PAT: Portable Appliance Testing Brian Scaddan, 2008-05-27 The Electricity at Work Regulations 1989 require any electrical system to be constructed, maintained and used in such a manner as to prevent danger. This means that inspection and testing of systems, including portable appliances, is needed in order to determine if maintenance is required. This book explains in clear language what needs to be done and includes expert advice on legislation as well as actual testing. The book contains an appendix providing the electrical fundamentals needed by non-specialists and also has sample questions (with answers) for the C&G 2377 exam that anyone who conducts this work is required to take by law. It is an affordable and handy reference for electricians who administer PAT. It is also an ideal refresher and revision guide for the non-specialist, such as maintenance staff, caretakers and charity shop volunteers who carry out these tasks part-time, alongside their many other duties. Brian Scaddan, I Eng, MIET, is a consultant for and an Honorary Member of City & Guilds. He has over 35 years' experience in Further Education and training. He is

Director of Brian Scaddan Associates Ltd, an approved City and Guilds and NICEIC training centre offering courses on all aspects of Electrical Installation Contracting including the C&G 2377 series. He is also a leading author of books on electrical installation.

The Case Against Adolescence Robert Epstein, 2007 This groundbreaking book argues that adolescence is an unnecessary period of life that people are better off without. Robert Epstein, former editor-in-chief of Psychology Today, shows that teen turmoil is caused by outmoded systems put into place a century ago which destroyed the continuum between childhood and adulthood. Where this continuum still exists in other countries, there is no adolescence. Isolated from adults, American teens learn everything they know from their media-dominated peers--the last people on earth they should be learning from, says Epstein. Epstein explains that our teens are highly capable--in some ways more capable than adults--and argues strongly against infantilizing young people. We must rediscover the adult in every teen, he says, by giving young people adult authority and responsibility as soon as they can demonstrate readiness. This landmark book will change the thinking about teens for decades to come.

Penetration Tester's Open Source Toolkit Jeremy Faircloth, Jay Beale, Roelof Temmingh, Haroon Meer, Charl van der Walt, HD Moore, 2006-01-11 Penetration testing a network requires a delicate balance of art and science. A penetration tester must be creative enough to think outside of the box to determine the best attack vector into his own network, and also be expert in using the literally hundreds of tools required to execute the plan. This book provides both the art and the science. The authors of the book are expert penetration testers who have developed many of the leading pen testing tools; such as the Metasploit framework. The authors allow the reader "inside their heads to unravel the mysteries of things like identifying targets, enumerating hosts, application fingerprinting, cracking passwords, and attacking exposed vulnerabilities. Along the way, the authors provide an invaluable reference to the hundreds of tools included on the bootable-Linux CD for penetration testing. * Covers both the methodology of penetration testing and all of the tools used by malicious hackers and penetration testers * The book is authored by many of the tool developers themselves * This is the only book that comes packaged with the Auditor Security Collection; a bootable Linux CD with over 300 of the most popular open source penetration testing tools

Software Quality Approaches: Testing, Verification, and Validation Michael Haug, Eric W. Olsen, Luisa Consolini, 2001-10-23 C. Amting
Directorate General Information Society, European Commission, Brussels
Under the 4 Framework of European Research, the European Systems and Software Initiative (ESSI) was part of the ESPRIT Programme. This initiative funded more than 470 projects in the area of software and system process improvements. The majority of these projects were process improvement experiments carrying out and taking up new development processes, methods and technology within the software development process of a company. In addition, nodes (centres of expertise), European networks (organisations managing local activities), training and dissemination actions complemented the process improvement experiments. ESSI aimed at improving the software development capabilities of European enterprises. It focused on best practice and helped European companies to develop world class skills and associated technologies to build the increasingly complex and varied systems needed to compete in the marketplace. The dissemination activities were designed to build a forum, at European level, to exchange information and knowledge gained within process improvement experiments. Their major objective was to spread the message and the results of experiments to a wider audience, through a variety of different channels. The European Experience Exchange (UR-X) project has been one of these dissemination activities within the European Systems and Software Initiative. (UR-X) has collected the results of practitioner reports from numerous workshops in Europe and presents, in this series of books, the results of Best Practice achievements in European Companies over the last few years.
