The Teaching of Geography Mendel Everett Branom, Frederick Kenneth Branom, 1921

Teaching Geography by Problems E. Ehrlich Smith, 1921

Teaching Geography in Secondary Schools Margaret Smith, 2005-06-29 This book introduces and explores a broad range of contemporary issues and key ideas and will provide a useful background for those teaching and training this exciting subject.

Learning Progressions in Geography Education Osvaldo Muñiz Solari, Michael Solem, Richard Boehm, 2016-07-30 This book informs an international audience of teachers, scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world. The book represents an important contribution to learning progressions research and practice. The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography. The book compares educational systems and how teachers and curriculum developers use the concept of “learning progression” to guide educational practices. As an approach to educational research, learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards. The book analyzes the general conditions of learning progressions within the context of a globalized world. Important themes are addressed such as: knowledge acquisition in formal education; measuring learning progressions in informal settings; learning progressions for one curriculum standard or several standards; conditions to assess progression in the learning of facts, concepts, and skills; and multiple pathways for understanding or learning geography. The contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries. The book appeals to K-12 teachers, school administrators, policymakers, researchers in geography education, professors and lecturers at universities around the world.

Understanding and Teaching Primary Geography Simon Catling, Tessa Willy, 2018-06-18 This book outlines how good teaching of primary geography can extend children’s world awareness and help them make connections between their environmental and geographical experiences. Chapters offer guidance on important learning and teaching issues as well as the use and creation of resources from the school environment to the global context. It covers all the key topics in primary geography including: understanding places physical and human geography environmental sustainability learning outside the classroom global issues citizenship and social justice. Summaries, classroom examples and practical and reflective tasks are included throughout to foster understanding and support the effective teaching of primary geography.

Issues in Geography Teaching Chris Fisher, Tony Binns, 2016-01-28 Issues in Geography Teaching examines a wide range of issues which are of interest to those teaching geography from the early years through to higher education, including: the role of research and the use of ICT in teacher training; the significance of developing critical thinking skills; broader educational issues such as citizenship and development; the importance of environmental education; the position and role of assessment; the present state and status of geographical education and issues that are likely to be of concern in the future. Issues in Geography Teaching details the contexts, presents the facts and raises thought-provoking questions which should stimulate further interest and discussion.

Debates in Geography Education Mark Jones, David Lambert, 2013-01-04 Debates in Geography Education encourages student and practising teachers to engage with and reflect on key issues, concepts and debates in their specialist subject teaching. It aims to enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Expert editors and contributors provide a balance of experience and perspectives and offer international, historical and policy contexts, evidence informed classroom debates and a glimpse of the subject’s expanding horizons. Debates considered include: what constitutes knowledge in geography? constructing the curriculum; how do we link assessment to making progress in geography? the contribution of fieldwork and outdoor experiences; technology and media; how we use Geographical Information; how geography contributes to ‘global learning’; sustainable development and geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, reflective questions and a range of specific web-based resources, will help support shape your own research and writing. Debates in Geography Education is a source of knowledge, experience and debate that will be essential reading for all students studying at Masters level, practising teachers who want to develop a better understanding of the issues that shape their practice, and Education Studies students considering in-depth subject teaching.

Progress in Geography: Key Stage 3 Workbook 1 Stephen Schwab, David Gardner, Eleanor Hopkins, Susan Schwab, Catherine Owen, Jo Coles, John Lyon, 2018-09-28

Teaching and Learning Geography Daniella Tilbury, Michael Williams, 2002-11 This book provides a clear overview of current thinking on the teaching and learning of geography. It is ideal for anyone beginning a career in teaching the subject in schools. The chapters are written by experienced teachers.

Geography in Secondary Schools Nick Hopwood, 2012-06-21 Gaining a better sense of how pupils conceive school geography is crucial if we are to understand the ways in which their ideas and values mediate learning processes. Geography in Secondary Schools explores how pupils experience geography lessons, what they think geography as a school subject is about, and what it means to them. School geography aims to help young people think about the world and their place in it in a distinctive - geographical - way. However very little is known about the kinds of thinking and values they associate with the subject. Researchers are increasingly taking young people's ideas seriously as important and worthy of investigation in their own right. In this book, Nick Hopwood takes such an approach to explore the relationships between pupils and geography as a school subject. He follows six pupils through their geography lessons for a period of three months, discussing their learning experiences in depth with them. Their participation in class, written work, and comments made in interviews form the basis for a detailed investigation of their ideas.

Handbook for Teaching and Learning in Geography Helen Walkington, Jennifer Hill, Sarah Dyer, 2019-12-27 This exemplary Handbook provides readers with a novel synthesis of international research, evidence-based practice and personal reflections to offer an overview of the current state of knowledge in the field of teaching geography in higher education. Chapters cover the three key transitions – into, through, and out of higher education – to present a thorough analysis of the topic.

Citizenship Through Secondary Geography David Lambert, Paul Machon, 2004-01-14 This book reveals the potential of geography to engage with citizenship. It provides:

theoretical signposts in the form of short, digestible explanations for key ideas such as racism, values, identity, community and social exclusion a number of inset activities 'for further thinking' a critique of the discipline and the pitfalls to avoid in teaching citizenship through geography practical teaching suggestions. All the contributions to this valuable book point to the capacity of geography to engage with citizenship, values, education and people - environment decision-making, on scales that range from the local to the global. It offers positive and direct ways to become involved in the thinking that must underpin any worthwhile citizenship education, for all experienced teachers, student teachers, heads of department, curriculum managers, principals and policy-makers.

Four Years in a Country School Fannie Wyche Dunn, Marcia A. Everett, 1926

Geography 11 - 16 (1995) Bill Marsden, 2018-09-03 Published in 1995, this book seeks to show how geography teachers can meet the requirements of the National Curriculum at Key Stages 3 and 4 without abandoning principles of good practice. It considers geographical education in the contexts of geography itself, society and education. Deriving principles of good practice from these contexts, the author gives guidance on how to produce case studies (or curriculum units) that both reflect these principles and respond to the requirements of the National Curriculum following the Dearing Revised Order.

Teaching Human Geography Erin Hogan Fouberg, Janet Stuhrenberg Smith, 2023-03-02 This timely book examines advances in teaching and learning at undergraduate level from the disciplines of geography education, neuroscience and learning science. Connecting these disciplines, the chapters integrate research on how students learn and explain how to teach students to think geographically and develop a deeper understanding of their world.

Geography Education in the Digital World Nicola Walshe, Grace Healy, 2020-10-07 Geography Education in the Digital World draws on theory and practice to provide a critical exploration of the role and practice of geography education within the digital world. It considers how living within a digital world influences teacher identity and professionalism and is changing young people's lives. The book moves beyond the applied perspective of educational technology to engage with wider social and ethical issues of technology implementation and use of digital data within geography education. Situated at the intersection between research and practice, chapters draw on a wide range of theory to consider the role, adoption and potential challenges of a range of digital technologies in furthering geographical education for future generations. Bringing together academics from the fields of geography, geography education and teacher education, the book engages with four key themes within the digital world: Professional practice and personal identities. Geographical sources and connections. Geospatial technologies. Geographical fieldwork. This is a crucial read for geographers, geography educators and geography teacher educators, as well as those engaging with existing and new technologies to support geographical learning in the dynamic context of the digital world. It will also be of interest to any students, academics and policymakers wanting to better understand the impact of digital media on education.

Teaching Geography Creatively Stephen Scoffham, 2016-10-04 Teaching Geography Creatively was Winner of the Geographical Association Gold Award 2014 and Winner of the Geographical Association Silver Award 2017. This fully updated second edition of Teaching Geography Creatively is a stimulating source of guidance for busy trainee and experienced teachers. Packed full of practical approaches for bringing the teaching of geography to life, it offers a range of innovative ideas for exploring physical geography, human geography and environmental issues. Underpinned by the very latest research and theory, expert authors from schools and universities explore the inter-relationship between creativity and learning, and consider how creativity can enhance pupils' motivation, self-image and well-being. Two brand new chapters focus on creative approaches to learning about the physical world, as well as the value of alternative learning settings. Further imaginative ideas include: games and starter activities as entry points for creative learning how to keep geography messy the outdoors and learning beyond the classroom how to teach geography using your local area the links between geography and other areas of the curriculum looking at geography, creativity and the future fun and games in geography engaging with the world through picture-books teaching about sustainability. With contemporary, cutting-edge practice at the forefront, Teaching Geography Creatively is an essential read for all trainee and practicing teachers, offering a variety of practical strategies to create a fun and stimulating learning environment. In the process it offers a pedagogy that respects the integrity of children as joyful and imaginative learners and which offers a vision of how geography can contribute to constructing a better and more equitable world.
