One Game at a Time Matt Hern,2013 We need to take sports seriously as arenas of immense power, with a mass appeal. Yet intellectuals have long since abandoned the sporting world. Why? What do we gain by handing over the persuasive power of sports to the worst elements of our culture, by allowing sports to become plagued by hyper-consumption, militarism, violence, sexism and homophobia? According to Matt Hern, not a whole lot. In a series of narratives, Hern makes an impassioned and entertaining plea for a more active engagement with sports, both physically and intellectually.

Ancient-Future Time (Ancient-Future) Robert E. Webber,2004-10-01 Millions of Christians worldwide follow the liturgical Christian calendar in their worship services and in their own personal devotions. The seasons of the Christian year connect believers of diverse backgrounds and offer the sense of unity Jesus desired. Robert Webber believes that we can get even more out of the Christian calendar. He contends that through its rich theological meanings the Christian year can become a cycle for evangelism and spiritual formation. He offers pastors, church leaders, and those of the younger evangelical mind-set practical steps to help achieve this end, including preaching texts and worship themes for Lent, Easter, Pentecost, Advent, and Christmas.

The Time Keeper Kevin E. Cropp,2006-02 Sixteen miles downstream from the birthplace of George Washington where the Shenandoah River comes out of the Blue Ridge carrying sycamore leaves and acorns came a gem that shone brighter than most. That gem was Linda Wails, but as providence would have it her life took as many steep drops and winding turns as did that river. The death of her father, a move to a godforsaken place with so few trees and so much sand, a bout with cancer, and an unrelenting relationship with her son Corey, left Linda no choice but to throw her hands up to the world and submit. The Time Keeper is the story of Linda's return and one last somersault down the river is required. With the North Carolina state baseball playoffs in full swing, seventeen year old Corey Wails has more important matters to attend than his mother's recent wish to make amends. To Corey, life is as simple as the game -- a fastball, a curve ball, and waste a pitch before the strike out. It is the game that Corey loves, and like a ball player who hears no chatter he tightens his blinders and races towards the finish line. But what he finds when he gets there bares no resemblance to what he had dreamed for so long. His mother's change of heart is puzzling to Corey; he wonders how such a thing occurred, how something larger than life itself crept inside the body of Linda Wails and whispered, 'It will be okay Linda, this is the natural way of things.' Linda wonders if that voice will ever reach her son. Perhaps the voice that is larger than life itself is none but our own, buried deep inside of us. One thing is certain, the Time Keeper will not be kept waiting.

E-Collaboration Technologies and Strategies for Competitive Advantage Amid Challenging Times Zhao, Jingyuan, Richards, Joseph, 2021-06-11 E-collaboration is a tool that breaks the boundaries of activities within and between organizations. E-collaboration technologies are making it easier than ever for people to work together no matter where they happen to be. Succeeding with collaboration at a level where it represents a competitive advantage requires a broad approach. Internal social networks can circumvent bureaucratic boundaries and facilitate information sharing activities among individuals across hierarchies and divisions or departments. This allows organizations to acquire resources or competencies from external sources that otherwise would be difficult or expensive to access. Accordingly, organizations focus more on their own areas of competence and gain a competitive advantage by acquiring richer content and better solutions in a creative and cost-effective way. Challenging times can provide new opportunities that need to be detected at the right time. There must be many other sources of competitive advantages which should support the main source of competitive value. Competitive advantage may be gained if the organization is able to find sources of competitive advantage in time of economic crises. Organizations have rapidly deployed technology solutions, such as collaboration tools and cloud computing, which enable their employees to work remotely and continue these organizational operations, especially during times of crisis. E-Collaboration Technologies and Strategies for Competitive Advantage Amid Challenging Times focuses on e-collaboration technologies, strategies, and solutions from a perspective of organizational competitive advantage, including e-collaboration technologies' situation and solutions, innovation systems, competition and strategies, marketing, and growth capabilities. The book presents a full understanding on e-collaboration technologies, strategies, and solutions in organizations, and provides insight for how to develop e-collaboration technologies, strategies, and solutions more generally so as to simultaneously leverage potential benefit and guard against potential risk, promoting organizational competitive advantage amid challenging times. This book is ideally intended for policymakers, government officials, corporate heads of firms, managers, managing directors, practitioners, researchers, academicians, and students seeking information on the e-collaboration technologies being employed in businesses in times of crisis.

Time Capsules William E. Jarvis, 2002-11-11 Time capsules have been used for thousands of years to store for posterity a selection of objects thought to be representative of life at a particular time. Such vessels have the dual purpose of causing participants to ponder their own cultural era and think about those to come. This work is a cultural history of five thousand years of time capsules and other related time-information transfer experiences. It examines both the formal and the popular culture aspects of the time capsule, from its roots in ancient Mesopotamian and Egyptian building foundation deposits to the present utilization of spacecraft probes and other extreme locations. The deposits of 3000 BCE deliberately had no definite date and time to be opened; in 1876 CE came the idea of target-dated deposits. Also discussed are how real time capsules work, notional and archaeological time capsules, the height of the time capsule's popularity from 1935 to 1982, the preservation of writings in time capsules, keeping time in a perpetual futurescape, and turn of the century hype surrounding millennium time capsules.

Time and Revolution Stephen E. Hanson, 2000-11-09 Stephen Hanson traces the influence of the Marxist conception of time in Soviet politics from Lenin to Gorbachev. He argues that the history of Marxism and Leninism reveals an unsuccessful revolutionary effort to reorder the human relationship with time and that this reorganization had a direct impact on the design of the central political, socioeconomic, and cultural institutions of the Soviet Union from 1917 to 1991. According to Hanson, westerners tend to envision time as both rational and inexorable. In a system in which 'time is money,' the clock dominates workers. Marx, however, believed that communist workers would be freed of the artificial distinction between leisure time and work time. As a result, they would be able to surpass capitalist production levels and ultimately control time itself. Hanson reveals the distinctive imprint of this philosophy on the formation and development of Soviet institutions, arguing that the breakdown of Gorbachev's perestroika and the resulting collapse of the Soviet Union demonstrate the failure of the idea.

Virtualpolitik Elizabeth Mathews Losh, 2009 Government media-making, from official websites to whistleblowers' e-mail, and its sometimes unintended consequences. Today government agencies not only have official Web sites but also sponsor moderated chats, blogs, digital video clips, online tutorials, videogames, and virtual tours of national landmarks. Sophisticated online marketing campaigns target citizens with messages from the government—even as officials make news with digital gaffes involving embarrassing e-mails, instant messages, and videos. In *Virtualpolitik*, Elizabeth Losh closely examines the government's digital rhetoric in such cases and its dual role as mediamaker and regulator. Looking beyond the usual focus on interfaces, operations, and procedures, Losh analyzes the ideologies revealed in government's digital discourse, its anxieties about new online practices, and what happens when officially sanctioned material is parodied, remixed, or recontextualized by users. Losh reports on a video game that panicked the House Intelligence Committee, pedagogic and therapeutic digital products aimed at American soldiers, government Web sites in the weeks and months following 9/11, PowerPoint presentations by government officials and gadflies, e-mail as a channel for whistleblowing, digital satire of surveillance practices, national digital libraries, and computer-based training for health professionals. Losh concludes that the government's *virtualpolitik*—its digital *realpolitik* aimed at preserving its own power—is focused on regulation, casting as criminal such common online activities as file sharing, video-game play, and social networking. This policy approach, she warns, indefinitely postpones building effective institutions for electronic governance, ignores constituents' need to shape electronic identities to suit their personal politics, and misses an opportunity to learn how citizens can have meaningful interaction with the virtual manifestations of the state.

God and Time Gregory E. Ganssle, 2001-09-28 Editor Gregory Ganssle calls on four Christian philosophers to present and defend their views on the place of God in a time-bound universe. The positions taken up here include divine timeless eternity, eternity as relative timelessness, timelessness and omnitemporality, and unqualified divine temporality.
