Biomass Kelsi Bracmort,Ross W. Gorte,2010 This report discusses the use of biomass as an energy feedstock, which is emerging as a potentially viable alternative to address U.S. energy security concerns, foreign oil dependence, rural economic development, and diminishing sources of conventional energy. Biomass (organic matter that can be converted into energy) may include food crops, crops for energy (e.g., switchgrass or prairie perennials), crop residues, wood waste and byproducts, and animal manure. This report discusses legislation regarding biomass, the evolving definition of biomass, and the positions of supporters and detractors of biomass as an alternative energy source.

Towards Sustainable Production and Use of Resources ,2009 This report was produced by the Working Group on biofuels of the International Panel for Sustainable Resource Managemet. It provides an overview of the key problems and perspectives toward sustainable production and use of biofuels. It is based on an extensive literature study, taking into account recent major reviews. The focus is on so-called first generation biofuels while considering further lines of development. In the overall context of enhancing resource productivity, options for more efficient and sustainable production and use of biomass are examined. In particular, modern biomass use for energetic purposes, such as biomass used for (co-)generation of heat and power and liquid biofuels for transport, are addressed and related to the use of biomass for food and material purposes. Whereas improving the efficiency of biomass production plays a certain role towards enhancing sustainability, progress will ultimately depend on a more efficient use of biotic (and abiotic) resources (incl. for instance an increased fuel economy of car fleets), although a full consideration of all relevant strategies towards this end (e.g changing diets high in animal based foods and reducing food losses) is beyond the scope of this report.

Building from Waste Dirk E. Hebel,Marta H. Wisniewska,Felix Heisel,2014-09-25 "Reduce, Reuse, Recycle, and Recover" is the sustainable guideline that has replaced the "Take, Make, Waste" attitude of the industrial age. Based on their background at the ETH Zurich and the Future Cities Laboratory in Singapore, the authors provide both a conceptual and practical look into materials and products which use waste as a renewable resource. This book introduces an inventory of current projects and building elements, ranging from marketed products, among them façade panels made of straw and self-healing concrete, to advanced research and development like newspaper, wood or jeans denim used as isolating fibres. Going beyond the mere recycling aspect of reused materials, it looks into innovative concepts of how materials usually regarded as waste can be processed into new construction elements. The products are organized along the manufacturing processes: densified, reconfigured, transformed, designed and cultivated materials. A product directory presents all materials and projects in this book according to their functional uses in construction: load-bearing, self-supporting, insulating, waterproofing and finishing products.

Print & Pattern 2 Bowie Style,Marie Perkins,2011-10-13 Patterns are everywhere. An antidote to gloomy economic times, we see them creeping over shop fronts, packaging design, clothes and home accessories. Who wants mass-produced minimalism when you can have patterns with personality? Print & Pattern 2 is the latest book from the cult Print & Pattern website that celebrates all aspects of printed surface pattern. Featuring cute, colourful and contemporary designs on textiles, cards, gift wrap, stationery, wallpaper, tableware, books, illustration, and anything, the book will be a must for anyone who loves printed patterns and motifs. Includes work from Marimekko, Designers Guild, Sanderson, Jonathan Adler, Angela Adams, Amy Butler, Rob Ryan and Dwell Studio.

Notes from the Hyena's Belly Nega Mezlekia,2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Local Disaster Management Gina Yannitell Reinhardt,Lex Drennan,2020-06-09 Local Disaster Management explores what resilience means for local communities and local governments on the front line of responding to disasters and emergencies. Disaster management is often seen as a major international issue undertaken by global actors such as the UN, Red Cross and Red Crescent. Yet fundamentally, all disasters are local. Every disaster, regardless of its type, affects individuals, families and communities before they escalate to encompassing one or many communities or nations. This volume therefore explores fundamental issues of disaster and emergency management at the local level. What is resilience? What does resilience mean for a local government seeking to lessen the impact of disasters on their community? How do local governments adapt through their experiences of disasters and how do they recover from catastrophic experiences? This book explores these issues with chapters from top scholars in the field, draws out lessons for local government officials and disaster managers seeking to build community resilience, prepare their communities for a changing environment, and facilitate recovery after disasters strike. Local Disaster Management provides invaluable insight for local governments charged with managing the inescapable effects of climate change and the increasing frequency and severity of disasters, as well as for scholars of local governance, disaster resilience, government policy, and disaster management. The chapters were originally published as a special issue in Local Government Studies.

Biomass Conversion Chinnappan Baskar,Shikha Baskar,Ranjit S. Dhillon,2012-05-08 The consumption of petroleum has surged during the 20th century, at least partially because of the rise of the automobile industry. Today, fossil fuels such as coal, oil, and natural gas provide more than three quarters of the world's energy. Unfortunately, the growing demand for fossil fuel resources comes at a time of diminishing reserves of these nonrenewable resources. The worldwide reserves of oil are sufficient to supply energy and chemicals for only about another 40 years, causing widening concerns about rising oil prices. The use of biomass to produce energy is only one form of renewable energy that can be utilized to reduce the impact of energy production and use on the global environment. Biomass can be converted into three main products such as energy, biofuels and fine chemicals using a number of different processes. Today, it is a great challenge for researchers to find new environmentally benign methodology for biomass conversion, which are industrially profitable as well. This book focuses on the conversion of biomass to biofuels, bioenergy and fine chemicals with the interface of biotechnology, microbiology, chemistry and materials science. An international scientific authorship summarizes the state-of-the-art of the current research and gives an outlook on future developments.

Hell's Riders Ralph Cotton,2021-06-10 In his years as an Arizona Ranger, Sam Burrack believes he has seen every act of cruelty and brutality one man can bestow upon another. but nothing has prepared him for the butchery perpetrated by a gang of scalp hunters in the settlement of Clifton Wells. Although on assignment escorting a prisoner, Sam will not allow the local law to pursue the killers without his assistance.Sheriff Boyd Tackett is more than willing to accept Sam's help because he has compelling personal reasons to see the culprits caught. With no idea of how many foes they're facing, the lawmen must learn to stick together-and trust each other-if they expect to bring these men to justice ...

Competitive Electricity Markets Fereidoon P. Sioshansi,2011-10-10 After 2 decades, policymakers and regulators agree that electricity market reform, liberalization and privatization remains partly art. Moreover, the international experience suggests that in nearly all cases, initial market reform leads to unintended consequences or introduces new risks, which must be addressed in subsequent "reform of the reforms. Competitive Electricity Markets describes the evolution of the market reform process including a number of challenging issues such as infrastructure investment, resource adequacy, capacity and demand participation, market power, distributed generation, renewable energy and global climate change. Sequel to Electricity Market Reform: An International Perspective in the same series published in 2006 Contributions from renowned scholars and practitioners on significant electricity market design and implementation issues Covers timely topics on the evolution of electricity market

liberalization worldwide

Psychological Medicine Desmond Curran,Maurice Partridge,1969
2028 End Gabriel Erb,2019-07-12 God created a game - it's called The Game of Life. Planet Earth is the playing field, the 10 love commandments are the rules, and we humans are the players who can win or lose. The game is played by two teams, like the game of football. One team's head coach is Jesus and the other team's head coach is Satan. All of us on earth are playing for one of these two teams! Gabriel Ansley Erb wrote the book 2028 END in order to fully elucidate God's game clock scenario for The Game of Life as contained in the game's handbook, the Holy Bible. The handbook says, God declared the end from the beginning (Isaiah 46:10) by using 7 days in the creation event. Each 24 hour creation day foretold of a future 1,000 year period for a total 7,000 year plan God had for The Game of Life to be played on planet earth. And amazingly, to confirm this is all true, God hid a secret prophesy in each creation day foretelling the greatest event He had planned to occur in that day's future millennium!Consequently, Creation day 1 foretold Adam & Eve's fall, which was fulfilled during earth's 1st millennium. Creation day 2 foretold Noah's global flood, which was fulfilled during earth's 2nd millennium. Creation day 3 foretold Moses' Red Sea parting, which was fulfilled during earth's 3rd millennium. Creation day 4 foretold of John the Baptist & Jesus Christ, and so they lived and died during earth's 4th millennium. And the prophecies continue with each Creation day!Gabriel proves all of the above, carefully revealing the prophetic Scriptures as well as the fulfillment Scriptures. Then he reveals a dozen Scriptures proving Christ died earth's 4,000 year and will return earth's 6,000 year. Finally, he proves Christ died Feast of Passover AD 28 and will return Feast of Trumpets 2028. For those who read this book, it is an open and shut case: The Game of Life will end 2,000 years from the year of Christ's death on the cross - AD 2028.
