The People's Liberation Army and Contingency Planning in China Arthur S. Ding, Phillip C. Saunders, Scott W. Harold, 2019-02-17 All militaries have a responsibility to plan for contingencies, and China's military, the People's Liberation Army (PLA), is no exception. PLA contingency planning takes place primarily within the General Staff Department's (GSD's) First Department, also known as the GSD Operations Department. China's seven military regions participate in drafting and reviewing the plans relevant to their areas of responsibility, albeit under heavy supervision from the GSD. U.S. joint doctrine defines a contingency as a situation that likely would involve military forces in response to natural and manmade disasters, terrorists, subversives, military operations by foreign powers, or other situations. U.S. doctrine distinguishes between deliberate planning (advance preparation of campaign and contingency plans in non-crisis situations) and crisis action planning in response to a developing incident or situation). Deliberate planning is typically used to develop campaign and contingency plans for a broad range of activities based on requirements identified in strategic guidance for military commanders. Crisis action planning is conducted with less advance warning (hours, days, or up to 12 months) and focuses on developing alternative courses of action or refining existing campaign or contingency plans to adapt to current circumstances. A New Direction for China's Defense Industry Evan S. Medeiros, Roger Cliff, Keith Crane, James C. Mulvenon, 2005-12-19 Since the early 1980s, a prominent and consistent conclusion drawn from research on China's defense-industrial complex has been that China's defense-production capabilities are rife with weaknesses and limitations. This study argues for an alternative approach: From the vantage point of 2005, it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense-industrial complex. The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that, in the short term, are relevant to a possible conflict over Taiwan but also to China's long-term military presence in Asia. Part of a larger RAND Project AIR FORCE study on Chinese military modernization, this study examines the current and future capabilities of China's defense industry. The goals of this study are to 1.

Chinese Military Reform in the Age of Xi Jinping: Drivers, Challenges, and Implications Joel Wuthnow, Phillip Charles Saunders, China's People's Liberation Army (PLA) has embarked on its most wide-ranging and ambitious restructuring since 1949, including major changes to most of its key organizations. The restructuring reflects the desire to strengthen PLA joint operation capabilities- on land, sea, in the air, and in the space and cyber domains. The reforms could result in a more adept joint warfighting force, though the PLA will continue to face a number of key hurdles to effective joint operations, Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability. The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party (CCP) organs within the military. Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors. The restructuring could create new opportunities for U.S.-China military contacts.

Understanding China's Behaviour in the South China Sea Klaus Heinrich Raditio,2018-08-25 This book analyses the origins of security dilemmas in the South China Sea (SCS) and the significance of China's actions in asserting its claim from the perspective of defensive realist theory. In its analysis, the book argues that security dilemmas in the SCS first arose between China and other SCS claimants, and then between China and the United States. Research in this book provides significant support to the defensive realist theory vis-à-vis offensive realism. It encourages adopting a reassurance policy to reach a peaceful resolution to the SCS disputes between China, the other claimants, and the United States. The book will be useful for policymakers, academics, researchers and students.

Migrant Conversions Erica Vogel,2020-03-10 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Peruvian migrant workers began arriving in South Korea in large numbers in the mid 1990s, eventually becoming one of the largest groups of non-Asians in the country. Migrant Conversions shows how despite facing unstable income and legal exclusion, migrants come to see Korea as an ideal destination. Some even see it as part of their divine destiny. Faced with looming departures, Peruvians develop cosmopolitan plans to transform themselves from economic migrants into pastors, lovers, and leaders. Set against the backdrop of 2008's global financial crisis, Vogel explores the intersections of three types of conversions— money, religious beliefs and cosmopolitan plans—to argue that conversions are how migrants negotiate the meaning of their lives in a constantly changing transnational context. At the convergence of cosmopolitan projects spearheaded by the state, churches, and other migrants, Peruvians change the value and meaning of their migrations. Yet, in attempting to make themselves at home in the world and give their families more opportunities, they also create potential losses. As Peruvians help carve out social spaces, they create complex and uneven connections between Peru and Korea that challenge a global hierarchy of nations and migrants. Exploring how migrants, churches and nations change through processes of conversion reveals how globalization continues to impact people's lives and ideas about their futures and pasts long after they have stopped moving, or that particular global moment has come to an end.

The Wisdom of Zhuang Zi on Daoism Zhuangzi,2008 Throughout the years there have been several editions of Zhuang Zi's book with significant differences in certain parts of the text. Not every word in the book came from Zhuang Zi's pen. Contributions were made by his disciples and there have been many changes to the original text: errors in hand copying the text, in mistaking notations for text, and in outright forgery

Crossing Empire's Edge Erik Esselstrom, 2008-10-31 For more than half a century, the Japanese Ministry of Foreign Affairs (Gaimusho) possessed an independent police force that operated within the space of Japan's informal empire on the Asian continent. Charged with protecting and controlling local Japanese communities first in Korea and later in China, these consular police played a critical role in facilitating Japanese imperial expansion during the late nineteenth and twentieth centuries. Remarkably, however, this police force remains largely unknown. Crossing Empire's Edge is the first book in English to reveal its complex history. Based on extensive analysis of both archival and recently published Japanese sources, Erik Esselstrom describes how the Gaimusho police became deeply involved in the surveillance and suppression of the Korean independence movement in exile throughout Chinese treaty ports and the Manchurian frontier during the 1920s and 1930s. It had in fact evolved over the years from a relatively benign public security organization into a full-fledged political intelligence apparatus devoted to apprehending purveyors of dangerous thought throughout the empire. Furthermore, the history of consular police operations indicates that ideological crime was a borderless security problem; Gaimusho police worked closely with colonial and metropolitan Japanese expansionism by highlighting the transnational links between consular, colonial, and metropolitan policing of subversive political movements during the prewar and wartime eras. In addition, by illuminating the fervor with which consular police often pressed for unilateral solutions to Japan's political security crises on the continent, he challenges orthodox understandings of the relationship between civil and military institutions within the imperial Japanese state. While historians often still depict the Gaimusho as an inhibitor of unilateral military expansionism during the first half of the twentieth century, Esselstrom's exposé on the activities

Chinese Lessons from Other Peoples' Wars Andrew Scobell, David Lai, Roy Kamphausen, 2019-07-24 The importance of China stems not only from its current international role and its influence on the Asia-Pacific region in particular, but also because China's impact on global developments will likely continue to grow. One of our enduring imperatives is to accurately survey China's experiences as a means to grasp its existing perceptions, motivations, and ambitions. More than ever, solid, evidence-based evaluation of what the PLA has learned from the use of force and conflict elsewhere in the world is needed to shed light on the prospects for its cooperation, or rivalry, with the international community. This volume provides unique, valuable insights on how the PLA has applied the lessons learned from others' military actions to its own strategic planning.

Low-Enthalpy Geothermal Resources for Power Generation D. Chandrasekharam, Jochen Bundschuh, 2008-07-01 In many developing countries the exponentially growing electricity demand can be covered by using locally available, sustainable low-enthalpy geothermal resources (80-150 °C). Such low-enthalpy sources can make electricity generation more independent from oil imports or from the over-dependence on hydropower. Until now this huge energy resource has only been used by some developed countries like the USA, Iceland and New Zealand. The reason why low-enthalpy geothermal resources are not used for electricity generation is that there is still a misconception that low-enthalpy thermal fluids are fit only for direct application. The advancement of drilling technology, development of efficient heat exchangers and deployment of high sensitive binary fluids contribute to the useful application of this energy resource on a much wider scale. This book focuses on all aspects of low enthalpy geothermal thermal fluids. It will be an important source book for all scientists working on geothermal energy development. Specifically those involved in research in developing countries rich in such thermal resources, and for agencies involved in bilateral and international cooperation.

Assessing the People's Liberation Army in the Hu Jintao Era Roy Kamphausen, David Lai, Travis Tanner, 2014-06-14 It is my pleasure to introduce this 2013 publication by the Strategic Studies Institute (SSI) of the U.S. Army War College, the National Bureau of Asian Research (NBR), and the United States Pacific Command, focusing on A Retrospective of the People's Liberation Army in the Hu Jintao Era (2002-12). The papers in this book provide a valuable and insightful review of the People's Liberation Army's (PLA) many impressive advances over the past decade. Solid scholarship on changes taking place in the PLA helps us understand how the Chinese view the employment of military power to support broader policy aims. A historical review of patterns and developments in training, operations, acquisitions, and political military relations can greatly assist that understanding. The outstanding work in this jointly sponsored study is an important contribution toward this end. This volume provides unique insights into the PLA's achievements over the span of Hu Jintao's tenure...
