Developing Digital Detectives Jennifer LaGarde,Darren Hudgins,2021-09-28 From the authors of the bestselling Fact vs. Fiction, this book offers easy-to-implement lessons to engage students in becoming media literacy "digital detectives," looking for clues, questioning motives, uncovering patterns, developing theories and, ultimately, delivering a verdict. The current news landscape is driven by clicks, with every social media influencer, trained and citizen journalists chasing the same goal: a viral story. In this environment, where the race to be first on the scene with the most sensational story often overshadows the need for accuracy, traditional strategies for determining information credibility are no longer enough. Rather than simply helping students become savvy information consumers, today's educators must provide learners with the skills to be digital detectives – information interrogators who are armed with a variety of tools for dissecting news stories and determining what's real and what isn't in our "post-truth world." This book: • Shares meaningful lessons that move beyond traditional "fake news" protocols to help learners navigate a world in which information can be both a force for good and a tool used to influence and manipulate. • Includes resources and examples to support educators in the work of facilitating engaging, relevant (and fun!) instructional opportunities for K-12 learners, in both face-to-face and digital learning environments. • Unpacks the connection between social-emotional learning and information literacy. • Includes access to the Digital Detective's Evidence Locker, an online collection of over 100 downloadable and remixable resources to support the lessons in the book. As the authors state: "Remember, the detective's job is NOT to prove themselves correct. Their job is to detect the

truth!" This statement reflects the way they approach the lessons in this book, providing clear and practical guidance to help educators address and overcome this ever-expanding issue.
