Judy Gammelgaard

On Private Madness Andre Green,2018-03-22 The author occupies a unique position in psychoanalysis today, and his work represents a synthesis of the traditions of Lacan, Winnicott and Bion. This volume collects fourteen of his papers together with a substantial introduction. The papers range widely across clinical and theoretical issues including borderline states, the true and false self, and narcissism. On Private Madness has achieved the status of a modern psychoanalytic classic, and this new impression will be welcomed by all those admirers of the author who wish to have these seminal papers collected together.

The Evolution, Principles and Practices of Distance Education Börje Holmberg,2005 The evolution, principles and practices of distance education describes distance education as it is today and does so against the background of its history. Basic concerns are how the constituent elements of distance education, i.e. subject-matter presentation and interaction, have been brought about at different stages in this history and what their character has been and is. Thus online conferences and other possibilities opened by modern technology are given attention in the presentation of today's practice. So are theoretical approaches to the subject and the application of these to the practice of distance education. The discussion of student's independence in distance education is thus followed from Hermod and Lighty to Peters. The everyday concerns of distance educators are further carefully dealt with. This book summarises and updates the author's earlier writings at the same time as it pays attention to the evolutionary development of distance education. It is based on the literature available and empirical studies made as well as on the author's practical experience. engl.

Betweenity Judy Gammelgaard,2018-09-03 From its inception psychoanalysis has sought to effect a cure through the therapeutic relationship between analyst and analysand. Betweenity looks at what happens when the established framework of the psychoanalytic process is challenged by those with borderline personalities. In this book Judy Gammelgaard looks at how we might understand the analysand who is unable to engage with therapy and how we might bring them to a point where they are able to do so. Areas of discussion include: the border between psychiatry and psychoanalysis early mother-child relationships the splitting of the ego. This book will be essential reading for all psychoanalysts, psychotherapists and practitioners wishing to learn more about working with borderline personality structures and disorders.

The International Security Environment Arthur P. Sullivan,2015 World events since late 2013 have led some observers to conclude that the international security environment is undergoing a shift from the familiar post-Cold War era of the last 20-25 years, also sometimes known as the unipolar moment (with the United States as the unipolar power), to a new and different strategic situation that features, among other things, renewed great power competition and challenges to elements of the U.S.- led international order that has operated since World War II. A shift in the international security environment could have significant implications for U.S. defense plans and programs. This book discusses potential implications for defence and issues for Congress that arise with a shift in the international security environment. It also examines outcomes and key challenges of NATO's Wales Summit; priorities for 21st century defence; and discusses the 2014 Quadrennial Defense Review and defense strategy.

Higher Education in Developing Countries Task Force on Higher Education and Society,2000 Explores the current crisis in higher education in developing countries and outlines a coherent vision of future progress. Authored by a body of experts from 13 countries convened by the World Bank and UNESCO to explore the future of higher education in the developing world.
