Frontiers in Earth Science - Editor's Choice 2017 Valerio Acocella, 2018-03-29 2017 has been an exciting year for our innovative open access journal Frontiers in Earth Science: many new articles have been published and are now indexed in Web of Science (ESCI), new sections have opened for submissions (including Solid Earth Geophysics), and our Editorial Board has been successfully leading the peer review process and providing comprehensive reviews to our authors. Have a look at our archive to read about the feeding habits of dinosaurs, human influence on in the African humid period, volcanic hazard models, or how glaciers flowing into the ocean surrounding Greenland have changed over time! Launched at the end of 2013, our Journal consists of several specialties whose number has increased with time and currently stands at 19, also including a few specialties co-listed in other fields (<https://www.frontiersin.org/journals/earth-science#>). The present selection is not exhaustive as new ones are being launched and/or are under consideration for development. This growth has been paralleled by a yearly increase in the number of contributions and the Editorial Board members, reflecting the health of the Journal. Now also indexed in Web of Science - Emerging Sources Citation Index (ESCI), Frontiers in Earth Science is ambitious to become the leading open access journal in its field. The idea of creating an Editor's Choice eBook has been in our minds for a while as we wanted to create an environment for the Chief Editors to highlight their choice of representative papers in the Journal - we are happy to present now our first edition. The eBook offers a quick, though representative, window into the different specialties, giving additional visibility to some of the most interesting studies published in 2016 and 2017. It provides a glimpse into the state of the art of Earth Science on the cusp of 2020. Earth Science studies the different spheres of the Earth (geosphere, atmosphere, hydrosphere and, partly, biosphere) and, as such, it provides a holistic perspective of our planet. This discipline, in addition to understanding our environment, enables us to face major natural challenges, such as improving the management of natural resources, promoting environmental sustainability and forecasting and managing natural hazards (Acocella, 2015, and references therein). On this basis, the contributions grouped in this eBook, even though appearing distinct in subject, methods, goal and impact, should be considered as different aspects of the same system. Indeed, the selection of these contributions aims to capture a multidisciplinary and common understanding of our planet, with its interconnected processes and challenges. It is important to note that, in many cases, it has not been easy to select a representative study per specialty, and thus the papers included in this eBook should therefore not be considered as the representative ones, but rather as a concise

selection of key papers. We hope you enjoy reading our first edition of the Editor's Choice eBook!

*What Editors Do* Peter Ginna, 2017-10-06 Essays from twenty-seven leading book editors: “Honest and unflinching accounts from publishing insiders . . . a valuable primer on the field.” —Publishers Weekly Editing is an invisible art in which the very best work goes undetected. Editors strive to create books that are enlightening, seamless, and pleasurable to read, all while giving credit to the author. This makes it all the more difficult to truly understand the range of roles they inhabit while shepherding a project from concept to publication. *What Editors Do* gathers essays from twenty-seven leading figures in book publishing about their work. Representing both large houses and small, and encompassing trade, textbook, academic, and children’s publishing, the contributors make the case for why editing remains a vital function to writers—and readers—everywhere. Ironically for an industry built on words, there has been a scarcity of written guidance on how to approach the work of editing. Serving as a compendium of professional advice and a portrait of what goes on behind the scenes, this book sheds light on how editors acquire books, what constitutes a strong author-editor relationship, and the editor’s vital role at each stage of the publishing process—a role that extends far beyond marking up the author’s text. This collection treats editing as both art and craft, and also as a career. It explores how editors balance passion against the economic realities of publishing—and shows why, in the face of a rapidly changing publishing landscape, editors are more important than ever. “Authoritative, entertaining, and informative.” —Copyediting

*Frontiers in Physics - 2017 & 2018 Editor's Choice* Thomas Beyer, Ewald Moser, Dieter W. Heermann, Christian F. Klingenberg, James Sauls, José W. F. Valle, Jan de Boer, Emilio Elizalde, Dumitru Baleanu, Alex Hansen, Nicholas X. Fang, Lorenzo Pavesi, Bretislav Friedrich, Christine Charles, Matjaž Perc, Jasper Van Der Gucht, Rudolf von Steiger, Claudio Bogazzi, 2019-02-22 Launched in 2013, *Frontiers in Physics* consists of 18 specialties covering all areas of research in physics. With over 500 published manuscripts, the journal is now indexed in SCIE with the first impact factor coming in 2019. *Frontiers in Physics* aims to become the largest and most cited open access multidisciplinary physics journal. This eBook collects what the Specialty Chief Editors of the journal believed were the most interesting manuscripts published over the past two years. It is a nice collection, which will offer the reader the chance to have a quick overview of the specialties of the journal and offer a glimpse into the state of the art of physics. We must confess that it has been quite challenging to select only one article per specialty section given the many important manuscripts published by the journal in 2017

and 2018. We invite our reader to have a look at the journal homepage and browse what we have published so far. It includes articles on topics very different from each other, written by both early career scientists and well-known researchers, ranging from the indisputable advance of the field to the more bold. We hope you enjoy reading our first edition of the Frontiers in Physics Editor's Choice eBook! Professor Alex Hansen (Field Chief Editor) and Dr Claudio Bogazzi (Journal Manager)

Churchill and Orwell Thomas E. Ricks, 2018-05-01 A New York Times bestseller! A New York Times Book Review Notable Book of 2017 A dual biography of Winston Churchill and George Orwell, who preserved democracy from the threats of authoritarianism, from the left and right alike. Both George Orwell and Winston Churchill came close to death in the mid-1930's—Orwell shot in the neck in a trench line in the Spanish Civil War, and Churchill struck by a car in New York City. If they'd died then, history would scarcely remember them. At the time, Churchill was a politician on the outs, his loyalty to his class and party suspect. Orwell was a mildly successful novelist, to put it generously. No one would have predicted that by the end of the 20th century they would be considered two of the most important people in British history for having the vision and courage to campaign tirelessly, in words and in deeds, against the totalitarian threat from both the left and the right. In a crucial moment, they responded first by seeking the facts of the matter, seeing through the lies and obfuscations, and then they acted on their beliefs. Together, to an extent not sufficiently appreciated, they kept the West's compass set toward freedom as its due north. It's not easy to recall now how lonely a position both men once occupied. By the late 1930's, democracy was discredited in many circles, and authoritarian rulers were everywhere in the ascent. There were some who decried the scourge of communism, but saw in Hitler and Mussolini men we could do business with, if not in fact saviors. And there were others who saw the Nazi and fascist threat as malign, but tended to view communism as the path to salvation. Churchill and Orwell, on the other hand, had the foresight to see clearly that the issue was human freedom—that whatever its coloration, a government that denied its people basic freedoms was a totalitarian menace and had to be resisted. In the end, Churchill and Orwell proved their age's necessary men. The glorious climax of Churchill and Orwell is the work they both did in the decade of the 1940's to triumph over freedom's enemies. And though Churchill played the larger role in the defeat of Hitler and the Axis, Orwell's reckoning with the menace of authoritarian rule in *Animal Farm* and *1984* would define the stakes of the Cold War for its 50-year course, and continues to give inspiration to fighters for freedom to this day. Taken together, in Thomas E. Ricks's masterful hands, their lives are a beautiful testament to the power of moral conviction, and to the courage it can take to

stay true to it, through thick and thin. Churchill and Orwell is a perfect gift for the holidays!

**Alcoholic Liver Disease, An Issue of Clinics in Liver Disease, E-Book Stanley Cohen,2016-07-15**

Alcohol abuse remains a significant problem world-wide. The most commonly affected organ remains the liver with a risk of alcoholic liver disease (ALD) which can range from asymptomatic to alcoholic hepatitis to alcoholic cirrhosis. In 2010, alcohol-attributable cirrhosis was responsible for 0.9% of all global deaths. Given the sheer magnitude of alcohol abuse and alcoholic liver disease, an update on this topic is pertinent and relevant. This issue will focus on a variety of topics including alcoholism, the pathogenesis of ALD, the spectrum of ALD, the pathology of ALD, and the long-term management of patients with ALD. Alcoholic hepatitis is a particular type of ALD with a high mortality. This issue will explore the syndrome of alcoholic hepatitis, its prognostic markers, and the available therapies. Because alcohol intake can influence so many other conditions of the liver (especially hepatitis C), articles in this issue will also explore the impact of alcohol abuse on other liver conditions. In addition, several other topics such as nutritional therapy for ALD, ALD and liver cancer, and ALD and infection risk will be explored. Also, even though it is quite controversial, we will also explore liver transplant as a therapy for alcoholic liver disease including alcoholic hepatitis.

**Beyond Pan-Asianism** Tansen Sen, Brian Tsui, 2020-11-01 Within Asia, the period from 1840s to 1960s had witnessed the rise and decline of Pax Britannica, the growth of multiple and often competing anti-colonial movements, and the entrenchment of the nation-state system. Beyond Pan-Asianism seeks to demonstrate the complex interactions between China, India, and their neighbouring societies against this background of imperialism and nationalist resistance. The contributors to this volume, from India, the West, and the Chinese-speaking world, cover a tremendous breadth of figures, including novelists, soldiers, intelligence officers, archivists, among others, by deploying published and archival materials in multiple Asian and Western languages. This volume also attempts to answer the question of how China-India connectedness in the modern period should be narrated. Instead of providing one definite answer, it engages with prevailing and past frameworks—notably 'Pan-Asianism' and 'China/India as Method'—with an aim to provoke further discussions on how histories of China-India and, by extension the non-Western world, can be conceptualized.

The Best American Magazine Writing 2017 Sid Holt,The American Society of Magazine Editors,2017-12-19 With the work of reporters under fire worldwide, this year's anthology of National Magazine Award finalists and winners is a timely reminder of the power of journalism. The pieces included here explore the fault lines in American society. Shane Bauer's visceral "My Four Months as a Private Prison Guard" (Mother Jones) and Sarah Stillman's depiction of the havoc wreaked on young people's lives when they are put on sex-offender registries (The New Yorker) examine controversial criminal-justice practices. And responses to the shocks of the recent election include Matt Taibbi's irreverent dispatches from the campaign trail (Rolling Stone), George Saunders's transfixing account of Trump's rallies (The New Yorker), and Andrew Sullivan's fears for the future of democracy (New York). In other considerations of the political scene, Jeffrey Goldberg talks through Obama's foreign-policy legacy with the former president (The Atlantic), and Gabriel Sherman analyzes how Roger Ailes's fall sheds light on conservative media (New York). Linking personal stories to the course of history, Nikole Hannah-Jones looks for a school for her daughter in a rapidly changing, racially divided Brooklyn (New York Times Magazine), and Pamela Colloff explores how the 1966 University of Texas Tower mass shooting changed the course of one survivor's life (Texas Monthly). A selection of Rebecca Solnit's Harper's commentary ranges from a writer on death row to the isolation at the heart of conservatism. Becca Rothfeld ponders women waiting on love from the Odyssey to Tinder

(Hedgehog Review). Siddhartha Mukherjee depicts the art and agony of oncology (New York Times Magazine). David Quammen ventures to Yellowstone to consider the future of wild places (National Geographic), and Mac McClelland follows a deranged expedition to Cuba in search of the ivory-billed woodpecker (Audubon). The collection concludes with Zandria Robinson's eloquent portrait of her father as reflected in the music he loved (Oxford American).
