### **Libraries Supporting Online Learning Christina D.**

Mune, 2020-10-07 Using practical examples from librarians in the field, this book lays out current issues in online learning and teaches librarians how to adapt a variety of library services—including instruction, reference, and collection development—to online education. Recent studies highlighting the challenges faced by online learners show that skills librarians are uniquely qualified to teach, such as information and digital literacy and source evaluation, can improve academic performance in online courses and enhance the online learning experience. Just as embedded librarianship was developed to answer the needs of online courses when they emerged in the early 2000s, online learning librarian Christina Mune now teaches online librarianship as a set of realistic strategies for serving a variety of online

education models. Each chapter of *Libraries Supporting Online Learning* addresses a different strategy for supporting online students and/or faculty, with all strategies derived from real-world practices. Librarians will find information on best practices for creating digital literacy tutorials and dynamic content, providing patrons with open access and open educational resources, helping patrons to avoid copyright issues, promoting peer-to-peer learning and resource sharing, posting to social media, and developing scalable reference services. The tools and practical examples in this book will be useful for all educators interested in increasing the efficacy of online learning.

**Create to Learn** Renee Hobbs, 2017-06-22 Want to learn something well? Make media to advance knowledge and gain new ideas. You don't have to be a communication professional to create to learn. Today, with free and low-cost digital tools, everyone can compose videos, blogs and websites, remixes, podcasts, screencasts, infographics, animation, remixes and more. By creating to learn, people internalize ideas and express information creatively in ways that may inspire others. *Create to Learn* is a ground-breaking book that helps learners create multimedia texts as they develop both critical thinking and

communication skills. Written by Renee Hobbs, one of the foremost experts in media literacy, this book introduces a wide range of conceptual principles at the heart of multimedia composition and digital pedagogy. Its approach is useful for anyone who sees the profound educational value of creating multimedia projects in an increasingly digital and connected world. Students will become skilled multimedia communicators by learning how to gather information, generate ideas, and develop media projects using contemporary digital tools and platforms. Illustrative examples from a variety of student-produced multimedia projects along with helpful online materials offer support and boost confidence. Create to Learn will help anyone make informed and strategic communication decisions as they create media for any academic, personal or professional project.

*Multimedia Reporting* Richard Scott Dunham, 2019-08-02 This is the first book to apply multimedia tools to economic and business storytelling. By examining the journalism essentials as well as the advanced multimedia skills, it helps readers use the latest technological tools to integrate multimedia elements into traditional news coverage. It also explains how to tell stories solely through multimedia elements. The new language of online

journalism includes writing for digital platforms, writing blogs and writing for social media and involves a wide range of multimedia skills, like video, audio, photography, graphics, data visualization and animation. Multimedia journalism allows a two-way communication with the audience that was not possible in traditional “legacy” media, and this textbook is replete with links to useful tutorials, examples of award-winning multimedia stories, and advanced digital resources, offering journalists a road map to the brave new world of digital reporting and editing.

**Postphenomenology and Imaging** Samantha J. Fried, Robert Rosenberger, 2021-07-12 This edited collection explores the distinctive contributions of postphenomenological perspectives toward imaging in science, medicine, and everyday life. With its original empirical investigations of imaging across a variety of fields, the book expands our conceptual framework for understanding images.

**The Ultimate Mac User Book** Tetiana Hanchar, 2020-03-16 Master a Mac without jargon and complications. Once you go Mac, you never go back. And if you have this book, you’ll be more than happy to never go back. In The Ultimate Mac User Book, we’ve

made a bold attempt to unveil an ideal Mac setup that works for anyone. Whether you're switching from Windows or want to upgrade your knowledge of macOS, this is for you Here's what you'll learn from the book: - The anatomy of Mac's interface. How to set up your new Mac for years of use. - Basic and advanced shortcuts for all jobs on Mac. - Alternatives to popular Windows apps. - Ready-to-use workflows for writers, designers, developers, students, as well as people of any profession who want to hit new productivity milestones on Mac. - 20 hacks every seasoned Mac user should be using (but only a few actually do) in the bonus chapter. Reliable and intuitive, Macs still require a certain level of tech fluency. The family of Apple's Macintosh operating systems is very versatile, with tons of features and enhancements built on top of each other. Navigating through all of them can be complicated. Especially if you're a new user. Especially if you have no time to figure out how things work — you just want them to work. Hope we'll solve the problem for you with this book.

*Control Alt Achieve* Eric Curts,2020-05-10 Transform Your Classroom with Tech Tools You Already Know With Control Alt Achieve, educational-technology wizard Eric Curts offers you the keys to revolutionizing classroom learning with the Google tools

you already use. Dazzle your students by transforming Google Docs into blackout poetry, fire up creative possibilities by using Google Slides for comic strips, and make math more accessible--and fun--by turning to Google Drawings as an unlikely ally. With Eric as your guide to the technological horizons of Google tools, the possibilities are endless. With the step-by-step and easy-to-follow directions in *Control Alt Achieve*, you'll learn how to use common digital tools in unexpected ways. Whether you're new to technology or have been using Google tools for years, Eric Curts will help you innovate as you educate with ready-to-use activities that will reboot--and transform--your classroom. Reading this book is like sitting in on a presentation from one of educational technology's best presenters. Eric's writing reminds me of his sessions: comfortable and accessible for new tech users, while still valuable for experienced users. Jake Miller, @JakeMillerTech, host of The Educational Duct Tape Podcast *Control Alt Achieve* provides both practical and pedagogical strategies that go way beyond simple technology integration. This is a great handbook for any teacher looking to go beyond the how-to and shift toward a learning transformation. Ken Shelton, [kennethshelton.net](http://kennethshelton.net) In this book, Eric has created a powerful method for meaningfully

integrating technology into teaching and learning. His unique way of crafting technology-rich experiences will allow anyone from a novice techie to an edtech expert the ability to control, alt, achieve! Michael Cohen, the Tech Rabbi, creativity instigator and author of Educated by Design

*How to Build Your Own Web Site with Little Or No Money*

Bruce Cameron Brown, Brown, 2010 Web sites are an essential tool that every business must have in today's economy. Only 15 years ago, you could count the number of Web sites in the world with five or six digits; today there are between 15 and 30 billion active Web sites and millions more being added every day. Creating a Web site can be a great way to market a new product, promote your business plan, promote yourself, or simply share a few details about your life with the world. The cost of creating a Web site has risen right alongside the number of Web sites created though and many people are nervous about being able to utilise this revolutionary medium without breaking the bank. This book has been created for just such people, outlining for you in perfect detail everything you need to know to create a traffic attracting Web site, while spending little or no money at all. There are countless resources available, and when you put them all together, they

provide a complete toolkit that can make anyone a top notch Web site in no time flat. You will learn how to buy a domain name and host your Web site for less than \$15, with no additional fees charged to your account. You will learn how to use open source software like Wordpress, Joomla, and Mambo to create a platform on which you can build anything you want. You will learn how blogging has made Web site creation easier than ever and how sites like Squidoo, Facebook, and MySpace allow you more freedom to build traffic and draw more attention to what you are advertising at any given time. You will learn how to use common software to edit and tweak your Web sites and how to read the basic code that all Web sites are created in. In addition, an entire chapter is devoted to teaching you how to promote your Web site and draw traffic to it, without spending a dime in the process. You will learn why information is the most valuable asset on the market and how you can become an expert in a niche of your choosing, making money to cover any fees associated with your Web site. With the added resource of hours of interviews with web professionals you will learn which free resources not to use and which ones to outright avoid, as well as how to find and install open source modules and tools to enhance the look and feel of

your site. You will learn where you can find copyright-free images to use on your Web sites and how to get free copy that will draw traffic and entertain your visitors. You will learn how to keep a free Web site from falling into the traps the major search engines set to stop spam and ultimately how to leverage new friends, business contacts, and interactions out of your Web site. If you are now, or have ever, considered starting your own Web site before, this book will map the way for you.

The End of Refuge Beth Martin,2022-08-15 The only thing

worse than living in a bomb shelter is dying there. Isolated from the rest of the world, the inhabitants of the shelter called Refuge have been trapped underground for over 20 years. At 19, Juliet has always called Refuge home. Despite her atypical surroundings, she strives to live a normal life. She just finished school, started a new job, and fell into her first romance. But when she receives a message from outside the shelter, her life begins to crumble. The safe haven she believed in is a lie and her future is doomed. The end is coming and she can't stop it.

**Advancing the Story** Debora Halpern Wenger, Deborah Potter, 2018-08-17 Updated Edition of Bestseller! It's a multimedia world, and today's journalists must develop a multimedia mindset. How does this way of thinking change the newsgathering and news production processes? Having conceived of and written their book

in this changed media landscape, broadcast veterans Debora Halpern Wenger and Deborah Potter seamlessly build on the fundamentals of good news reporting while teaching students to use depth, interactivity and immediacy as they maximize the advantages of each platform. While retaining the book's clear instruction and advice from those in the trenches, *Advancing the Story*, Fourth Edition has been updated to reflect the latest issues and trends with: greater emphasis on social media and mobile media to gather, promote and disseminate news content; expanded coverage of media ethics and media law; extended examples of effective reporting across multiple platforms; updated writing exercises and new resources for reviewing AP style; and additional interviews with journalists at the forefront of industry changes.

*Simple Money, Rich Life* Bob Lotich, 2022-04-26 A hope-filled money guide to increase savings, earnings, and giving and actually enjoy it all while designing a life of freedom and eternal impact, from the founder of SeedTime Money. Broken down and stranded 1,000 miles from home with only \$7 left in his bank account, Bob Lotich had reached his breaking point. He was stuck in a dead-end job, living paycheck-to-paycheck, and overwhelmed by debt. Bob had been following the world's advice with money and this was the

fruit of it. In desperation, he cried out to God for wisdom, for a different way. The answer was a simple four-part formula, one based on timeless biblical principles, and, most important, it worked. After applying this simple formula, Bob discovered that his financial stress melted away and he finally felt fully in control of his money. As he continued to follow the four steps, he paid off over \$400,000 in debt, reached a personal goal of giving \$1 million by age 40, and achieved a level of financial freedom he never dreamed possible. In his casual and approachable style, Bob (along with his fun-loving wife, Linda) shares everything he learned about achieving true financial freedom, including:

- How to create a money system so you can spend less time and get better results
- The One-Category Budget: get 80% of the results with 20% of the work
- The four keys to earning more in the digital era
- How to automate your way to financial success in less than 10 minutes
- The secrets of a six-figure giver
- Three credit card rules that banks don't want you to know
- How to save \$100s each month while still buying what you love
- And much more!

Whether you are doing “fine” or are in a financial crisis, the included 21-day kick-start will leave you with specific action items to guide you to success. You can have financial security, peace, significance, and

eternal impact. Let Bob show you how to reimagine money as it was meant to be: simple.
