NATO, Britain, France and the FRG B. Heuser,1999-09-04 Containing the histories (from 1945 to the present) of the nuclear strategies of NATO, Britain and France, and of the defence preferences of the FRG (West Germany), this book shows how strategies were functions of a perceived Soviet threat and an American 'nuclear guarantee'. There were three options for West Europeans: a compromise with differing American needs in NATO, pursued by Britain and the FRG; national nuclear forces, developed by Britain and France; and projects for an independent European nuclear force.

Wages Against Artwork Leigh Claire La Berge,2019-08-23 The last twenty years have seen a rise in the production, circulation, and criticism of new forms of socially engaged art aimed at achieving social justice and economic equality. In *Wages Against Artwork* Leigh Claire La Berge shows how socially engaged art responds to and critiques what she calls decommodified labor—the slow diminishment of wages alongside an increase in the demands of work. Outlining the ways in which socially engaged artists relate to work, labor, and wages, La Berge examines how artists and organizers create institutions to address their own and others' financial precarity; why the increasing role of animals and children in contemporary art points to the turn away from paid labor; and how the expansion of MFA programs and student debt helps create the conditions for decommodified labor. In showing how socially engaged art operates within and against the need to be paid for work, La Berge offers a new theorization of the relationship between art and contemporary capitalism.

The Passing-on of Knowledge Max Kreijn,2010-04-02 Assuming 'God' as in 'God will provide' is the biggest excuse used in the last two thousand years or more, Anthony Ramekin sets about using his extensive contacts in the art-world, which he has been part of for more than twenty five years, to facilitate the rise and rise of a brilliant young photographer, Dorian Grey, his lover . Soon he realizes that the knowledge he is passing on, comes in equal measurements to the wisdom, love and fast mind of someone so much younger than himself. As Oscar Wilde so famously said: 'I'm not young enough to know everything...' Scandal, sets off a useful precedent for the people's interest in imagery, which somehow strikes a chord deep in their hearts. This is, after all, a love story, set in some of the world's great cities and Grand Hotels. The 'Hotel de l'Europe' in Amsterdam, the 'Cloitre de St.Louis' in Avignon, the 'Grand Hotel Wagner' in Palermo, The 'Hotel des Bains' in Venice. Berlin, London, Cordoba in Southern Spain, Monreale in Sicily and Bangkok all pass by. 'Recognizing fresh talent is not an act of abuse, ' Anthony is heard to say at some press-conference, beleaguered by tabloid scribblers, 'but can be gentle and enrich everybody's life.' Soon Dorian is working on his second book of photographs, cataloguing first love between two under-aged boys, with two of Luchino Visconti's most famous films, 'The Leopard' and 'Death in Venice' as background. Again Anthony is facilitating this new love-affair, which takes on an integral part of the story. Soon they realize they have a worldwide best-seller on their hands.

Damião de Gois Elisabeth Feist Hirsch,2012-12-06 Scholars have given relatively little attention to sixteenth-century Portuguese humanism, although Portugal's vital influence on the humanistic thirst for learning has been readily acknowledged. Through her heroic explorations of distant lands and dangerous sea routes, Portugal infected many humanists with the excitement of discovery, none more than Damiao de Gois, Portuguese student of history. Gois, although generally little known, was - in his life and finally as a victim of the Inquisition in Portugal - thoroughly representative of the course of sixteenth-century Erasmian humanism in Portugal; in addition he deserves recognition in his own right as a contributor to modern historiography. Portugal's explorations and the atmosphere of passion for discovery that prevailed in Lisbon had as strong an influence on Gois during his early years as that of the school of Erasmus, the prince of humanists who was eventually to become his personal friend and guide. Gois's two great chronicles of the Portuguese kings John II and Ma nuel I culminated a life spent as diplomat, composer, art collector, articulate pleader for religious tolerance, and scrupulous student of history. A factual report of Gois's life - in the main outlines accurate but not complete - exists in Portuguese, and a short resume of his life has been published in English, but so far no full study has been available in any language.

Technical Exercises (Complete) Franz Liszt,Julio Esteban,2005-05-03 This edition is comprised of 86 different technical exercises composed by Liszt during 1868 to 1880. Liszt intended these highly challenging exercises to build greater performance skills in virtuoso pianists. The complete series consists of twelve volumes, each one dealing with a different pianistic problem. This edition has been compiled from the original set to present the exercises in a reasonable length without harming the essence and effectiveness of the original work.

Emerging Conceptual, Ethical and Policy Issues in Bionanotechnology Fabrice Jotterand,2008-09-20 Nanobiotechnology is the convergence of existing and new biotechnology with the 1 ability to manipulate matter at or near the molecular level. This ability to manipulate matter on a scale of 100 nanometers (nm) or less is what constitutes the nanotechnology revolution occurring today, the potentially vast economic and social implications of which are yet to be fully understood (Royal Society, 2004). The most immediate way to understand the implications of nanobiotechnology for ethics is to consider the real life concerns of communities that are mobilizing within civil society. The conflicts and ethical debates surrounding nanotechnology will, almost by definition, emerge on the fault lines between different civil society actors, researchers and financial interests associated with nanobiotechnology, as well as (potentially) government regulators. These fault lines are all reflected within the concerns (as expressed d- cursively) of the communities mobilizing. This chapter will explore converging d- courses regarding converging technologies. Converging Technologies (CT) are already a familiar theme in the next gene- tion of biotechnology, nanotechnology, pharmacogenomics and proteomics research 2 and development. Nanobiotechnology means that previously separate disciplines (IT, physics, chemistry, and biology) are merging and converging to create new applications and even new life forms through converged technological platforms. Schummer (2004), and Glimell and Fogelberg (2003, p. 43), note the predominance of interdisciplinarity as a core theme of nano-discourse.

Clinical Applications for Motor Control Patricia C. Montgomery,Barbara H. Connolly,2002 Clinical Applications for Motor Control is a comprehensive text that will help bridge the gap between motor control/motor learning research and practical clinical applications. Written by a variety of physical therapists with a broad range of clinical expertise areas such as neurophysiology, biomechanics, and human motor control, this text is rich in a multitude of topics. The case-study format that is applied throughout the text amplifies the principles of motor control research and demonstrates the transfer of information from research studies to clinical settings. Incorporated throughout Clinical Applications for Motor Control are the concepts and language of the Guide to Physical Therapist Practice. The text begins with an introductory and historical review of traditional neurophysiologic treatment approaches and new theoretical alternatives. This comprehensive review establishes a foundation for the remaining chapters that address topics such as motor control, learning and development; musculoskeletal considerations; sensory and cognitive systems underlying the production and control of movement; disorders of the control of limb movement; and gait. Five case studies representing common clinical problems are included throughout the text to facilitate clinical problem solving. This innovative style is geared towards the student who has limited clinical experience, while also serving as a useful reference for the practicing clinician.
