Vocabulary Increase and Collocation Learning Haiyan Men, 2017-09-04 This book highlights research that expands on our knowledge of second- language collocation acquisition. It presents original findings based on the largest collocation database to date, encompassing over 8,000 collocations: verb + noun, adjective + noun, and noun + noun. These collocations, collected from a one-million-learner corpus, were not confined to English as a foreign language (EFL) learners at a particular proficiency level, but also included learners at three levels. As such, the book provides a panoramic view regarding L2 collocation acquisition, not only in terms of learners' acquisition of different types of collocations, but in terms of the developmental patterns in L2 collocation learning. One major discovery is that there is a collocation lag as learners' proficiency levels rise, which is associated with vocabulary increase, in particular semantic domains—a remarkable insight for second-language acquisition researchers, English teachers and EFL learners alike. The findings reported shed new light on how collocations are acquired by EFL learners, offering guidance on how they can best be taught. In closing, the book discusses pedagogical aspects that arise from considering how learners can be helped with collocation learning.

Style in Translation: A Corpus-Based Perspective Libo Huang, 2015-01-26 This book attempts to explore style—a traditional topic—in literary translation with a corpus-based approach. A parallel corpus consisting of the English translations of modern and contemporary Chinese novels is introduced and used as the major context for the research. The style in translation is approached from perspectives of the author/the source text, the translated texts and the translator. Both the parallel model and the comparable model are employed and

a multiple-complex model of comparison is proposed. The research model, both quantitative and qualitative, is duplicable within other language pairs. Apart from the basics of corpus building, readers may notice that literary texts offer an ideal context for stylistic research and a parallel corpus of literary texts may provide various observations to the style in translation. In this book, readers may find a close interaction between translation theory and practice. Tables and figures are used to help the argumentation. The book will be of interest to postgraduate students, teachers and professionals who are interested in corpus-based translation studies and stylistics.

The Construction of Words Geert Booij, 2018-04-13 This volume focuses on detailed studies of various aspects of Construction Morphology, and combines theoretical analysis and descriptive detail. It deals with data from several domains of linguistics and contributes to an integration of findings from various subdisciplines of linguistics into a common model of the architecture of language. It presents applications and extensions of the model of Construction Morphology to a wide range of languages. Construction Morphology is one of the theoretical paradigms in present-day morphology. It makes use of concepts of Construction Grammar for the analysis of word formation and inflection. Complex words are seen as constructions, that is, pairs of form and meaning. Morphological patterns are accounted for by construction schemas. These are the recipes for coining new words and word forms, and they motivate the properties of existing complex words. Both schemas and individual words are stored, and hence there is no strict separation of lexicon and grammar. In addition to abstract schemas there are subschemas for subclasses of complex words with specific properties. This architecture of the grammar is in harmony with findings from other empirical domains of

linguistics such as language acquisition, word processing, and language change.

Lights, Camera, Telemedicine , Lights, Camera, Telemedicine is an article written by Marilyn Larkin that originally appeared in the May-June 1997 issue of FDA Consumer, a magazine published by the U.S. Food and Drug Administration (FDA). Larkin discusses the practice of telemedicine, which involves the use of computers and telecommunication equipment to provide health care over long distances. She discusses the benefits and obstacles of telemedicine. The FDA presents the article online.

Fourier Analysis and Applications Claude Gasquet, Patrick Witomski, 2013-12-01 The object of this book is two-fold -- on the one hand it conveys to mathematical readers a rigorous presentation and exploration of the important applications of analysis leading to numerical calculations. On the other hand, it presents physics readers with a body of theory in which the well-known formulae find their justification. The basic study of fundamental notions, such as Lebesgue integration and theory of distribution, allow the establishment of the following areas: Fourier analysis and convolution Filters and signal analysis time-frequency analysis (gabor transforms and wavelets). The whole is rounded off with a large number of exercises as well as selected worked-out solutions.

The Comprehensible Cosmos Victor J. Stenger, 2006-07-05 Stenger provides an

in-depth presentation for those fascinated by how physics explains the universe and affects philosophy.

A History of the Finnish Church Markku Heikkilä, 2016 This book is the first general survey in English of the history of the Finnish church. It is based on recent research, but written in a clear and accessible style. It presents a continuous narrative of the church in Finland, from the arrival of Christianity to the present day. While the church in Finland developed essentially along the same lines as in other Nordic countries, there are some unique aspects deriving from Finland's location between East and West. Some distinctively Finnish responses to processes of modernization and secularization have left their mark on Finnish culture and society. Markku Heikkilä is Emeritus Professor of Practical Theology at the University of Helsinki, and Simo Heininen is Emeritus Professor of Church History at the University of Helsinki.
