Red Plenty Francis Spufford,2012-02-14 Spufford cunningly maps out a literary genre of his own . . . Freewheeling and fabulous. -The Times (London) Strange as it may seem, the gray, oppressive USSR was founded on a fairy tale. It was built on the twentieth-century magic called the planned economy, which was going to gush forth an abundance of good things that the lands of

capitalism could never match. And just for a little while, in the heady years of the late 1950s, the magic seemed to be working. Red Plenty is about that moment in history, and how it came, and how it went away; about the brief era when, under the rash leadership of Khrushchev, the Soviet Union looked forward to a future of rich communists and envious capitalists, when Moscow would out-glitter Manhattan and every Lada would be better engineered than a Porsche. It's about the scientists who did their genuinely brilliant best to make the dream come true, to give the tyranny its happy ending. Red Plenty is history, it's fiction, it's as ambitious as Sputnik, as uncompromising as an Aeroflot flight attendant, and as different from what you were expecting as a glass of Soviet champagne.

Topgrading (revised PHP edition) Bradford D. Smart Ph.D., 2005-04-07 Great companies don't just depend on strategies—they depend on people. The more great people on your team, the more successful your organization will be. But that's easier said than done. Statistically, half of all employment decisions result in a mishire: The wrong person winds up in the wrong job. But companies that have followed Bradford Smart's advice in Topgrading have boosted their successful hiring rate to 90 percent or better, giving them an unbeatable competitive advantage. Now Smart has fully revised his 1999 management classic to reintroduce the topgrading concept, which works for companies large and small in any industry. The author spells out his practical approach to finding and managing A-level talent—as well as coaching B players to turn them into A players. He provides intriguing case studies drawn from more than four thousand in-depth interviews. As Smart writes in his introduction, "All organizations, all businesses live or die mostly on their talent, and any manager who fails to topgrade is nuts, or

a C player. . . . Those who, way deep down, would sooner see an organization die than nudge an incompetent person out of a job should not read this book... Topgrading is for A players and all those aspiring to be A players." On the web: <http://www.topgrading.com/>

No specimen left behind: mass digitization of natural history collections Vincent

Smith, 2012-07-20 Centuries of exploration and discovery have documented the diversity of life on Earth. Records of this biodiversity are, for the most part, distributed across varied and distinct natural history collections worldwide. This makes the task of extracting and mobilising the information within these collections an immense challenge. In this special issue of ZooKeys, 18 papers by 81 authors examine progress and prospects for mass digitising entire natural history collections. These papers provide a snapshot of activity, in what is a fast moving field that is seeing ever-increasing degrees of collaboration across disciplines and between collection-based institutions. Examples of research covered by these articles include a description to efforts digitise 30 million plant, invertebrate and vertebrate specimens at NCB Naturalis in the Netherlands; new scanning and telemicroscopy solutions to digitise the millions of pinned insect specimens held in the Australian National Insect Collection and its European and North American counterparts; citizen science projects being used to crowdsource the transcription of thousands of specimen labels and field notebooks; and new data portals providing central access to millions of biological specimens across Europe. Many of these projects deal with the unique challenges associated with major collections that have built up over several centuries, with different communities of practices and different user communities. Despite many differences, standards for collection acquisition, preservation and documentation are broadly consistent, meaning that there is sufficient common ground to bring together the enormous amounts of data that are being exposed through mass digitisation efforts. These data will become the new frontier for natural history collection management and research in the next decade.

The Omnivore's Dilemma Michael Pollan, 2007-08-28
Outstanding . . . a wide-ranging invitation to think through the moral ramifications of our eating habits. —The New Yorker One of the New York Times Book Review's Ten Best Books of the Year and Winner of the James Beard Award Author of *This is Your Mind on Plants*, *How to Change Your Mind* and the #1 New York Times Bestseller *In Defense of Food* and *Food Rules* What should we have for dinner? Ten years ago, Michael Pollan confronted us with this seemingly simple question and, with *The Omnivore's Dilemma*, his brilliant and eye-opening exploration of our food choices, demonstrated that how we answer it today may determine not only our health but our survival as a species. In the years since, Pollan's revolutionary examination has changed the way Americans think about food. Bringing wide attention to the little-known but vitally important dimensions of food and agriculture in America, Pollan launched a national conversation about what we eat and the profound consequences that even the simplest everyday food choices have on both ourselves and the natural world. Ten years later, *The Omnivore's Dilemma* continues to transform the way Americans think about the politics, perils, and pleasures of eating.

Handbook of Research on Emerging Business Models and the New World Economic Order Saiz-Alvarez, Jose Manuel, 2021-10-15 The COVID-19 pandemic is causing a radical change in both the economic and business paradigms that have ruled countries for decades. Emerging models are leading to a new world economic order predictably led by China and the United States. New forms of organization, new ways of working remotely, the strengthening of some industries to the detriment of others, and the supremacy of technology to be able to work are going to change the economies as we know them today. The Handbook of Research on Emerging Business Models and the New World Economic Order offers strategies, economic policies, social, economic, and political trends that will affect organizations to increase their efficiency and labor productivity and change the world's business and financial structures. This book forecasts future business changes and prospective models, structural or not, for guiding the survival of small and medium enterprises (SMEs), multinationals, family firms, entrepreneurs, and NGOs in the post-COVID-19 era. Covering topics such as business model creation, global sustainable logistics 4.0, and social and solidarity economy, this text is essential for economists, entrepreneurs, managers, executives, family firms, SMEs, business professionals, policymakers, students, researchers, practitioners, and academicians.
