The Chinese Navy ,

Not Congruent But Quite Complementary Lyle Goldstein,2012 This volume is the result of the China Maritime Studies Institute's annual conference in Newport during May 2010, which involved the participation of almost a dozen Chinese specialist presenters, who were able to exchange ideas with their American counterparts.--p. 2

Ocean Thermal Energy Conversion (OTEC) Albert S. Kim,Hyeon-Ju Kim,2020-05-13 The 21st century is characterized as an era of natural resource depletion, and humanity is faced with several threats due to the lack of food, energy, and water. Climate change and sea-level rise are at unprecedented levels, being phenomena that make predicting the future of ocean resources more complicated. Oceans contain a limitless amount of water with small (but finite) temperature differences from their surfaces to their floors. To advance the utilization of ocean resources, this book readdresses the past achievements, present developments, and future progress of ocean thermal energy, from basic sciences to sociology and cultural aspects.

Assessing the People's Liberation Army in the Hu Jintao Era Roy Kamphausen,David Lai,Travis Tanner,2014-06-14 It is my pleasure to introduce this 2013 publication by the Strategic Studies Institute (SSI) of the U.S. Army War College, the National Bureau of Asian Research (NBR), and the United States Pacific Command, focusing on A Retrospective of the People's Liberation Army in the Hu Jintao Era (2002-12). The papers in this book provide a valuable and insightful review of the People's Liberation Army's (PLA) many impressive advances over the past decade. Solid scholarship on changes taking place in the PLA helps us understand how the Chinese view the employment of military power to support broader policy aims. A historical review of patterns and developments in training, operations, acquisitions, and political military relations can greatly assist that understanding. The outstanding work in this jointly sponsored study is an important contribution toward this end. This volume provides unique insights into the PLA's achievements over the span of Hu Jintao's tenure...

The People's Liberation Army and Contingency Planning in China Arthur S. Ding,Phillip C. Saunders,Scott W. Harold,2019-02-17 All militaries have a responsibility to plan for contingencies, and China's military, the People's Liberation Army (PLA), is no exception. PLA contingency planning takes place primarily within the General Staff Department's (GSD's) First Department, also known as the GSD Operations Department. China's seven military regions participate in drafting and reviewing the plans relevant to their areas of responsibility, albeit under heavy supervision from the GSD. U.S. joint doctrine defines a contingency as a situation that likely would involve military forces in response to natural and manmade disasters, terrorists, subversives, military operations by foreign powers, or other situations. U.S. doctrine distinguishes between deliberate planning (advance preparation of campaign and contingency plans in non-crisis situations) and crisis action planning (rapid planning in response to a developing incident or situation). Deliberate planning is typically used to develop campaign and contingency plans for a broad range of activities based on requirements identified in strategic guidance for military commanders. Crisis action planning is conducted with less advance warning (hours, days, or up to 12 months) and focuses on developing alternative courses of action or refining existing campaign or contingency plans to adapt to current circumstances. Why publish a book you can download for free? We print this book so you don't have to. Some documents are only available in electronic format. The print versions may be 6 inch by 9 inch (or smaller) so they are difficult to read. We print books a full 8 1/2 inches by 11 inches with large text and wide margins so you can jot down notes. Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. We publish short-run books (limited numbers) so they are not the least expensive available. However, we strive to issue a high-quality product with large text that is clear and crisp. Of course, color printing is expensive, so we pass that cost along to the customer. 4th Watch Publishing is a Service Disabled Veteran Owned Small Business (SDVOSB) located in a HUBZONE. Feel free to contact me if there is a government publication you want to see printed. Our web site is: usgovpub.com

Shaping China's Security Environment Andrew Scobell,Larry M. Wortzel,Strategic Studies Institute,2014-06-26 This is the eighth volume on the People's Liberation Army (PLA) to be published by the Strategic Studies Institute. It is the product of a conference held at Carlisle Barracks, Pennsylvania, from September 23-25, 2005, to examine the PLA and the global security environment in which it operates. This gathering was the 18th in a series of annual conferences on China's PLA. I have been privileged to be involved with and/or attend most of these gatherings over the years. At the 2005 conference, I was honored to deliver the keynote address in which I offered some of my insights and observations about China derived from a lifetime of living in or working on the Middle Kingdom. More than 50 experts on China participating in this conference provided critical comments and guidance on the initial drafts of the chapters included in this volume.

A Concise History of Modern Korea Michael J. Seth,2010 This comprehensive and balanced history of modern Korea explores the social, economic, and political issues it has faced since being catapulted into the wider world at the end of the nineteenth century. Placing this formerly insular society in a global context, Michael J. Seth describes how this ancient, culturally and ethnically homogeneous society first fell victim to Japanese imperialist expansionism, and then was arbitrarily divided in half after World War II. Seth traces the postwar paths of the two Koreas with different political and social systems and different geopolitical orientations as they evolved into sharply contrasting societies. South Korea, after an unpromising start, became one of the few postcolonial developing states to enter the ranks of the first world, with a globally competitive economy, a democratic political system, and a cosmopolitan and dynamic culture. By contrast, North Korea became one of the world's most totalitarian and isolated societies, a nuclear power with an impoverished and famine-stricken population. Considering the radically different and historically unprecedented trajectories of the two Koreas, Seth assesses the insights they offer for understanding not only modern Korea but the broader perspective of world history.

Chinese Military Modernization and Force Development Anthony H. Cordesman, Ashley Hess, Nicholas S. Yarosh, 2013-10-22 This report from the CSIS Burke Chair in Strategy examines trends in Chinese strategy, military spending, and military forces based on Chinese defense white papers and other official Chinese sources; US reporting by the Department of Defense and other defense agencies; and other government sources, including Japanese and Korean defense white papers and the International Monetary Fund.

Japan's Reluctant Realism M. Green, 2001-05-17 In *Japan's Reluctant Realism*, Michael J. Green examines the adjustments of Japanese foreign policy in the decade since the end of the Cold War. Green presents case studies of China, the Korean peninsula, Russia and Central Asia, Southeast Asia, the international financial institutions, and multilateral forums (the United Nations, APEC, and the ARF). In each of these studies, Green considers Japanese objectives; the effectiveness of Japanese diplomacy in achieving those objectives; the domestic and exogenous pressures on policy-making; the degree of convergence or divergence with the United States in both strategy and implementation; and lessons for more effective US - Japan diplomatic cooperation in the future. As Green notes, its bilateral relationship with the United States is at the heart of Japan's foreign policy initiatives, and Japan therefore conducts foreign policy with one eye carefully on Washington. However, Green argues, it is time to recognize Japan as an independent actor in Northeast Asia, and to assess Japanese foreign policy in its own terms.

Marine Niche: Applications in Pharmaceutical Sciences Neelam M Nathani, Chandrashekar Mootapally, Indra R. Gadhvi, Bharat Maitreya, Chaitanya G. Joshi, 2020-11-09 This book offers a comprehensive study of biological molecules acquired from marine organisms, which have been exploited for drug discovery with the aim to treat human diseases. Biomolecules have potential impacts on a diverse range of fields, including medical and pharmaceutical science, industrial science, biotechnology, basic research, molecular science, environmental science and climate change, etc. To understand and effectively apply medicinally important biomolecules, multidisciplinary approaches are called for. The ocean remains a rich biological resource, and the vast untapped potential of novel molecules from marine bio-resources has caught the interest of more and more researchers. These novel biological compounds have never been found in terrestrial or other ecosystems, but only in this rich niche. Advances in sampling techniques and technologies, along with increased funding for research and nature conservation, have now encouraged scientists to look deeper in the waters. Aquaculture supports both tremendous seafood production and the bulk production of marine-derived drugs. Furthermore, molecular methods are now being extensively employed to explore the untapped marine microbial diversity. With the help of molecular and biotech tools, the ability of marine organisms to produce new biosynthetic drugs can be greatly enhanced. This book provides an extensive compilation of the latest information on marine resources and their undisputedly vital role in the treatment of diverse ailments.

People's Liberation Army After Next Susan M Puska, 2012-08-01 An analytical schism has developed over differing assessments of China's military modernization. Underlying this debate are at least two key questions. First, will the ongoing China's People's Liberation Army (PLA) modernization provide China with significant offensive power projection and/or preemptive capability? If so, by when? Second, does the pace and success of China's military modernization constitute a threat to the United States and/or its friends and allies in the Asia-Pacific region? At the source of these differing views on the pace and likely success of the PLA modernization is a lack of hard evidence, aggravated by a Chinese tendency to conceal both strengths and weaknesses. There are also analysts who are locked into positions on the PLA that the evidence seems unable to alter. Lack of information is often muddled by anecdotal knowledge, sometimes provided by Chinese interlocutors, that may be impossible to confirm or refute. In addition, a large body of conventional wisdom about the PLA has built up over time, which may inhibit fresh reassessment. Finally, peer comparisons of the PLA to the U.S. military, which is without equal in the post-Cold War period, may shape analysis of the PLA's capabilities and shortfalls. As a result, conclusions about China's military modernization often leave considerable room for interpretation on any side of an argument. The policy decisions made today based in part on the absence of hard analysis will likely haunt U.S. and allied policy and interests well into the 21st century, as China's comprehensive strength and historic aspirations mature. In order to minimize miscalculations about the PLA modernization, debate is essential, for it can help reduce the twin analytical evils of overestimation and underestimation. Debate can reduce wishful thinking or demonization about China's strategic capability and intentions. It may also preclude counterproductive self-imposed constraints on U.S. policy options based on fear of self-fulfilling prophecies of a China threat. Active debate, finally, can lead to a reevaluation of old, well-worn assumptions, and spur greater exploitation of publicly available information about the PLA and China's national security. All of this would potentially help to develop a clearer picture of China's People's Liberation Army After Next into the 21st century.

The Arctic in World Affairs Oran R. Young, Washington Sea Grant Program, 1989 Considers the Arctic to shed light on generic questions pertaining to international cooperation as well as evaluating the prospects for international cooperation in the Arctic.

Ecstasy and the Demon Susan Manning, 2006 Mary Wigman, Germany's premier dancer between the two world wars, envisioned the performer in the thrall of ecstatic and demonic forces. Widely hailed as an innovator of dance modernism, she never acknowledged her complex relationship with National Socialism. In *Ecstasy and the Demon*, Susan Manning advances a sociological explanation for the collaboration between German modern dancers and National Socialism. She models methods for dance studies that contextualize choreography in relation to changing sociopolitical conditions, bringing dance scholarship into conversation with intellectual trends across the humanities. The introduction to this second edition brings Manning's groundbreaking work to bear on dance studies today and reconsiders Wigman's career from the perspective of queer theory and globalization, further illuminating the interplay of dance and politics in the twentieth century. Susan Manning is professor of English, theater, and performance studies at Northwestern University.

Chinese Strategy and Military Power in 2014 Anthony H. Cordesman, 2014-11-25 This report tracks and analyzes trends in Chinese military strategy, force structure, and regional activity. Chinese perspectives on their military's role and development are featured, as well as the views of other relevant regional actors.

China's Maritime Gray Zone Operations Andrew S. Erickson, Ryan D. Martinson, 2019-03-15 China's maritime "gray zone" operations represent a new challenge for the U.S. Navy and the sea services of our allies, partners, and friends in maritime East Asia. There, Beijing is waging what some Chinese sources term a "war without

gunsmoke.” Already winning in important areas, China could gain far more if left unchecked. One of China’s greatest advantages thus far has been foreign difficulty in understanding the situation, let alone determining an effective response. With contributions from some of the world’s leading subject matter experts, this volume aims to close that gap by explaining the forces and doctrines driving China’s paranaival expansion, operating in the “gray zone” between war and peace. The book covers China’s major maritime forces beyond core gray-hulled Navy units, with particular focus on China’s second and third sea forces: the “white-hulled” Coast Guard and “blue-hulled” Maritime Militia. Increasingly, these paranaival forces, and the “gray zone” in which they typically operate, are on the frontlines of China’s seaward expansion.

The Chinese Air Force Richard P. Hallion,Roger Cliff,Phillip C. Saunders,Center for the Study of Chinese Military Affairs (National Defense University),2012-10-03 Presents revised and edited papers from a October 2010 conference held in Taipei on the Chinese Air Force. The conference was jointly organized by Taiwan’s Council for Advanced Policy Studies, the Carnegie Endowment for International Peace, the U.S. National Defense University, and the RAND Corporation. This books offers a complete picture of where the Chinese air force is today, where it has come from, and most importantly, where it is headed.

Partnership for the Americas: Western Hemisphere Strategy and U.S. Southern Command James G. Stavridis,2014-02 Since its creation in 1963, United States Southern Command has been led by 30 senior officers representing all four of the armed forces. None has undertaken his leadership responsibilities with the cultural sensitivity and creativity demonstrated by Admiral Jim Stavridis during his tenure in command. Breaking with tradition, Admiral Stavridis discarded the customary military model as he organized the Southern Command Headquarters. In its place he created an organization designed not to subdue adversaries, but instead to build durable and enduring partnerships with friends. His observation that it is the business of Southern Command to launch ideas not missiles into the command's area of responsibility gained strategic resonance throughout the Caribbean and Central and South America, and at the highest levels in Washington, DC.

Naval Warfare, 1815-1914 Lawrence Sondhaus,2012-10-12 This book looks at the transition of wooden sailing fleets to the modern steel navy. It details the technological breakthroughs that brought about this change - steampower, armour, artillery and torpedoes, and looks at their affect on naval strategy and tactics. Part of the ever-growing and prestigious Warfare and History series, this book is a must for enthusiasts of military history.
