Cicero: Pro Milone Thomas J. Keeline, 2021-05-27 The Pro Milone numbers among Cicero's most famous speeches. In it he defends his friend T. Annius Milo against the charge of murdering P. Clodius Pulcher, Cicero's own archenemy. Clodius' death, Milo's trial, and their aftermath consumed Roman public life in 52 BC, involving every major political figure of the day. Although Cicero's defense failed, the published speech remains one of his finest, a fascinating document from a turbulent time, full of interest both historical and rhetorical. This edition, aimed at students and scholars alike, provides readers with the help that they need to appreciate the speech as a literary masterpiece and a historical text. Including a comprehensive introduction and a newly constituted Latin text, it provides detailed treatment of Cicero's language, style, and rhetorical techniques, as well as full discussion of the historical background and the larger social and

cultural issues relevant to the speech.

Topics in Pseudo-Differential Operators S D Zaidman,1996-10-29 This Research Note presents in a clear and detailed manner a certain group of results pertaining to some variants, extensions and generalizations on the theory of pseudo-differential operators as introduced in the pioneering work of Kohn-Nirenberg. The author presents a discussion of concepts of order, true order and asymptotic expansions for general linear operators in some vector spaces, following a pattern appearing in pseudo-differential operator theory. The book is intended mainly for an audience of operator theorists, at a fairly elementary level; its main objective a unitary presentation of articles written by the author over a number of years.
