Cognition, Language and Aging Heather Harris Wright,2016-03-16 Age-related changes in cognitive and language functions have been extensively researched over the past half-century. A thoughtful and comprehensive review of current research spanning different disciplines that study aging will achieve this purpose. Such disciplines include linguistics, psychology, sociolinguistics, neurosciences, cognitive sciences, and communication sciences. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

This work will prepare the trainee to confidently advance to the more specific core topics in reconstructive and aesthetic plastic surgery. CCIE Security Practice Labs Fahim Hussain Yusuf Bhajji,2004 Annotation CCIE Security Practice Labs provides a series of complete practice labs that mirror the difficult hands-on lab exam. Written by a CCIE Security engineer and Cisco Systems CCIE proctor, this book lays out seven end-to-end scenarios that are both complex and realistic, providing you with the practice needed to prepare for your lab examination and develop critical-thinking skills that are essential for resolving complex, real-world security problems. While many engineers are able to configure single technologies in standalone environments, most will struggle when dealing with integrated technologies in heterogeneous environments. CCIE Security Practice Labs consists of seven full-blown labs. The book does not waste time covering conceptual knowledge found in other security manuals, but focuses exclusively on these complex scenarios. The structure of each chapter is the same, covering a broad range of security topics. Each chapter starts with an overview, equipment list, and general guidelines and instructions on setting up the lab topology, including cabling instructions, and concludes with verification, hints, and troubleshooting tips, which highlight show and debug commands. The companion CD-ROM contains solutions for all of the labs, including configurations and common show command output from all the devices in the topology.--BOOK JACKET. The DNA of God Leoncio A. Garza-Valdes, 2012-05-09 In 1988, radiocarbon dating showed that the Shroud of Turin--long regarded as the burial cloth of Jesus of Nazareth--could not be from the time of Jesus but was of a more recent origin. What scientists did not know at that time, but what author Dr. Leoncio Garza-Valdes came to discover, is that bacteria produce an organic coating (what he calls a bioplastic coating) over time on ancient textiles, textiles including the Shroud itself. This coating, which the author first discovered on Mayan artifacts, so distorts the carbon dating process that objects on which it is found (such as the Shroud) are actually significantly older than the data show. The scientific community has hailed Dr. Garza-Valdes's findings since this new knowledge is of significance for archaeologists around the world. For those interested in the mysterious history of the Shroud, it is again possible to regard this artifact as originating in the first century--and consequently as being the burial cloth of Jesus. But Dr. Garza-Valdes's amazing discoveries did not end with this breakthrough. His examination of pieces of the Shroud under a microscope has revealed incredible clues consistent with the Scriptural accounts of the death of Jesus. Bacteria that produce acetic acid (vinegar) were isolated from the Shroud. Do they belong to the vinegar offered to Jesus before his death on the cross? Could human blood remnants that contain a man's DNA be traces of the blood of Jesus? Does it contain the DNA of God? The DNA of God? is the fascinating story of this microbiologist's journey of discovery and of the earthshaking secrets he has revealed about the Shroud of Turin.
