resilience and adaptability that require shifts in urban systems. Shifts from a static process to a dynamic process that eradicates the fragmentation between the tensions, anxieties, and pressures of four modes of production, reproduction, consumptions, and distribution of goods and services in the city and its practices. Finally, through eleven chapters, the concluding remarks explore to what extent and how can urban informality transitions be sustainable.

Police-Citizen Relations Across the World Dietrich Oberwittler,Sebastian Roché,2017-10-02 Police-citizen relations are in the public spotlight following outbursts of anger and violence. Such clashes often happen as a response to fatal police shootings, racial or ethnic discrimination, or the mishandling of mass protests. But even in such cases, citizens' assessment of the police differs considerably across social groups. This raises the question of the sources and impediments of citizens' trust and support for police. Why are police-citizen relations much better in some countries than in others? Are police-minority relations doomed to be strained? And which police practices and policing policies

generate trust and legitimacy? Research on police legitimacy has been centred on US experiences, and relied on procedural justice as the main theoretical approach. This book questions whether this approach is suitable and sufficient to understand public attitudes towards the police across different countries and regions of the world. This volume shows that the impact of macro-level conditions, of societal cleavages, and of state and political institutions on police-citizen relations has too often been neglected in contemporary research. Building on empirical studies from around the world as well as cross-national comparisons, this volume considerably expands current perspectives on the sources of police legitimacy and citizens' trust in the police. Combining the analysis of micro-level interactions with a perspective on the contextual framework and varying national conditions, the contributions to this book illustrate the strength of a broadened perspective and lead us to ask how specific national frameworks shape the experiences of policing.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 *Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

New Directions in Race, Ethnicity and Crime Coretta Phillips, Colin Webster, 2013-10-08 The disproportionate criminalisation and incarceration of particular minority ethnic groups has long been observed, though much of the work in criminology has been dominated by a somewhat narrow debate.

This debate has concerned itself with explaining this disproportionality in terms of structural inequalities and socio-economic disadvantage or discriminatory criminal justice processing. This book offers an accessible and innovative approach, including chapters on anti-Semitism, social cohesion in London, Bradford and Glasgow, as well as an exploration of policing Traveller communities. Incorporating current empirical research and new departures in methodology and theory, this book also draws on a range of contemporary issues such as policing terrorism, immigration detention and youth gangs. In offering minority perspectives on race, crime and justice and white inmate perspectives from the multicultural prison, the book emphasises contrasting and distinctive influences on constructing ethnic identities. It will be of interest to students studying courses in ethnicity, crime and justice.

Inside The Black Vault Greenewald Jr.,2019-04-08 The evidence in this book may not ultimately give you the “smoking gun” you are looking for on your journey, but I guarantee it will give you a box of bullets when you find it. In 1996, John Greenewald, Jr. began researching the secret inner workings of the U.S. Government at the age of fifteen. He targeted such agencies as the CIA, FBI, Pentagon, Air Force, Army, Navy, NSA, DIA, and countless others. Greenewald utilized the Freedom of Information Act (FOIA) to gain access to more than two million pages of documents. This archive includes information relating to UFOs, the JFK Assassination, chemical, biological, and nuclear weapons, and top secret aircraft. He took the millions of pages, and over the course of more than two decades, has built an archive known around the world, as The Black Vault. **Inside The Black Vault: The Government’s UFO Secrets Revealed** takes you on a journey within the secret world of unidentified aerial phenomenon that has plagued the military since at least the 1940s. Declassified records prove that the UFO topic is one of the most highly classified and most elusive subjects the U.S. Government has ever dealt with. Each chapter explores various agencies and their documents, and Greenewald breaks down the meaning of why some of the most important documents are relevant to proving a massive cover-up. Along with declassified documents, Greenewald outlines the struggle it took him to get them. No other topic has proven so difficult, in more than 8,000 FOIA requests that he has filed. He explores why that might be and meets skeptics and debunkers head on, outlining why some of their more prominent rebuttals for it all cannot be true.

Environmental Toxicity Testing K. Clive Thompson,Kirit Wadhia,Andreas P. Loibner,2005-03-08

The rapid expansion of the world's population, combined with industrial progress, has made a significant impact on the world's ecosystems. Ecosystems related to the aquatic environment represent

the primary concern, but the terrestrial environment is also a major challenge for the foreseeable future, in view of increasing demands on available land resources and the need for remediation and reclamation. This volume provides a working knowledge of monitoring issues for those who commission environmental toxicity tests or are required to use them. It discusses interpretation and application of the results, together with any caveats, and considers recent progress in the development of rapid and novel methods. Ecotoxicity is one of the hottest topics in contaminated land assessment. The volume is directed at industrial chemists, process engineers, analytical chemists, environmental consultants and ecologists - the non-experts who have a direct interest in ecotoxicity, rather than the ecotoxicologists.

Crime Mapping and Crime Prevention David Weisburd, Tom McEwen, 1998-01 Technological advances in computer mapping and information systems as well as theoretical innovation in crime prevention have combined to bring crime mapping to the centre for crime prevention practice and policy. The contributors in this book from criminologists, geographers and crime analysts, demonstrate the important role that crime maps have begun to play in crime prevention theory and applications. They show how crime mapping can be used in crime prevention programmes and point to its future applications.
