Annihilation Jeff VanderMeer, 2014-02-04 A MAJOR MOTION PICTURE FROM ALEX GARLAND, STARRING NATALIE PORTMAN AND OSCAR ISAAC The Southern Reach Trilogy begins with *Annihilation*, the Nebula Award-winning novel that reads as if Verne or Wellsian adventurers exploring a mysterious island had warped through into a Kafkaesque nightmare world (Kim Stanley Robinson). Area X has been cut off from the rest of the continent for decades. Nature has reclaimed the last vestiges of human civilization. The first expedition returned with reports of a pristine, Edenic landscape; the second expedition ended in mass suicide; the third expedition in a hail of gunfire as its members turned on one another. The members of the eleventh expedition returned as shadows of their former selves, and within weeks, all had died of cancer. In *Annihilation*, the first volume of Jeff VanderMeer's Southern Reach trilogy, we join the twelfth expedition. The group is made up of four women: an anthropologist; a surveyor; a psychologist, the de facto leader; and our narrator, a biologist. Their mission is to map the terrain, record all observations of their surroundings and of one another, and, above all, avoid being contaminated by Area X itself. They arrive expecting the unexpected, and Area X delivers—they discover a massive topographic anomaly and life forms that surpass understanding—but it's the surprises that came across the border with them and the secrets the expedition members are keeping from one another that change everything.

Leadership Rudolph W. Giuliani, Ken Kurson, 2003 The minutes and hours following 11th September terror attacks on the World Trade Center posed the greatest challenge to governance in New York City's history. Mayor Rudolph Giuliani had barely escaped with his life in the collapse of the first tower. Fires burned furiously near the site as the other buildings verged on collapse. Air Force fighter jets criss-crossed the sky to ward off other attacks. And yet in those moments after the calamity, and in the following days and

months, Mayor Giuliani not only steered the city through the crisis, but did so with an assurance and authority that was hailed around the world as a model of courageous leadership. In LEADERSHIP, Giuliani describes vividly the chaos and horror of the twin-towers catastrophe, and explains how the rules of management he enforced as Mayor enabled him to gain control of the emergency. These are also the rules, Giuliani makes clear, that anyone in a leadership position - from the head of a large corporation to the owner of a corner shop - can use to inspire others and achieve concrete results.

Altman, 2013-11-18 TRACK 1: Innovative Applications in the Public Sector The integration of multimedia based applications and the information superhighway fundamentally concerns the creation of a communication technology to support the activities of people. Communication is a profoundly social activity involving interactions among groups or individuals, common standards of exchange, and national infrastructures to support telecommunications activities. The contributions of the invited speakers and others in this track begin to explore the social dimension of communication within the context of integrated, information systems for the public sector. Interactions among businesses and households are described by Ralf Strauss through the development within a real community of a wired city with information and electronic services provided by the latest telecommunications technologies. A more specific type of interaction between teacher and student forms the basis of education. John Tiffin demonstrates how virtual classrooms can be used to augment the educational process. Carl Loeffler presents yet another perspective on interaction through the integration of A-life and agent technologies to investigate the dynamics of complex behaviors within networked simulation environments. Common standards for communication in the form of electronic

documents or CSCW (Computer Supported Cooperative Work), according to Roland Traunmiiller, provide enabling technologies for a paradigm shift in the management of organizations. As pointed out by William Olle, the impact of standardization work on the future of information technology depends critically upon the interoperability of software systems.

An Engineering Guide to Photoinjectors Triveni Rao, David H. Dowell, 2013-04-02 This book is an introduction to the basic

theory and engineering of advanced electron beam sources known as photoinjectors. Photoinjectors produce relativistic electrons for exciting new devices such as x-ray free electron lasers and the polarized beams for very high energy physics linear colliders. The chapters are written by renowned experts in the field who share their working knowledge of the technologies needed for designing and building photoinjectors.

The Social Structures of the Economy Pierre

Bourdieu, 2014-03-10 Much orthodox economic theory is based on assumptions which are treated as self-evident: supply and demand are regarded as independent entities, the individual is assumed to be a rational agent who knows his interests and how to make decisions corresponding to them, and so on. But one has only to examine an economic transaction closely, as Pierre Bourdieu does here for the buying and selling of houses, to see that these abstract assumptions cannot explain what happens in reality. As Bourdieu shows, the market is constructed by the state, which can decide, for example, whether to promote private housing or collective provision. And the individuals involved in the transaction are immersed in symbolic constructions which constitute, in a strong sense, the value of houses, neighbourhoods and towns. The abstract and illusory nature of the assumptions of orthodox economic theory has been criticised by some economists, but Bourdieu argues that we must go further. Supply, demand, the market and even the buyer and seller are products of a process of social construction, and so-called 'economic' processes can be adequately described only by calling on sociological methods. Instead of seeing the two disciplines in antagonistic terms, it is time to recognize that sociology and economics are in fact part of a single discipline, the object of which is the analysis of social facts, of which economic transactions are in the end merely one aspect. This brilliant study by the most original sociologist of post-war France will be essential reading for students and scholars of sociology, economics, anthropology and related disciplines.

High Energy Spin Physics Werner Meyer, Erhard Steffens, Werner Thiel, 2012-12-06 The 9th International Symposium on High Energy Spin Physics was held in Bonn, 6-15 September 1990, with the Physikalisches Institut der Universität Bonn as the host. The symposium was preceded by a series of four workshops on • polarized electron sources and electron spin polarimeters • Siberian snakes and polarization in circular machines • polarized gas targets • polarized solid targets. 160 participants from 11 countries, among them many young physicists, came together and discussed mainly technological spin problems. The high level of participation indicates that workshops combined with the symposium are attractive not only for people who plan and prepare polarized beams and targets but also for experimentalists and theorists dealing with high energy spin physics. At these workshops many very interesting and important recent results were presented and reviewed. Thus we hope these proceedings will be valuable to many researchers in these fields. The Organizing Committee would like to thank all participants, in particular the speakers and the session chairmen, for their contributions to the workshops and for helping to create a lively and stimulating atmosphere. Special thanks go to the organizers - W. Haeberli, S. Mango, E. Reichert, E. Steffens, W. Thiel, U. Wienands - for their cooperation in preparing and running these workshops. We gratefully acknowledge the enthusiastic help of the members of our institute in preparing and running the conference and the workshops, especially Mrs. D. FaSbender, Mrs. E. Wendorf, Mrs. J. Wetzol, and Dr. U. Idschok.

Preserving the People's Post Office Christopher W. Shaw, 2006 Christopher Shaw, the book's author said, Through preferential postage rates for nonprofits the Postal Service facilitates civic

involvement and a healthy democracy. Nader also noted, Postal employees are fairly remunerated in an increasingly low-wage, low benefit 'Wal-Mart' economy. According to Nader, Post offices serve as the heart of community life in neighborhoods and towns nationwide and the presence of postal workers on community streets make them safer, as the many beneficiaries of their frequently heroic efforts attest. The lack of citizen-consumers' involvement in the recently passed postal reform legislation has highlighted the need for a public dialogue about the future of our postal system. The book provides a starting point for that conversation, stated Nader.

Get in Trouble Kelly Link, 2015-02-03 FINALIST FOR THE PULITZER PRIZE • NATIONAL BESTSELLER • A bewitching story collection from a writer hailed as "the most darkly playful voice in American fiction" (Michael Chabon) and "a national treasure" (Neil Gaiman). NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BookPage • BuzzFeed • Chicago Tribune • Kirkus Reviews • NPR •

San Francisco Chronicle • Slate • Time • Toronto Star • The Washington Post Kelly Link has won an ardent following for her ability, with each new short story, to take readers deeply into an unforgettable, brilliantly constructed fictional universe. The nine exquisite examples in this collection show her in full command of her formidable powers. In "The Summer People," a young girl in rural North Carolina serves as uneasy caretaker to the mysterious, never-quite-glimpsed visitors who inhabit the cottage behind her house. In "I Can See Right Through You," a middle-aged movie star makes a disturbing trip to the Florida swamp where his former on- and off-screen love interest is shooting a ghost-hunting reality show. In "The New Boyfriend," a suburban slumber party takes an unusual turn, and a teenage friendship is tested, when the spoiled birthday girl opens her big present: a life-size animated doll. Hurricanes, astronauts, evil twins, bootleggers, Ouija boards, iguanas, The Wizard of Oz, superheroes, the Pyramids . . . These are just some of the talismans of an imagination as capacious and as full of wonder as that of any writer today. But as fantastical as these stories can be, they are always grounded by sly humor and an innate generosity of feeling for the frailty—and the hidden strengths—of human beings. In *Get in Trouble*, this one-of-a-kind talent expands the boundaries of what short fiction can do. Praise for *Get in Trouble* "Ridiculously brilliant . . . These stories make you laugh while staring into the void."—The Boston Globe "When it comes to literary magic, Link is the real deal: clever, surprising, affecting, fluid and funny."—San Francisco Chronicle

Practice What You Preach David H. Maister, 2012-12-11 In today's highly competitive realm of professional service firms, the quest for individual stardom is at an all-time high. The temptation to rack up the most billable hours and out-perform one's fellow advisers is often irresistible. But it is also shortsighted and terribly counterproductive, according to world-renowned authority and acclaimed author David Maister. In this groundbreaking book, Maister issues a much-needed wake-up call to today's professional

service firms. Arguing that a far greater contribution to a firm's success can come from those who find fulfilment in seeing other's succeed rather than those who assume the role of most valuable player. The author outlines and discusses in detail the nine key people issues upon which successfully managed and profitable organisations rely. Supporting his findings with a range of compelling data, Maister demonstrates how and why firms that emphasise the highest standards of employee professionalism are invariably more financially successful than those that don't.

Capital and Ideology Thomas Piketty, 2020-03-10 A New York Times Bestseller An NPR Best Book of the Year The epic successor to one of the most important books of the century: at once a retelling of global history, a scathing critique of contemporary politics, and a bold proposal for a new and fairer economic system. Thomas Piketty's bestselling *Capital in the Twenty-First Century* galvanized global debate about inequality. In this audacious follow-up, Piketty challenges us to revolutionize how we think about politics, ideology, and history. He exposes the ideas that have sustained inequality for the past millennium, reveals why the shallow politics of right and left are failing us today, and outlines the structure of a fairer economic system. Our economy, Piketty observes, is not a natural fact. Markets, profits, and capital are all historical constructs that depend on choices. Piketty explores the material and ideological interactions of conflicting social groups that have given us slavery, serfdom, colonialism, communism, and hypercapitalism, shaping the lives of billions. He concludes that the great driver of human progress over the centuries has been the struggle for equality and education and not, as often argued, the assertion of property rights or the pursuit of stability. The new era of extreme inequality that has derailed that progress since the 1980s, he shows, is partly a reaction against communism, but it is also the fruit of ignorance, intellectual specialization, and our drift toward the dead-end politics of identity. Once we understand this, we can begin to

envision a more balanced approach to economics and politics. Piketty argues for a new “participatory” socialism, a system founded on an ideology of equality, social property, education, and the sharing of knowledge and power. Capital and Ideology is destined to be one of the indispensable books of our time, a work that will not only help us understand the world, but that will change it.

The Myth of Excellence Fred Crawford,Ryan

Mathews,2007-12-18 The Undiscovered Consumer . . .and the Mistake of Universal Excellence What do customers really want? And how can companies best serve them? Fred Crawford and Ryan Mathews set off on what they describe as an expedition into the commercial wilderness to find the answers. What they discovered was a new consumer -- one whom very few companies understand, much less manufacture products for or sell products or services to. These consumers are desperately searching for values, a scarce resource in our rapidly changing and challenging world. And increasingly they are turning to business to reaffirm these values. As one consumer put it: I can find value everywhere but can't find values anywhere. Crawford and Mathews's initial inquiries eventually grew into a major research study involving more than 10,000 consumers, interviews with executives from scores of leading companies around the world, and dozens of international client engagements. Their conclusion: Most companies priding themselves on how well they know their customers aren't really listening to them at all. Consumers are fed up with all the fuss about world-class performance and excellence. What they are aggressively demanding is recognition, respect, trust, fairness, and honesty. Believing that they are still in a position to dictate the terms of commercial engagement, businesses have bought into the myth of excellence -- the clearly

false and destructive theory that a company ought to be great at everything it does, that is, all the components of every commercial transaction: price, product, access, experience, and service. This is always a mistake because the predictable outcome [is] that the company ends up world-class at nothing; not well-differentiated and therefore not thought of by consumers at the moment of need. Instead, Crawford and Mathews suggest that companies engage in Consumer Relevancy, a strategy of dominating in one element of a transaction, differentiating on a second, and being at industry par (i.e., average) on the remaining three. It's not necessary for businesses to equally invest time and money on all five attributes, and their customers don't want them to. Imagine the confusion if Tiffany & Co. started offering deep discounts on diamonds and McDonald's began selling free-range chicken and tofu. The Myth of Excellence provides a blueprint for companies seeking to offer values-based products and services and shows how to realize the commercial opportunities that exist just beyond their current grasp -- opportunities to reduce operating costs, boost bottom-line profitability, and, most important, begin to engage in a meaningful dialogue with customers.
