How to Write a Good Advertisement Victor O. Schwab, 2015-10-28 This book might well have carried the subtitle *Or 44 Years in the Copy Department* instead of its present one. Even a copywriter, whose breed is not noteworthy for arithmetical prowess, could not escape arriving at the conclusion that the number of years from 1917 to 1961 totals forty-four. And, Heaven help me!, for that seeming aeon of time the major interest of the author has been advertising copy—good, bad, and indifferent. That a large measure of this past experience has been associated with a particularly demanding kind of advertising copy may, as will be explained, be an advantageous circumstance for the reader of this book, regardless of what type of copywriting job confronts him. For the subject of the book is not the writing of mail-order copy. Its sole purpose is to lend a hand to any copywriter (or student of copywriting) whose ambition is to create advertisements which are more resultful, no matter what the product is or how and where it is sold. As to why the author's background of experience may represent an advantageous circumstance for such copywriters, I will leave to an infinitely more capable pen than mine—that of no less an authority than Claude G. Hopkins, one of the greatest copywriters of "general" advertising who ever lived: "Mail-order advertising is difficult. But it is educational. It keeps one on his mettle. It fixes one's viewpoint on cost and result. The advertising-writer learns more from mail-order advertising than from any other." Therefore, if you are looking for guidance specifically concerned with the writing of mail-order advertising, this is not your book. On the other hand, if in the writing of any type of advertising you want more of your copy to achieve the selling effectiveness imperative for any mail-order man who wants to continue eating heartily, this book may prove helpful to you. At any rate, you are the person for whom it was written. Much of its information will probably recall to

your mind the aphorism, "We need not so much to be instructed as to be reminded." And that's all to the good. Finally, and appertaining to the passages which are reminiscent in nature, the author has tried to avoid any necessity for later having to admit, like Mark Twain, that "When I was very young I could remember anything, whether it happened or not. But now I am older and I can only remember the latter." Victor O. Schwab

Web Warehousing and Knowledge Management Rob Mattison,1999 This text explains the applications, architecture, and implementation issues of Web data warehousing. The Billable Hour Annie Dike,2015

Guidebook for Evaluating Airport Parking Strategies and Supporting Technologies ,2009 This guidebook presents various parking strategies and technologies that are employed, or have potential applications, at airports in the United States. This guidebook will assist airport operators in (1) determining their specific goals as they relate to public parking and their customer needs; (2) gaining an understanding of the parking strategies and technologies that correspond to their goals; and (3) evaluating benefits, costs, and implementation. With parking as the primary source of non-airline revenue at airports, and usually the customer's first and last experience with the airport, it is an important focus in an airport's overall strategic plan. ACRP Report 24 provides - in a single source - a buffet of parking strategies and technologies to complement and achieve airport operators' long-term goals and objectives. This guidebook will be useful to airport parking owners and operators, and their consultants, as they strive to better accommodate the needs of their customers, improve customer service, increase operational efficiency, and enhance net revenues.

Learning and Teaching in the Music Studio Juan Ignacio Pozo, María Puy Pérez Echeverría, Guadalupe López-

Íñiguez, José Antonio Torrado, 2022-04-26 This book advocates for a radical change in music teaching and learning methods, allowing for a break from the traditional conservatory model still in use in many classrooms. The product of twenty years of interdisciplinary work by musicians, music teachers, and psychologists, the book proposes to place the focus of music education on the students themselves and on their mental and physical activity, with the aim of helping them to manage their own goals and emotions. This alternative is based on a new theoretical framework, as well as numerous real, concrete examples of how to put it into practice with students of different ages and in different environments. This book focuses primarily on teaching instrumental music, but its content will be useful for any teacher, student, musician, or researcher interested in improving music education in any environment, whether formal or informal, in which it takes place Chapters 3, 4, 6 and 18 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
