How to Take Smart Notes Sönke Ahrens, 2022-03-11 This is the second, revised and expanded edition. The first edition was published under the slightly longer title *How to Take Smart Notes. One Simple Technique to Boost Writing, Learning and Thinking - for Students, Academics and Nonfiction Book Writers*. The key to good and efficient writing lies in the intelligent organisation of ideas and notes. This book helps students, academics and other knowledge workers to get more done, write intelligent texts and learn for the long run. It teaches you how to take smart notes and ensure they bring you and your projects forward. The Take Smart Notes principle is based on established psychological insight and draws from a tried and tested note-taking technique: the Zettelkasten. This is the first comprehensive guide and description of this system in English, and not only does it explain how it works, but also why. It suits students and academics in the social sciences and humanities, nonfiction writers and others who are in the business of reading, thinking and writing. Instead of wasting your time searching for your notes, quotes or references, you can focus on what really counts: thinking, understanding and developing new ideas in writing. Dr. Sönke Ahrens is a writer and

researcher in the field of education and social science. He is the author of the award-winning book “Experiment and Exploration: Forms of World Disclosure” (Springer). Since its first publication, How to Take Smart Notes has sold more than 100,000 copies and has been translated into seven languages.

Note-Taking Made Easy Judi Kesselman-Turkel, Franklynn Peterson, 2003-10-27 Updated and revised edition As every student quickly learns, merely sitting through a class and paying attention is usually not sufficient to ensure good grades. The proper taking of good notes is essential. Note-Taking Made Easy tells why the student should take his or her own notes (rather than buying them or taping lectures), and tells exactly how to determine what is worth noting, whether during a lecture, classroom discussion, even from a book or during a meeting. The authors describe the two most

successful methods of organizing notes—outlining and patterning—and provide shortcuts to really make note-taking easy, from shorthand devices to abbreviations. Special sections are devoted to taking notes from texts, fiction as well as nonfiction, and handling charts, graphs, and photos. A final chapter shows how to tie together notes from various sources. This STUDY SMART reference guide series, designed for students from junior high school through lifelong learning programs, teaches skills for research and note-taking, presents strategies for test-taking and studying, provides exercises to improve spelling, grammar, and vocabulary, and reveals secrets for putting these skills together in great essays.

53 Easy-to-Play World Songs for the 8 Note Tongue Drum:
Without Musical Notes. Just follow the Circles Helen Winter,
Through music, we are brought together and we can gain a better understanding of people from all corners of the Earth. We call this series “I Don’t Read Music” since we are targeting beginners of all ages: children, teens, parents, and grandparents. Getting to know music from around the world can be one of the most exciting and appealing ways to be introduced to new and different cultures. Music is a universal language, meaning that it transcends borders

and opens up an entirely new way of thinking. This book includes 53 popular, rhythmic, and easy-to-play folk songs and melodies from all over the world. Since this book is aimed at the absolute beginner without any knowledge of reading music, we do not use the classical music staff and do not show the note duration. Each song here is written without classic musical notation but only with circles and numbered notes inside. First of all, we recommend following the QR-code which you will find on each page, listening to the song on YouTube, and then trying to repeat what is heard in the recordings. It will help to understand the rhythm pattern and duration. Keep in mind that folk music traditionally is not learned from sheet music or notes. Instead, it is learned by repetition and through being passed from generation to generation. We believe in this method of teaching, which is easier and more enjoyable. For learning purposes, all songs have been simplified and adapted especially for 8 key drums. So you can use an 8-tongue drum, but tongue drums are very different. Some may have three C notes and not a single F note. Others have several chromatic notes included. So while it is based on the regular major diatonic scale, it does not have the typical CDEFGAB arrangement: it can have missing notes, a few additional bass, and treble notes placed

further away from the main group, or the notes arranged in a variety of ways. So if your drum has less than one octave of keys, you may need to skip some songs. Unfortunately, it is impossible to accommodate songs for all kinds of tongue drums in one book.

The Easiest Songbook. 58 Simple Songs without Musical Notes for Boomwhackers®, Bells, Chimes, Pipes Helen Winter, We call this series “I don’t read music” since we are targeting beginners of all ages: children, teens, parents, grandparents. Folk music traditionally is not learned from sheet music or notes. Instead, it is learned by repetition and from being passed from generation to generation. We believe in this method of teaching, which is easier and more enjoyable. This book includes 58 familiar and easy-to-play folk songs and melodies. Each song here is written with color circles and letter notes inside. All songs have been simplified and transposed for one octave. Since this book is aimed at the absolute beginner without any knowledge of reading music, we do not use here the classical music staff and do not show the note duration. You can experiment with the duration on

your own. If you have very little music experience, playing by note can be difficult. It is easier to follow color-coded circles with note letters. By simply following the color circles, you will sound like an experienced musician. We use here the Boomwhackers® color system commonly used by American music teachers. We call this series “I don’t read music” since we are targeting beginners of all ages: children, teens, parents, grandparents. Folk music traditionally is not learned from sheet music or notes. Instead, it is learned by repetition and from being passed from generation to generation. We believe in this method of teaching, which is easier and more enjoyable. Our simple method using circles as an aid allows the flexibility that existed in traditional ways of teaching. We recommend finding each of these songs on YouTube and listening to the rhythm before beginning to play. Our sheet music is only a guide. The most important thing is to listen and repeat what is heard in the recordings.
