An Equal Place Scott L. Cummings, 2021-01-04 An Equal Place is a monumental study of the role of lawyers in the movement to challenge economic inequality in one of America's most unequal cities: Los Angeles. Breaking with the traditional focus on national civil rights history, the book turns to the stories of contemporary lawyers, on the front lines and behind the scenes, who use law to reshape the meaning of low-wage work in the local economy. Covering a transformative period of L.A. history, from the 1992 riots to the 2008 recession, Scott Cummings presents an unflinching account of five pivotal campaigns in which lawyers ally with local movements to challenge the abuses of garment sweatshops, the criminalization of day labor, the gentrification of downtown retail, the incursion of Wal-Mart groceries, and the misclassification of port truck drivers. Through these campaigns, lawyers and activists define the city as a space for redefining work in vital industries transformed by deindustrialization, outsourcing, and immigration. Organizing arises outside of traditional labor law, powered by community-labor and racial justice groups using levers of local government to ultimately change the nature of labor law itself. Cummings shows that sophisticated legal strategy engaging yet extending beyond courts, in which lawyers are equal partners in social movements is an indispensable part of the effort to make L.A. a more equal place. Challenging accounts of lawyers' negative impact on movements, Cummings argues that the L.A. campaigns have achieved meaningful reform, while strengthening the position of workers in local politics, through legal innovation. Dissecting the reasons for failure alongside the conditions for success, this groundbreaking book illuminates the crucial role of lawyers in forging a new model of city-building for the twenty-first century.

A New New Deal Amy B. Dean, David B. Reynolds, 2011-05-15 In A New New Deal, the labor movement leaders Amy B. Dean and David B. Reynolds offer a bold new plan to revitalize American labor activism and build a sense of common purpose between labor and community organizations. Dean and Reynolds demonstrate how alliances organized at the regional level are the most effective tool to build a voice for working people in the workplace, community, and halls of government. The authors draw on their own successes

to offer in-depth, contemporary case studies of effective labor-community coalitions. They also outline a concrete strategy for building power at the regional level. This pioneering model presents the regional building blocks for national change. A diverse audience—both within the labor movement and among its allies—will welcome this clear, detailed, and inspiring presentation of regional power-building tactics, which include deep coalition-building, leadership development, policy research, and aggressive political action. A New New Deal explores successful coalitions forged in Los Angeles, Boston, Denver, San Jose, New Haven, and Atlanta toward goals such as universal health insurance for children and sensible redevelopment efforts that benefit workers as well as businesses. The authors view partnerships between labor and grassroots organizations as a mutually beneficial strategy based on shared goals, resulting in a broadened membership base and increased organizational capacity. They make the innovative argument that the labor movement can steward both industry and community and make manifest the ways in which workplace battles are not the parochial concerns of isolated workers, but a fundamental struggle for America's future. Drawing on historical parallels, the authors illustrate how long-term collaborations between labor and community organizations are sowing the seeds of a new New Deal.

The Cyberunion Handbook: Transforming Labor Through Computer

Technology Arthur B Shostak,2015-02-24 In his original CyberUnion, the author presented a bold plan for unions to develop a more significant role in the 21st century by adopting four strategic aids - futuristics, innovations, services, and traditions (F-I-S-T) - knit together by cutting-edge Info Tech resources. CyberUnions in Action expands on the F-I-S-T model and looks at gains and setbacks in pioneering efforts to create CyberUnions. It highlights relevant websites, and features interviews with key CyberUnion advocates (and some critics). Shostak reviews overseas union efforts for transferable lessons, and pays special attention to the AFL-CIO campaign to ensure Labor's advances in the use of computer networks, the Internet, wireless devices, and more.

From Social Movement to Moral Market Paul-Brian McInerney,2014-01-01 In *From Social Movement to Moral Market*, Paul-Brian McInerney explores what happens when a movement of activists gives way to a market for entrepreneurs. This book explains the transition by tracing the brief and colorful history of the Circuit Riders, a group of activists who sought to lead nonprofits across the digital divide. In a single decade, this movement spawned a market for technology assistance providers, dedicated to serving nonprofit organizations. In contrast to the Circuit Riders' grassroots approach, which was rooted in their commitment to a cause, these consultancies sprung up as social enterprises, blending the values of the nonprofit sector with the economic principles of for-profit businesses. Through a historical-institutional analysis, this narrative shows how the values of a movement remain intact even as entrepreneurs displace activists. While the Circuit Riders serve as a rich core example in the book, McInerney's findings speak to similar processes in other moral markets, such as organic food, exploring how the evolution from movement to market impacts activists and enterprises alike.

Maine Birding Trail Bob Duchesne,2009-06-01 This is the authorized guide to the Maine Birding Trail, which opens in 2009. The book features more than 260 sites in Maine and includes bonus material on Campobello and Grand Manan islands. Unlike most guides, which emphasize species identification, this book highlights the sites themselves. Bird enthusiasts will count on it to lead them to the best birding locations in Maine and to list the species they will most likely find at each destination.

See MIPS Run Dominic Sweetman,2010-07-08 *See MIPS Run*, Second Edition, is not only a thorough update of the first edition, it is also a marriage of the best-known RISC architecture--MIPS--with the best-known open-source OS--Linux. The first part of the book begins with MIPS design principles and then describes the MIPS instruction set and programmers' resources. It uses the MIPS32 standard as a baseline (the 1st edition used the R3000) from which to compare all other versions of the architecture and assumes that MIPS64 is the main option. The second part is a significant change from the first edition. It provides concrete examples of operating system low level code, by using Linux as the example operating system. It describes how Linux is built on the foundations the MIPS hardware provides and summarizes the Linux application environment, describing the libraries, kernel device-drivers and CPU-specific code. It then digs deep into application code and library support, protection and memory management, interrupts in the Linux kernel and multiprocessor Linux. Sweetman has revised his best-selling MIPS bible for MIPS programmers, embedded systems designers, developers and programmers, who need an in-depth understanding of the MIPS architecture and specific guidance for writing software for MIPS-based systems, which are increasingly Linux-based. Completely new material offers the best explanation available on how Linux runs on real hardware. Provides a complete, updated and easy-to-use guide to the MIPS instruction set using the MIPS32 standard as the baseline architecture with the MIPS64 as the main option. Retains the same engaging writing style that made the first edition so readable, reflecting the authors 20+ years experience in designing systems based on the MIPS architecture.
