Play Among Books Miro Roman,Alice_ch3n81,2021-12-06 How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an “infinite flow” of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.

The Evolving Curriculum in Interpreter and Translator Education David B. Sawyer, Frank Austermühl, Vanessa Enríquez Raído, 2019-06-15 The Evolving Curriculum in Interpreter and Translator Education: Stakeholder perspectives and voices examines forces driving curriculum design, implementation and reform in academic programs that prepare interpreters and translators for employment in the public and private sectors. The evolution of the translating and interpreting professions and changes in teaching practices in higher education have led to fundamental shifts in how translating and interpreting knowledge, skills and abilities are acquired in academic settings. Changing conceptualizations of curricula, processes of innovation and reform, technology, refinement of teaching methodologies specific to translating and interpreting, and the emergence of collaborative institutional networks are examples of developments shaping curricula. Written by noted stakeholders from both employer organizations and academic programs in many regions of the world, the timely and useful contributions in this comprehensive, international volume describe the impact of such forces on the conceptual foundations and frameworks of interpreter and translator education.

Analysis of Machining and Machine Tools Steven Liang, Albert J. Shih, 2015-12-29 This book provides readers with the fundamental, analytical, and quantitative knowledge of machining process planning and optimization based on advanced and practical understanding of machinery, mechanics, accuracy, dynamics, monitoring techniques, and control strategies that they need to understanding machining and machine tools. It is written for first-year graduate students in mechanical engineering, and is also appropriate for use as a reference book by practicing engineers. It covers topics such as single and multiple point cutting processes; grinding processes; machine tool components, accuracy, and metrology; shear stress in cutting, cutting temperature and thermal analysis, and machine tool chatter. The second section of the book is devoted to “Non-Traditional Machining,” where readers can find chapters on electrical discharge machining, electrochemical machining, laser and electron beam machining, and biomedical machining. Examples of realistic problems that engineers are likely to face in the field are included, along with solutions and explanations that foster a didactic learning experience.

Representations of Semisimple Lie Algebras in the BGG Category \mathcal{O} James E. Humphreys, 2021-07-14 This is the first textbook treatment of work leading to the landmark 1979 Kazhdan-Lusztig Conjecture on characters of simple highest weight modules for a semisimple Lie algebra \mathfrak{g} over \mathbb{C} . The setting is the module category \mathcal{O} introduced by Bernstein-Gelfand-Gelfand, which includes all highest weight modules for \mathfrak{g} such as Verma modules and finite dimensional simple modules. Analogues of this category have become influential in many areas of representation theory. Part I can be used as a text for independent study or for a mid-level one semester graduate course; it includes exercises and examples. The main prerequisite is familiarity with the structure theory of \mathfrak{g} . Basic techniques in category \mathcal{O} such as BGG Reciprocity and Jantzen's translation functors are developed, culminating in an overview of the proof of the Kazhdan-Lusztig Conjecture (due to Beilinson-Bernstein and Brylinski-Kashiwara). The full proof however is beyond the scope of this book, requiring deep geometric methods: D -modules and perverse sheaves on the flag variety. Part II introduces closely related topics important in current research: parabolic category \mathcal{O} , projective functors, tilting modules, twisting and completion functors, and Koszul duality theorem of Beilinson-Ginzburg-Soergel.

The Online Advertising Playbook Joe Plummer, Stephen D. Rappaport, Taddy Hall, Robert Barocci, 2007-07-20 Praise for The Online Advertising Playbook Finally, someone has documented all we know about online advertising and how to do it right. As much as this confirms that online advertising really works, we know that marketers don't always get it right. The ARF's The Online Advertising Playbook provides critical insight on what sticks and what doesn't in online advertising and marketing. —Greg Stuart, CEO and President, Interactive Advertising Bureau and coauthor of What Sticks The Online Advertising Playbook's principles, case studies, and strategic insights equip marketers with the best knowledge available. It will help your online advertising achieve the full range of marketing objectives, from lead generation and customer acquisition to driving trial and loyalty. —Tim Kopp, Vice President, Global Interactive Marketing, The Coca-Cola Company To grow interactive marketing from here we need to institutionalize our wisdom and experience about what works. This book explains, in a disciplined way, what marketers have learned from a decade of massive change. —Ted McConnell, Interactive Innovation Director, Procter & Gamble The Online Advertising Playbook is a milestone in the maturation of interactive advertising, but also an invaluable go-to guide for managers trying to make smart decisions with their advertising budgets. —Van Riley, Vice President of Research, AOL The best marketing communication is spawned from what I call 'informed intuition.' After reading The Online Advertising Playbook, I am far better informed on how to optimize the online channel in our advertising and promotional programs. It's a perfect blend of case studies and research-backed learning. —Rod DeVar, Manager, Advertising and Promotion, United States Postal Service Savvy marketers should take advantage of The Online Advertising Playbook's findings and principles to get real results. —Chris Theodoros, Director of Industry Relations, Google A work of wisdom and rigor in the digital space that is as relevant for the newbie as it is for the digerati. —Mike Donahue, Executive Vice President, American Association of Advertising Agencies This is a must-read for any marketing executive involved in online advertising. It's high time that a book looks at online advertising in the context of an integrative promotional strategy, one meant to set objectives, establish creative strategies, and measure results. The book nicely ties the various components of online advertising to relevant case studies, and the emphasis on measurement and results is refreshing. Not only is it relevant for marketing executives, it would also be a good basic text for any Internet advertising course and a good adjunct

to any Internet marketing course. –Henry Assael, Professor of Marketing, Stern School of Business, New York University
