Ocean Thermal Energy Conversion (OTEC) Albert S. Kim, Hyeon-Ju Kim, 2020-05-13 The 21st century is characterized as an era of natural resource depletion, and humanity is faced with several threats due to the lack of food, energy, and water. Climate change and sea-level rise are at unprecedented levels, being phenomena that make predicting the future of ocean resources more complicated. Oceans contain a limitless amount of water with small (but finite) temperature differences from their surfaces to their floors. To advance the utilization of ocean resources, this book readdresses the past achievements, present developments, and future progress of ocean thermal energy, from basic sciences to sociology and cultural aspects.

**Echelon Defense** Ryan D. Martinson, 2018 This monograph examines China's approach to using sea power to defend and advance its maritime claims in the East China Sea and South China Sea. This approach, which Chinese strategists sometimes called echelon defense, involves the use of non-military instruments of sea power--especially maritime law enforcement forces--to vie with other states for control over disputed maritime space. These non-military forces operate on the first line (or echelon) of China's expanding frontier. Behind them, on the second line, China employs naval forces to deter foreign leaders from using force, thereby compelling them to compete on China's own terms. The echelon defense approach allows China to gradually achieve its objectives without risking a conflict or giving other great powers such as the United States sufficient grounds to intervene. Since 2006, when this approach was pioneered, it has enabled China to expand its influence and control in maritime East Asia. But it has also harmed China's relations with its neighbors and other great powers. Discover more products: Other products produced by the United States Navy, Naval War College (USNWC) can be found

*The People's Liberation Army and Contingency Planning in China* Arthur S. Ding, Phillip C. Saunders, Scott W. Harold, 2019-02-17 All militaries have a responsibility to plan for contingencies, and China's military, the People's Liberation Army (PLA), is no exception. PLA contingency planning takes place primarily within the General Staff Department's (GSD's) First Department, also known as the GSD Operations Department. China's seven military regions participate in drafting and reviewing the plans relevant to their areas of responsibility, albeit under heavy supervision from the GSD. U.S. joint doctrine defines a contingency as a situation that likely would involve military forces in response to natural and manmade disasters, terrorists, subversives, military operations by foreign powers, or other situations. U.S. doctrine distinguishes between deliberate planning (advance preparation of campaign and contingency plans in non-crisis situations) and crisis action planning (rapid planning in response to a developing incident or situation). Deliberate planning is typically used to develop campaign and contingency plans for a broad range of activities based on requirements identified in strategic guidance for military commanders. Crisis action planning is conducted with less advance warning (hours, days, or up to 12 months) and focuses on developing alternative courses of action or refining existing campaign or contingency plans to adapt to current circumstances. *China's Evolving Surface Fleet* Peter Dutton, Ryan D. Martinson, 2017 Over the past fifteen years, the People's Liberation Army Navy's (PLAN's) missile fast-attack craft and amphibious fleets have been significantly modernized. While these two types of vessels have not increased in numbers, their capabilities have increased exponentially. This publication examines the People's Liberation Army's (PLA's) doctrine and training strategy in order to analyze present and predict future missions by these military vessels. China's deterrence posture is improved greatly by these ships and boats, which aid coastal water defense, and threaten Taiwanese attempts to gain independence. In addition, these two fleets improve China's long-range sealift capabilities, and help with the PLA's traditional, and new, nontraditional security practices. These fleets allow the PLAN to continue offshore operations, and begin blue-water, or far-seas operations, helping the United States to predict the future

nature of Chinese maritime missions. **Nothing Is Impossible** Ted Osius, 2021-10-15 Today Vietnam is one of America's strongest international partners, with a thriving economy and a population that welcomes American visitors. How that relationship was formed is a twenty-year story of daring diplomacy and a careful thawing of tensions between the two countries after a lengthy war that cost nearly 60,000 American and more than two million Vietnamese lives. Ted Osius, former ambassador during the Obama administration, offers a vivid account, starting in the 1990s, of the various forms of diplomacy that made this reconciliation possible. He considers the leaders who put aside past traumas to work on creating a brighter future, including senators John McCain and John Kerry, two Vietnam veterans and ideological opponents who set aside their differences for a greater cause, and Pete Peterson—the former POW who became the first U.S. ambassador to a new Vietnam. Osius also draws upon his own experiences working first-hand with various Vietnamese leaders and traveling the country on bicycle to spotlight the ordinary Vietnamese people who have helped bring about their nation's extraordinary renaissance. With a foreword by former Secretary of State John Kerry, *Nothing Is Impossible* tells an inspiring story of how international diplomacy can create a better world.

*American Apocrypha* Dan Vogel, Brent Lee Metcalfe, 2002 In the preceding pages, I have tried to show how a historical-critical view of the Book of Mormon illuminates some of its more interesting problems. Many questions remain, and many problems have yet to be discovered and analyzed. I myself have questions about the Book of Mormon's origins that I cannot yet answer. However, that fact does not diminish the certainty of my conclusion that the Book of Mormon is a modern text.

**Chinese Military Reform in the Age of Xi Jinping: Drivers, Challenges, and Implications** Joel Wuthnow, Phillip Charles Saunders, China's People's Liberation Army (PLA) has embarked on its most wide-ranging and ambitious restructuring since 1949, including major changes to most of its key organizations. The restructuring reflects the desire to strengthen PLA joint operation capabilities—on land, sea, in the air, and in the space and cyber domains. The reforms could result in a more adept joint warfighting force, though the PLA will continue to face a number of key hurdles to effective joint operations. Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability. The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party (CCP) organs within the military. Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors. The restructuring could create new opportunities for U.S.-China military contacts.

**A New Direction for China's Defense Industry** Evan S. Medeiros, Roger Cliff, Keith Crane, James C. Mulvenon, 2005-12-19 Since the early 1980s, a prominent and consistent conclusion drawn from research on China's defense-industrial complex has been that China's defense-production capabilities are rife with weaknesses and limitations. This study argues for an alternative approach: From the vantage point of 2005, it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense-industrial complex. The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that, in the short term, are relevant to a possible conflict over Taiwan but also to China's long-term military presence in Asia. Part of a larger RAND Project AIR FORCE study on Chinese military modernization, this study examines the current and future capabilities of China's defense industry. The goals of this study are to 1.

**Understanding China's Behaviour in the South China Sea** Klaus Heinrich Radtke, 2018-08-25 This book analyses the origins of security dilemmas in the South China Sea (SCS) and the significance of China's actions in asserting its claim from the perspective of defensive realist theory. In its analysis, the book argues that security dilemmas in the SCS first arose between China and other SCS claimants, and then between China and the United States. Research in this book provides significant support to the defensive realist theory vis-à-vis offensive realism. It encourages adopting a reassurance policy to reach a peaceful resolution to the SCS disputes between China, the other claimants, and the United States. The book will be useful for policymakers, academics, researchers and students.

*Migrant Conversions* Erica Vogel, 2020-03-10 A free open access ebook is available upon publication. Learn more at [www.luminosoa.org](http://www.luminosoa.org). Peruvian migrant workers began arriving in South Korea in large numbers in the mid 1990s, eventually becoming one of the largest groups of non-Asians in the country. *Migrant Conversions* shows how despite facing unstable income and legal exclusion, migrants come to see Korea as an ideal destination. Some even see it as part of their divine destiny. Faced with looming departures, Peruvians develop cosmopolitan plans to transform themselves from economic migrants into pastors, lovers, and leaders. Set against the backdrop of 2008's global financial crisis, Vogel explores the intersections of three types of conversions—money, religious beliefs and cosmopolitan plans—to argue that conversions are how migrants negotiate the meaning of their lives in a constantly changing transnational context. At the convergence of cosmopolitan projects spearheaded by the state, churches, and other migrants, Peruvians change the value and meaning of their migrations. Yet, in attempting to make themselves at home in the world and give their families more opportunities, they also create potential losses. As Peruvians help carve out social spaces, they create complex and uneven connections between Peru and Korea that challenge a global hierarchy of nations and migrants. Exploring how migrants, churches and nations change through processes of conversion reveals how globalization continues to impact people's lives and ideas about their futures and lasts long after they have stopped moving, or that particular global moment has come to an end.

**An Introduction to Mormonism** Douglas J. Davies, 2003-10-23 Although one of the fastest growing religious movements in the world, the Church of Jesus Christ of Latter-day Saints remains a mystery in terms of its core beliefs and theological structure. This timely book provides an important introduction to the basic history, doctrines and practices of The LDS—the Mormon Church. Emphasizing sacred texts and prophecies as well as the crucial Temple rituals of endowments, marriage and baptism, it is written by a non-believer, who describes Mormonism in ways that non-Mormons can understand.

**Patriots, Traitors and Empires** Stephen Gowans, 2018 *Patriots, Traitors and Empires* is an account of modern Korean history, written from the point of view of those who fought to free their country from the domination of foreign

empires. It traces the history of Korea's struggle for freedom from opposition to Japanese colonialism starting in 1905 to North Korea's current efforts to deter the threat of invasion by the United States or anybody else by having nuclear weapons. Koreans have been fighting a civil war since 1932, when Kim Il Sung, founder of the Democratic People's Republic of Korea, along with other Korean patriots, launched a guerrilla war against Japanese colonial domination. Other Koreans, traitors to the cause of Korea's freedom, including a future South Korean president, joined the side of Japan's Empire, becoming officers in the Japanese army or enlisting in the hated colonial police force. From early in the 20th century when Japan incorporated Korea into its burgeoning empire, Koreans have struggled against foreign domination, first by Japan then by the United States. Patriots, Traitors and Empires, The Story of Korea's Struggle for Freedom is a much-needed antidote to the jingoist clamor spewing from all quarters whenever Korea is discussed.

**Ocean Biogeochemistry** Michael J.R. Fasham, 2012-12-06 Oceans account for 50% of the anthropogenic CO<sub>2</sub> released into the atmosphere. During the past 15 years an international programme, the Joint Global Ocean Flux Study (JGOFS), has been studying the ocean carbon cycle to quantify and model the biological and physical processes whereby CO<sub>2</sub> is pumped from the ocean's surface to the depths of the ocean, where it can remain for hundreds of years. This project is one of the largest multi-disciplinary studies of the oceans ever carried out and this book synthesises the results. It covers all aspects of the topic ranging from air-sea exchange with CO<sub>2</sub>, the role of physical mixing, the uptake of CO<sub>2</sub> by marine algae, the fluxes of carbon and nitrogen through the marine food chain to the subsequent export of carbon to the depths of the ocean. Special emphasis is laid on predicting future climatic change.

*Crossing Empire's Edge* Erik Esselstrom, 2008-10-31 For more than half a century, the Japanese Ministry of Foreign Affairs (Gaimusho) possessed an independent police force that operated within the space of Japan's informal empire on the Asian continent. Charged with protecting and controlling local Japanese communities first in Korea and later in China, these consular police played a critical role in facilitating Japanese imperial expansion during the late nineteenth and twentieth centuries. Remarkably, however, this police force remains largely unknown. *Crossing Empire's Edge* is the first book in English to reveal its complex history. Based on extensive analysis of both archival and recently published Japanese sources, Erik Esselstrom describes how the Gaimusho police became deeply involved in the surveillance and suppression of the Korean independence movement in exile throughout Chinese treaty ports and the Manchurian frontier during the 1920s and 1930s. It had in fact evolved over the years from a relatively benign public security organization into a full-fledged political intelligence apparatus devoted to apprehending purveyors of dangerous thought throughout the empire. Furthermore, the history of consular police operations indicates that ideological crime was a borderless security problem; Gaimusho police worked closely with colonial and metropolitan Japanese police forces to target Chinese, Korean, and Japanese suspects alike from Shanghai to Seoul to Tokyo. Esselstrom thus offers a nuanced interpretation of Japanese expansionism by highlighting the transnational links between consular, colonial, and metropolitan policing of subversive political movements during the prewar and wartime eras. In addition, by illuminating the fervor with which consular police often pressed for unilateral solutions to Japan's political security crises on the continent, he challenges orthodox understandings of the relationship between civil and military institutions within the imperial Japanese state. While historians often still depict the Gaimusho as an inhibitor of unilateral military expansionism during the first half of the twentieth century, Esselstrom's exposé on the activities and ideology of the consular police dramatically challenges this narrative. Revealing a far greater complexity of motivation behind the Japanese colonial mission, *Crossing Empire's Edge* boldly illustrates how the imperial Japanese state viewed political security at home as inextricably connected to political security abroad from as early as 1919—nearly a decade before overt military aggression began—and approaches northeast Asia as a region of intricate and dynamic social, economic, and political forces. In doing so, *Crossing Empire's Edge* inspires new ways of thinking about both modern Japanese history and the modern history of Japan in East Asia.

**Chinese Lessons from Other Peoples' Wars** Andrew Scobell, David Lai, Roy Kamphausen, 2019-07-24 The importance of China stems not only from its current international role and its influence on the Asia-Pacific region in particular, but also because China's impact on global developments will likely continue to grow. One of our enduring imperatives is to accurately survey China's experiences as a means to grasp its existing perceptions, motivations, and ambitions. More than ever, solid, evidence-based evaluation of what the PLA has learned from the use of force and conflict elsewhere in the world is needed to shed light on the prospects for its cooperation, or rivalry, with the international community. This volume provides unique, valuable insights on how the PLA has applied the lessons learned from others' military actions to its own strategic planning.

*The Ocean and Cryosphere in a Changing Climate* Intergovernmental Panel on Climate Change (IPCC), 2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. **Assessing the People's Liberation Army in the Hu Jintao Era** Roy Kamphausen, David Lai, Travis Tanner, 2014-06-14 It is my pleasure to introduce this 2013 publication by the Strategic Studies Institute (SSI) of the U.S. Army War College, the National Bureau of Asian Research (NBR), and the United States Pacific Command, focusing on A Retrospective of the People's Liberation Army in the Hu Jintao Era (2002-12). The papers in this book provide a valuable and insightful review of the People's Liberation Army's (PLA) many impressive advances over the past decade. Solid scholarship on changes taking place in the PLA helps us understand how the Chinese view the employment of military power to support broader policy aims. A historical review of patterns and developments in training, operations, acquisitions, and political military relations can greatly assist that understanding. The outstanding work in this jointly sponsored study is an important contribution toward this end. This volume provides unique insights into the PLA's achievements over the span of Hu Jintao's tenure...
