Dynamic Laws of Prosperity [MP3 AUDIO] (Audio CD) Catherine Ponder, 2006 This book is the result of several recent recessions and many years of lean living. Nobody likes recessions and nobody likes lean living - and indeed nobody should like them. When the author was at her lowest ebb emotionally, physically, and financially, she learned about the power of thought as an instrument for success or failure. This book plainly shows how prosperous thinking has helped people in every walk of life to experience these results. Furthermore, it shows how prosperous thinking can do these things for the reader too.\n

The Theme-Topic Interface María de los Ángeles Gómez González, 2001-03-08 The Theme-Topic Interface (TTI) gives a useful catalogue of approaches to the concept Theme in the analysis of Natural Language. The book is written with both theoretical and descriptive goals and aims to synthesize and revise current approaches to pragmatic functions. In addition, TTI explains that different thematic constructions in natural language reveal different discourse strategies related to point of view and speaker subjectivity, which shows the mutually supportive role of form and discourse function vis-à-vis each other. The book's value is enhanced by the use of natural language corpora, the Lancaster IBM Spoken English Corpus (LIBMSEC), and by running multivariate statistical tests, taking into account both segmental and suprasegmental features. The bibliography lists more than 600 publications providing ample material for further research into an integrated theory of language and its use. The indexes provide easy access to most authors mentioned and to the major concepts covered.
